

PERSONAL PROPERTY TAX BILLING

RELEASE NOTES MARCH 2022

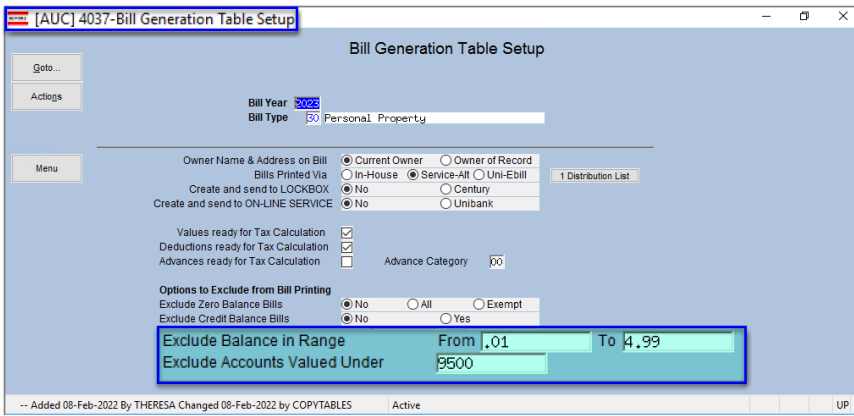

This document explains new product enhancements added to the **ADMINS Unified Community (AUC) PERSONAL PROPERTY TAX** system.

Bill Generation Table Field Logging [Fix]

As fields were added to the screen over time, the logging was not updated to include **descriptions** of the new fields. **ADMINS** fixed this and installed it with the software update. Field logging will now include the **descriptions** for all fields, for changes made in the past and in the future. To see how this works, from the menu, select:

Tax ▶ Billing – Personal Property ▶ Bill Generation Table

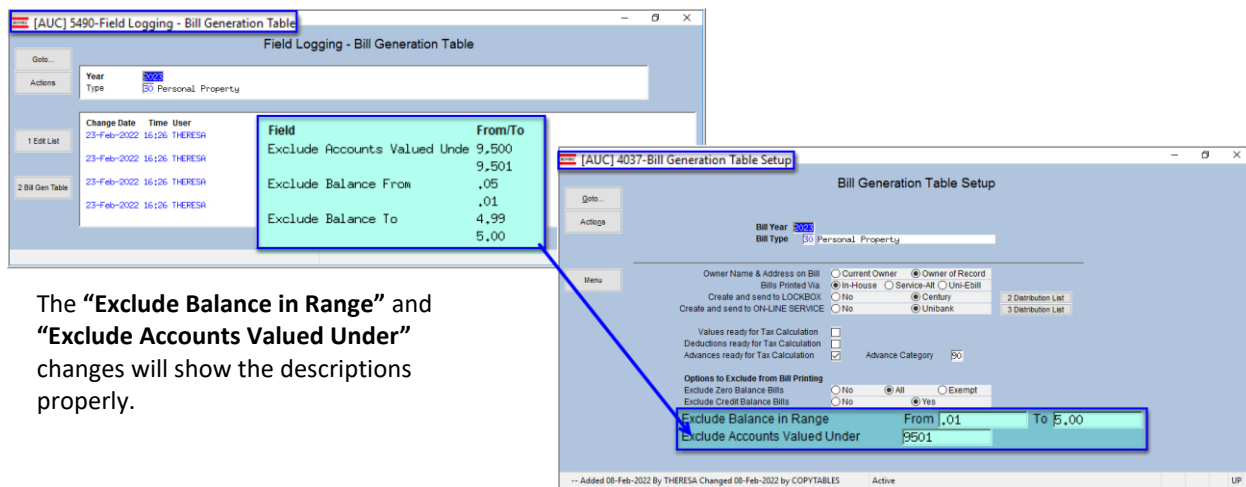

All changes made here will be logged in the Field Logging – Bill Generation Table screen.

Figure 1 The Bill Generation Table Setup screen

To see field changes, from the menu, select:

Tax ▶ Module Maintenance ▶ Field Logging – Bill Generation Table

The “Exclude Balance in Range” and “Exclude Accounts Valued Under” changes will show the descriptions properly.

Figure 2 “Exclude Balance in Range” and “Exclude Accounts Valued Under” fields are now logged with descriptions
