1 Budget Report Budget Year Selection [Fix]

Resolved an issue on the Budget Report selection screen that would generate an error when the Budget Year was changed from the current Budget Year. Budget Year validation has been enhanced, and a new error message now provides a more detailed explanation when an invalid year is entered. Budget years must be within a valid range (30 years prior to the current Budget Year and through 10 years after the current Budget Year). Entering a budget year outside of this range will trigger the new validation message seen below.

The screenshot shows a web application window titled "Budget Town Meeting Report". It has a "Report Title" field with the text "Budget Town Meeting Report" and a "Budget FY" field with the value "2099". Below these fields is a section titled "1 Selection Criteria" which contains a table with three columns: "Element", "From", and "To". The table has four rows: "Fund" (0000 to 0000), "Department" (000 to 000), "Function" (0000 to 0000), and "Program" (000 to 000). An "OK" button is visible at the bottom right of the table. Overlaid on the right side of the form is a "Check Error" dialog box. The dialog box has a blue information icon and a yellow background with the text: "E12001-Budget Year can only be between Current FY -30 or Current FY +10". An "OK" button is at the bottom right of the dialog box.
