## nTEK Profile

nTEK, Incorporated is a leading electromechanical representative company serving customers in the Pacific Northwest. nTEK is uniquely positioned within the marketplace, representing a select group of manufacturers, driving value to our customers. All of nTEK's Principals maintain a global footprint, strong engineering and technological leadership.

## Principals

---

### BH Electronics

BH designs and manufacturers custom and standard transformers, inductors, filters, test baluns, chokes, assemblies and related devices. BH products are intended for use in baseband, broadband and power applications from 20KHz – 1GHz. Factories are located in the US and Asia.

### ChromeLED

ISO certified LED solutions provider, offering SMD LED, PLCC LED, through-hole LED, High Power LED, Seven-Segment displays and LED lighting solutions. ChromeLED offers direct or distribution sales, U.S. stocking, best-in-industry lead times and quality manufacturing. ChromeLED worldwide headquarters are located in Los Angeles with manufacturing facilities in Taiwan and China.

### CIT Relay & Switch

Providing a broad array of automotive, telecom, security, industrial, and audio thru-hole and surface mount switches and relays, CIT is the choice for new designs and second sourcing. Headquartered in Minnesota, CIT offers customers a flexible approach to relay and switch design.

### JAUCH

Jauch Group is one of the leading specialists for quartz crystals, crystal oscillators and battery technology. Headquarters in Germany, with subsidiaries world-wide, along with world-wide manufacturing.

### MEGA Electronics

Specializing in power solutions from wall to device, Mega Electronics is among the leaders in world-wide standards, specialty power cord manufacturing and DC/DC – AC/DC converters. Mega is ISO-9001 certified, with corporate headquarters located in New Brunswick, NJ. Manufacturing facilities are located in the Philippines and Guangdong, China.

### META FAB

An ISO-9001 precision sheet metal fabricator located in Hillsboro, OR. Capabilities range from laser, laser punch-turret combo, powder coat, pad printing, CnC machining, value-add engineering + assembly, along with many more capabilities all in-house.

### Motion Solutions US

Established in 2004 as a premier ISO certified BLDC and hybrid-stepper supplier, along with thermal management solutions. Motion Solutions provides factory direct to OEM manufacturers in North America, driving large competitive advantages.

### Okaya Electric

A global provider of a wide range of LCD modules and display technologies including: Character, Graphic, Color TFT, and OLED display panels, with touch technology. Okaya also offers a wide range of Electrical Noise & Surge Suppression components. For over 20 years OKAYA has been dedicated to producing reliable, high quality solutions and providing excellent customer service.

### Paragon

Wire and Cable harness manufacturing, Everett, WA. Engineering support and high-quality production capabilities. ISO9001, ISO13485, ITAR Registered, UL Recognized, AS9102, PPAP and RoHS Compliant.

### Platt

Offering molded, sewn, and ATA ruggedized tool cases for business and industry. Custom capabilities, US built, while offering low-cost distribution of Pelican and other ruggedized case solutions.
