	Leap Year Double Sunday ↗ = March 31 (Leap Day) + April 1																											

* The Leap Day (March 31, Sunday) can be the World Astronomy Day

Annual Double Sunday ↗
= December 31 + January 1

The Balanced WEcalendar (World Enduring Calendar) retains the existing 365 dates of the year.

It merely removes July 31 and adds February 30. All months have either 30 or 31 days.

All quarters of the year always begin on **Sunday** with exact 13 weeks in 3 months.

Both the New Year's Day and the New Year's Eve are always on **Sunday**.

The Leap Day is set on **March 31, Sunday**. Then, it repeats annually...

* It introduces the least changes and can offer long-term economic benefits.

* It overcomes the drawbacks of the redundant annual calendar renewal.

* It is the simplest and most considerate calendar for all strata of society.

* It is the most practical civil calendar for governments and businesses.

The Week Numbering of *WEcalendar* ensures the compatibility of both editions.

31 ← 闰年双星期天 = 3月31日(闰日) + 4月1日																			31 ← 周年双星期天 = 12月31日 + 1月1日										

永年日历 (WEcalendar = The World Enduring Calendar) 保留了现有的365个日期。

它只需要删除7月31日，并且添加2月30日。所有月份可以保持30或31天。

每季度总是在星期天开始，持续3个月和13个整周。每年的除夕和元旦也是星期天。

闰日是在3月31日(星期天)。然后我们可以每年重复使用它。

永年日历克服了日历每年更新的缺点，也消除了不必要的日历功能。

这是社会各阶层最简单的年历，也是政府和企业最实用的年历。
