SHIVKRISHNA POLYTEX
PVT.LTD

SK Group is one of the leading PP Woven Fabric manufacturers all across the globe. You can choose from our PP Woven Fabric in laminated and un-laminated forms that are easily recyclable and used in industrial segments like:

- BOPP BAGS
- FIBC
- CEMENT BAGS
- TARPAULIN COVER
- TENT & SHELTERS
- TEXTILES

SHIVKRISHNA PACKAGING
INDUSTRIES

We, at Shivkrishna Packaging, strongly believe in providing advanced and versatile packaging solutions to our esteemed clientele. We use the BOPP (Biaxially oriented polypropylene) film in our packaging products. As the word 'Biaxially-Oriented' suggests, BOPP is a material that is stretched in two different directions producing a specific molecular chain, which also makes it unique. The world's second most-produced synthetic plastic PP is its parent material, BOPP woven bags are your answer if you are looking for an economical yet stupendously useful packaging solution. Today, BOPP woven bags are widely used in the packaging industry across the globe.

- RICE/PULSE/ATTA BAGS
- COMMERCIAL BAGS
- CEMENT BAGS
- ALL KIND OF PRINTED BAGS
