## 1. POSTING MESSAGES [FIX]

When posting a large number of transactions, users would sometimes get logged off of the AUC server and see this message:

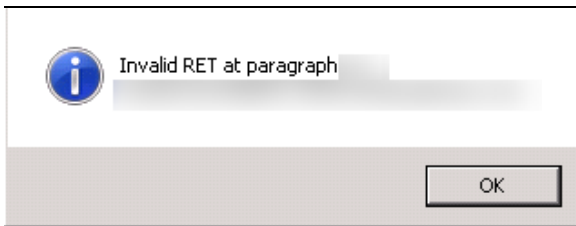

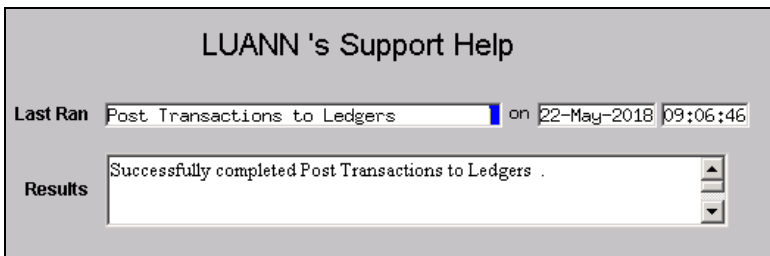

Figure 1 Before “Invalid RET at paragraph...” error message

This has been fixed and the user may now see a successfully completed message like this one once the process has completed.

### 1.1. Posting a Tax Title Payment Batch

A similar change was made when posting a tax title payment batch; the user will no longer see the error shown in Figure 1.

## 2. TAX TAKING [Fix]

The Credit Balance Redistribution (CBR) will no longer process bills with negative charges.

There was an issue with bills that had a preliminary billing where the preliminary tax was more than the actual billing. This resulted in the actual billing for quarters 3 and 4 to be negative. If bills with negative balances for quarters 3 and 4 were subject to Tax Title, the CBR caused errors.

With the software update, the Tax Title taking will no longer flag these bills to force the user to run the CBR.
