

DEC Information Locator

<https://dec.ny.gov/maps/interactive-maps/decinfo-locator>

The DEC Information Locator is an interactive map that allows users to easily access DEC documents and public data about the environmental quality of specific sites in New York State, as well as outdoor recreation information.

With more than 90 data layers available, this is the first application that shows both environmental quality monitoring and natural resource information together in one place.

Several layers may prove very helpful / interesting:

Concentrated Animal Feeding Operations (CAFOs)

Water Withdrawal Annual Reports

Within the water withdrawal layer are the "Registration and Water Withdrawal Reporting Form For Agricultural Facilities".
