

Reverse Logistics: Temperature Controlled Packaging

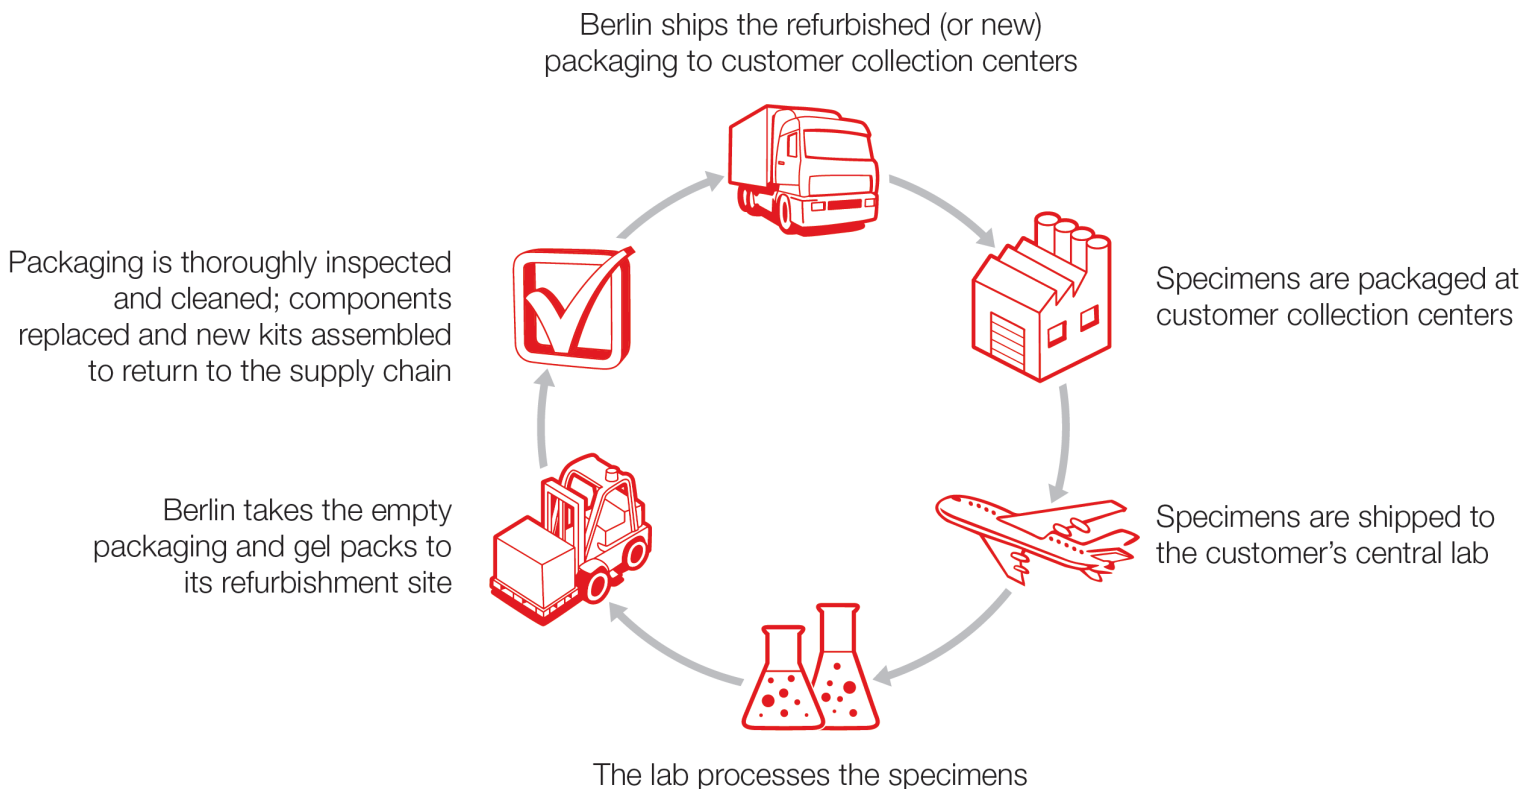

**DANGEROUS
GOODS** A DIVISION OF
BERLIN PACKAGING

Unconditional Reliability

Our pre-qualified insulated shippers for ambient, frozen, and refrigerated ranges have been used to safely ship tens of thousands of biological specimens and other temperature-sensitive materials. We can manage all aspects of the reverse logistics process, from warehousing to pick-up and delivery through product cleaning and refurbishment. Our rigorous quality assurance standards ensure that the packaging meets the right performance level.

Ideal for organs, pharmaceuticals, vaccines, specimen shipments, sample collections, and sensitive electronics and chemicals.

Sample Return/Re-Use Model

Berlin Dangerous Goods offers proven, cost-effective, and environmentally-friendly return and re-use programs for our ambient and temperature-controlled packaging systems.

Our shipping solutions mitigate risk from packaging damage and temperature excursions for our customers, ensuring product integrity throughout the supply chain. Our vast product offering includes refrigerated, frozen, controlled room temperature, and ambient solutions. In addition, our in-house and third-party testing services provide pre-qualified and custom shipping solutions to meet all regulatory requirements.

Features

- Packaging leasing and ownership options
