New Patient
Adult Health History Questionnaire

The purpose of this questionnaire is to have you gather together key information about your past and current level of health. I hope that in the process of completing this questionnaire that additional questions or insights will arise.

Please devote some focused time and attention to thoughtfully complete this form. It will be most effective if you complete this questionnaire before your first office visit. It would be helpful if you could mail, fax, or hand deliver the completed form so that it arrives before your initial consultation. I do not work with email-based medicine and do not have a portal for that category of communication.

Please read and answer each question carefully. If there is a question you have difficulty answering, circle that question and we can discuss it in person.

Your answers to these questions are confidential. All of our conversations and your medical records are also confidential.

I know that this questionnaire is long and involved, but it is very helpful to me to have this baseline of medical and personal data in order to better understand how I can best help your unique medical situation.

I look forward to working with you in your pursuit of health,

Steve Paulus, DO, MS

Name of Patient: _____

❑ I have completed my own questionnaire.

If the patient is unable to complete this form, please provide the following information:

History written/recorded by: _____

Relationship to patient: _____

WHAT ARE YOUR HEALTH CONCERNS?
What is/are the primary problem(s) you would like help with?

When did this problem begin? *Please be specific:*

Why do you think this problem occurred? *What are your theories?*
