Sit Station Move, Repeat Change

Employees work an average of 3-8 hours a day, and many spend more time sitting than sleeping. Studies have found a link between sedentary activity and increased risk of diabetes, obesity, heart disease, and certain cancers. Standing accelerates blood circulation, burns excess calories, and accelerates body metabolism. Standing for a long time is prone to back pain and fatigue. Therefore, multiple postures need to be changed during work. Highly adjustable furniture can reduce sitting time by up to 60%, and switching between sitting and standing positions can make our body healthier.

坐→站→移动，重复改变

员工平均一天工作 3-8 小时，很多人坐的时间要多于睡眠的时间。研究发现久坐与糖尿病、肥胖、心脏病及某些癌症风险增加之间存在着必然联系。短时站立可加速血液循环、燃烧多余的卡路里并且加快身体的新陈代谢。长时间站立容易导致后背疼痛和疲劳。因此工作期间需要变换多个姿势。高度可调式家具最多可将坐着的时间减少60%，并且在坐姿和站姿之间切换可让我们的身体更健康。

Office Sport

FIT

Workstation System

Standing office mode, healthy working environment, can make the whole body blood circulation. Keep the brain awake and realize the office space function of high efficiency and pleasure.

站立式的办公模式、健康的工作环境，能使全身血液流通。让大脑保持清醒，实现办公高效性，愉悦的办公空间功能。

VICTORY 百利
Dynamic Space

Health Work

Dynamic Commercial Space Integrative Solution Expert

Smart lift, pleasant office, stand-up office mode, healthy and efficient work.

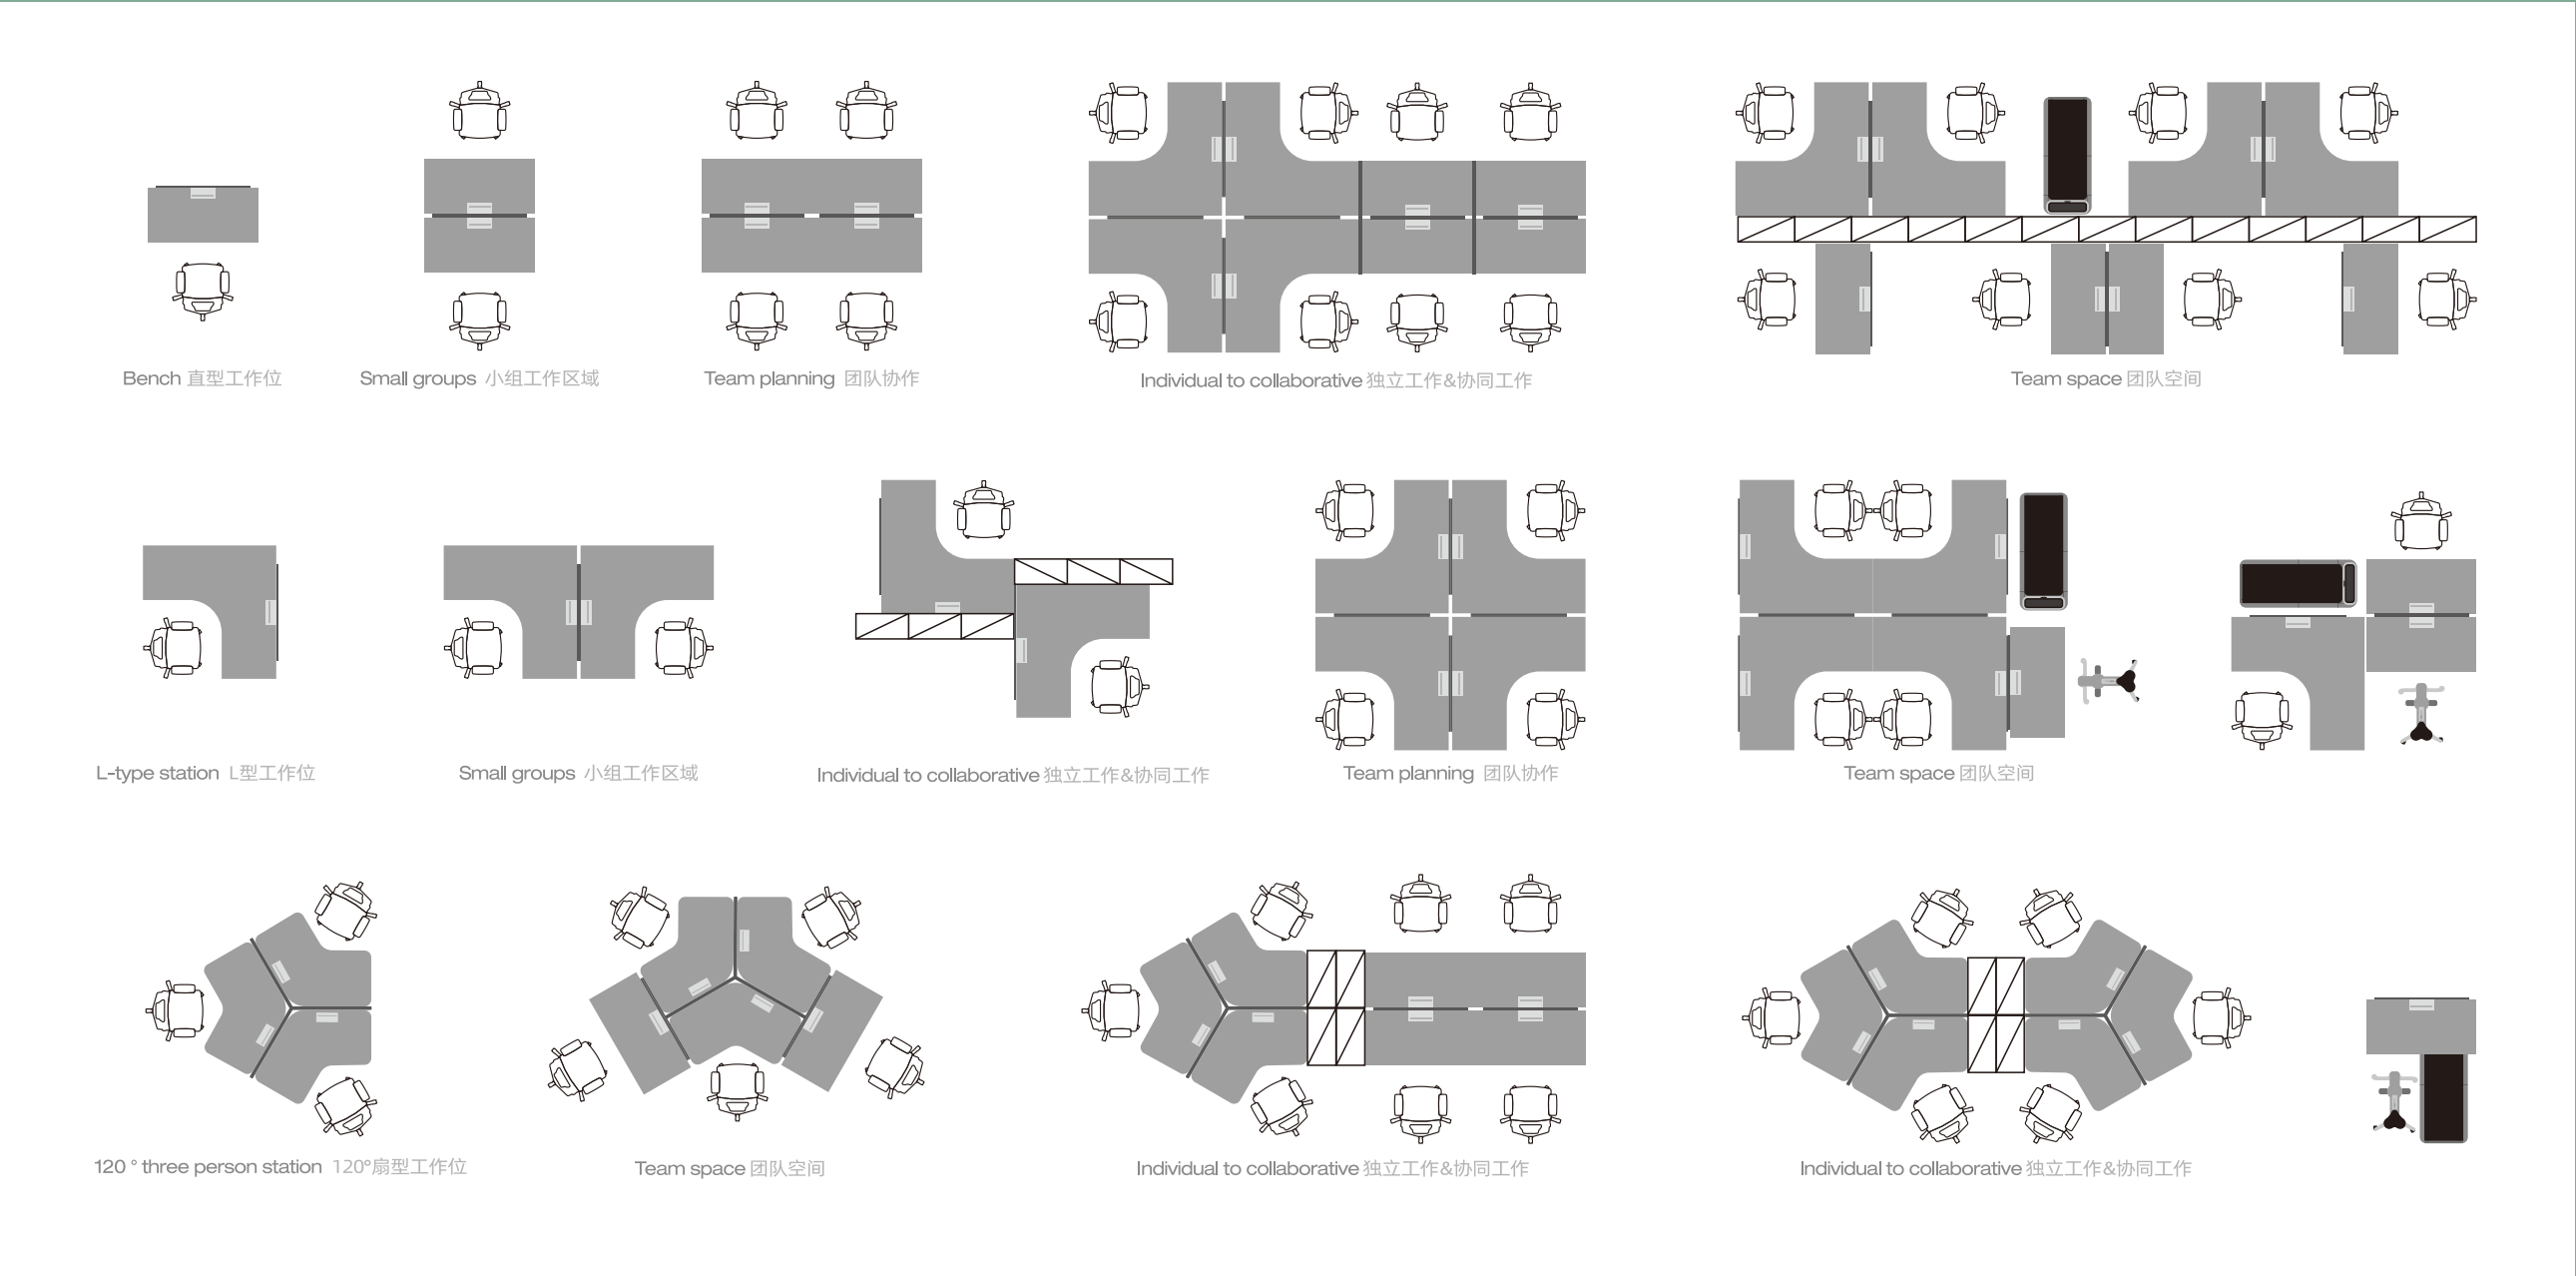

Flexible combination mode, a variety of forms of choice, rich color combination, so that physical and mental health can be effectively developed.

智能升降，愉悦办公，站立式的办公模式，健康高效的工作。灵活的组合模式，多种形态可选，丰富的色彩搭配组合，让身心健康得以有效的发展。

ACTIVITY ZONES IN THE OPEN PLAN ENVIRONMENT

开放式环境中的活动区域

Bench 直型工位

Benching is smart solution when tailored to the organisation' s work processes and individual work styles.

根据组织的工作流程和个人工作风格定制解决方案，直型工位提供一个灵活的设计方案。

L-type station L型工位

L-type is smart solution when tailored to the organisation' s work processes and individual work styles.

根据组织的工作流程和个人工作风格定制解决方案，L型工位提供一个灵活的设计方案。

120 ° three person station 120°扇型工位

120 ° three person is smart solution when tailored to the organisation' s work processes and individual work styles.

根据组织的工作流程和个人工作风格定制解决方案，120 °扇型工位提供一个灵活的设计方案。

Small groups 小组工作区域

Activity spaces for small groups and for sharing, exchange. These areas make a lively open environment and support collaborative work .

小组工作区域营造了一个用于小组分享和讨论、支持协同的开放环境。

Individual to collaborative 独立工作&协同工作

The FiT system providing a dynamic, modern work environment giving users the type of space they need.

FiT 系统支持多种活动，提供现代的活态工作环境。

Team space 团队空间

Relaxed spaces where team members can easily exchange and share information, work creatively either alone or together.

团队空间是一个轻松的环境，在这里小组人员易于交流和分享信息，既可独立工作又可协同工作。

Team planning 团队协作

The configuration encourages a team of four-to-eight people to communicate freely and frequently. This multi- purpose layout enables focused, shared and team work without leaving the primary work area.

组合支持4-8人的团队在工作中不离开工作区域就能够自由频繁地交流。

FiT

Workstation System

FiT Single Station

FiT single station configuration will prevent the fallback safety system (Optional function). During the descent process, it will automatically stop and reverse when encountering obstacles within 2cm range, effectively avoiding the possibility of danger.

Knocking lifting (Optional function), we abandon the ordinary handle to control the lifting, and can control the lifting height by knocking on the panel.

FiT 单人工位

FiT 单人工位将阻回退安全系统（选配功能），下降过程中在 2cm 范围内遇障碍物自动停止并反回，有效避免发生危险的可能性。

敲击升降（选配功能），我们摒弃普通的手柄控制升降, 通过敲击面板即可控制升降高度。

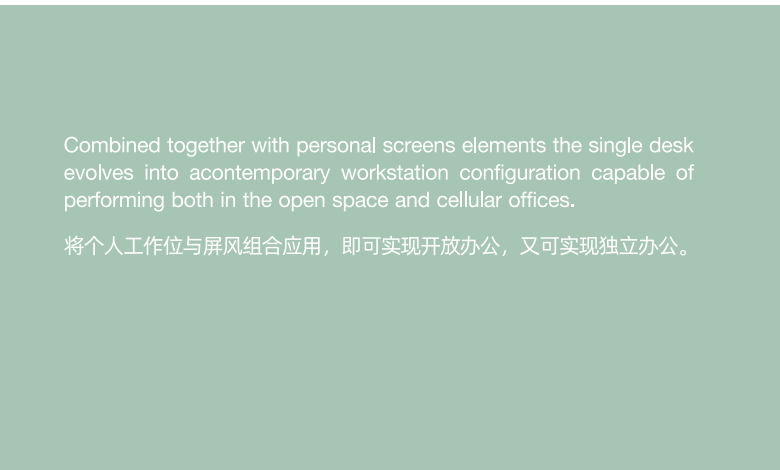

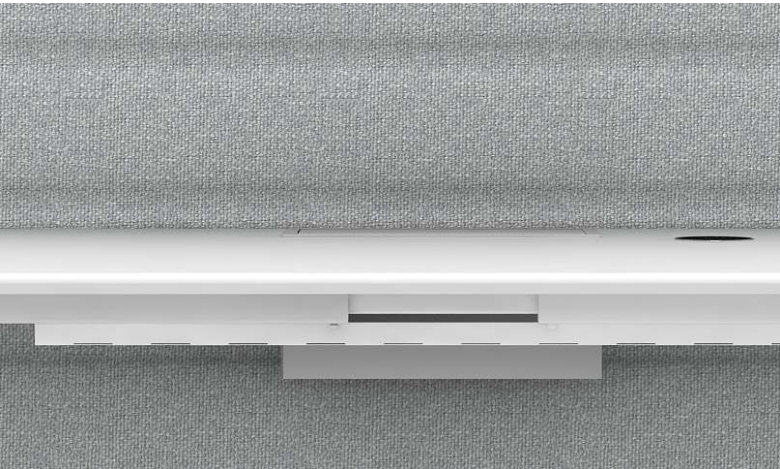

**BACK OFF
DEVICE IN CASE
OF OBSTRUCTION**

**将阻回退
安全保护系统**

选配功能

THIS PRODUCT IS GREAT FOR

- ✓ Ascending and descending
- ✓ Efficiency
- ✓ Healthy
- ✓ Motion

Combined together with personal screens elements the single desk evolves into a contemporary workstation configuration capable of performing both in the open space and cellular offices.

将个人工位与屏风组合应用，即可实现开放办公，又可实现独立办公。

FiT

Workstation System

FiT 2-Person Station

FiT single station configuration will prevent the fallback safety system (Optional function) . During the descent process, it will automatically stop and reverse when encountering obstacles within 2cm range, effectively avoiding the possibility of danger.

Knocking lifting (Optional function) , we abandon the ordinary handle to control the lifting, and can control the lifting height by knocking on the panel.

FiT 双人工位

FiT 双人工位将阻回退安全系统（选配功能），下降过程中在2CM范围内遇障碍物自动停止并反回，有效避免发生危险的可能性。

敲击升降（选配功能），我们摒弃普通的手柄控制升降，通过敲击面板即可控制升降高度。

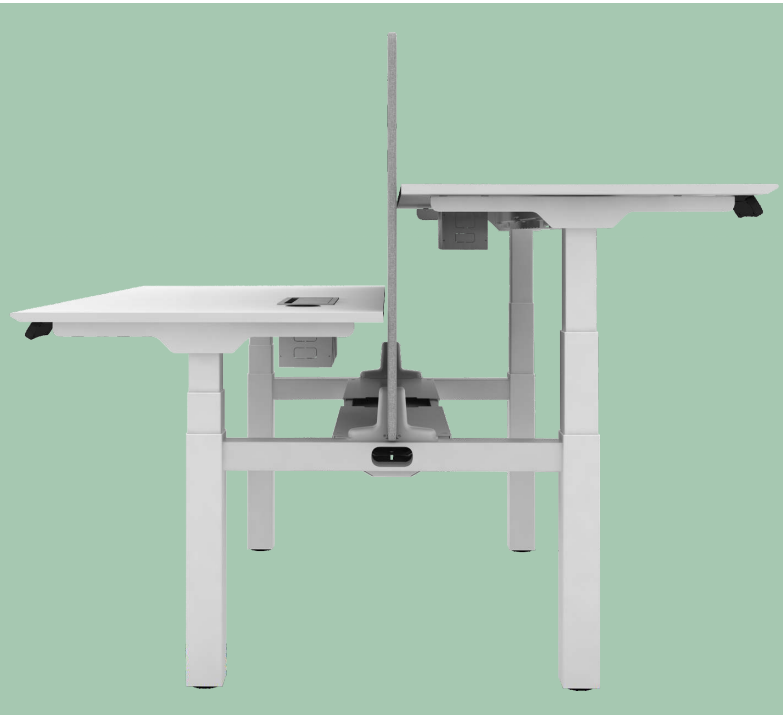

THIS PRODUCT IS GREAT FOR

- ☑ Ascending and descending
- ☑ Efficiency
- ☑ Healthy
- ☑ Motion

Industry-leading desktop speed, reduced waiting times, and efficient alternation of sitting and standing.

行业领先的桌面升降速度，减少等待时间，高效实现坐站交替。

FiT Workstation System

FiT 4-Person Station

FiT single station configuration will prevent the fallback safety system (Optional function) . During the descent process, it will automatically stop and reverse when encountering obstacles within 2cm range, effectively avoiding the possibility of danger.

Knocking lifting (Optional function) , we abandon the ordinary handle to control the lifting, and can control the lifting height by knocking on the panel.

Fit 四人工位

FIT 四人工位将阻回退安全系统（选配功能），下降过程中在2CM范围内遇障碍物自动停止并反回，有效避免发生危险的可能性。

敲击升降（选配功能），我们摒弃普通的手柄控制升降，通过敲击面板即可控制升降高度。

用户不必使用升降桌控制面板，通过敲击桌面，即可控制升降桌的升高或降低。让用户可以更方便使用升降桌。

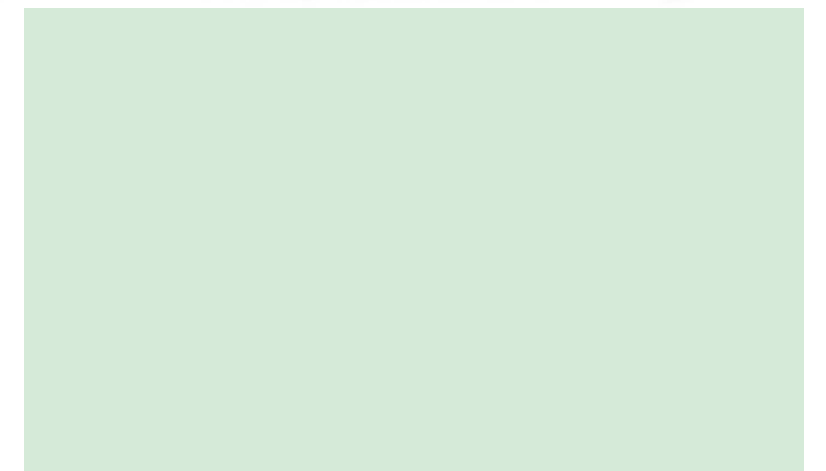

THIS PRODUCT IS GREAT FOR

- ☒ Ascending and descending
- ☒ Efficiency
- ☒ Healthy
- ☒ Motion

Combined together with personal screens elements the single desk evolves into a contemporary workstation configuration capable of performing both in the open space and cellular offices.

将个人工作位与屏风组合应用，即可实现开放办公，又可实现独立办公。

FIT

Workstation System

FiT L-type station

FiT L-type station is equipped with a safety system for reversing and stopping when encountering obstacles during descent (Optional function) , so as to effectively avoid the possibility of danger.

Knocking lifting (Optional function) , we abandon the ordinary handle to control the lifting, and can control the lifting height by knocking on the panel.

Fit L型工位

FiT L型工位将阻回退安全系统（选配功能），下降过程中遇到障碍物自动停止并反回，有效避免发生危险的可能性。

敲击升降（选配功能），我们摒弃普通的手柄控制升降，通过敲击面板即可控制升降高度。

**Sedentary
Reminder**
久坐提醒

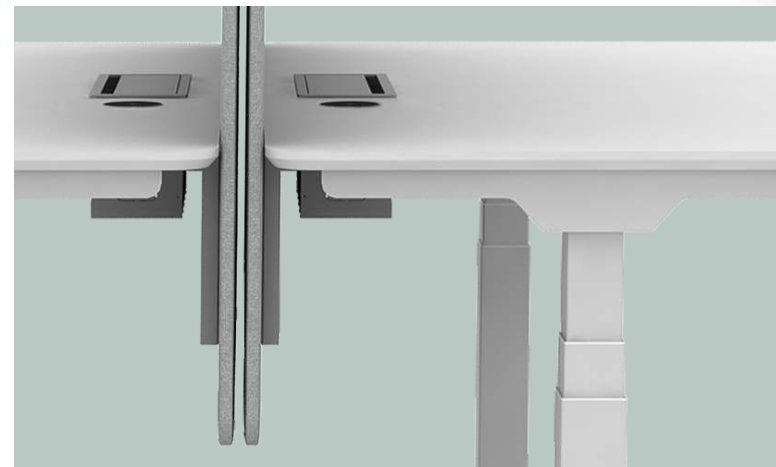

THIS PRODUCT IS GREAT FOR

- ☒ Ascending and descending
- ☒ Efficiency
- ☒ Healthy
- ☒ Motion

FiT system has a "T"-leg which can be fitted with a mechanism for height adjustability which allows sitting and standing working positions at your workplace.

FiT 系统T字脚内装置的机构实现升降功能，用户既可以站着办公也可以坐着办公，从而实现多种办公姿态。

FIT

Workstation System

FiT 120 ° three person station

FiT 120 ° three person station is equipped with a safety system for reversing and stopping when encountering obstacles during descent (Optional function) , so as to effectively avoid the possibility of danger.

Knocking lifting (Optional function) , we abandon the ordinary handle to control the lifting, and can control the lifting height by knocking on the panel.

Fit 120°三人位

FiT 120°三人位工位将阻回退安全系统（选配功能），下降过程中遇到障碍物自动停止并返回，有效避免发生危险的可能性。

敲击升降（选配功能），我们摒弃普通的手柄控制升降，通过敲击面板即可控制升降高度。

最新快捷快拆安装系统，使安装和维护变得简单。有效节省工作时间和维护成本。

Express
Setup
快速安装

THIS PRODUCT IS GREAT FOR

- ☑ Ascending and descending
- ☑ Efficiency
- ☑ Healthy
- ☑ Motion

FiT ' s simple lines and lightweight design benefit from a modern office environment Zhang. Fit enables users to move and change their posture from time to time throughout the day.

FiT 简洁的线条和轻巧的设计与现代化办公环境相得益彰。FiT促使用户在一天内不时移动和改变姿势工作。

Employees are the most important asset of the company,
The rapid development of any enterprise depends on the
physical and mental health of employees

Office Sport

FIT

Workstation System

FiT Treadmill

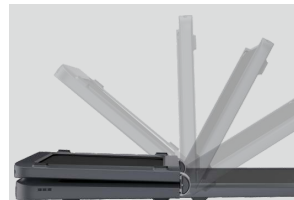

Fit treadmill can take advantage of office time and fragmented time to exercise lightly at any time, and bid farewell to the habit of sitting in office. The speed of foot determines the speed of movement, which can enhance office vitality and stimulate more creativity.

Fit 跑步机

FIT 跑步机可利用办公闲暇、碎片时间随时轻运动，告别静坐办公的习惯，脚步速度快慢决定运动强度，提升办公活力，激发更多创造力。

THIS PRODUCT IS GREAT FOR

- ☒ Ascending and descending
- ☒ Efficiency
- ☒ Healthy
- ☒ Motion

Relieve Stress

FIT

Workstation System

FiT Exercise bike

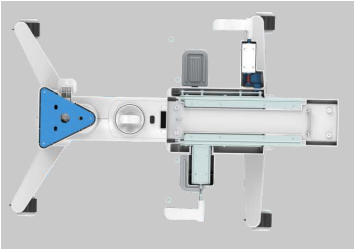

Fit bike works and works at any time. Office workers work long hours every day. They are prone to sub-health after sitting for a long time. With fit fitness bike, they can exercise more and improve their brain vitality and work more efficiently.

Fit 健身车

FIT 健身车随时工作，随时运动。上班族每天工作时间长，久坐不动容易亚健康，有了FIT 健身车，多运动，提升脑活力，工作更高效。

THIS PRODUCT IS GREAT FOR

- ☒ Ascending and descending
- ☒ Efficiency
- ☒ Healthy
- ☒ Motion

Functions and Parts

Combined together with personal screens elements
the single desk evolves into a contemporary
workstation configuration capable of
performing both in the open space and cellular offices.

FIT

Workstation System

There are many different problems to be solved concerning the wiring up of Workstations depending on your technology and requirements so FIT has a wide range of solutions available to personalise the solution and satisfy your needs.

Tops are also kept clean and packaged until the very last moment so that the installation is perfect for the client on the delivery date.

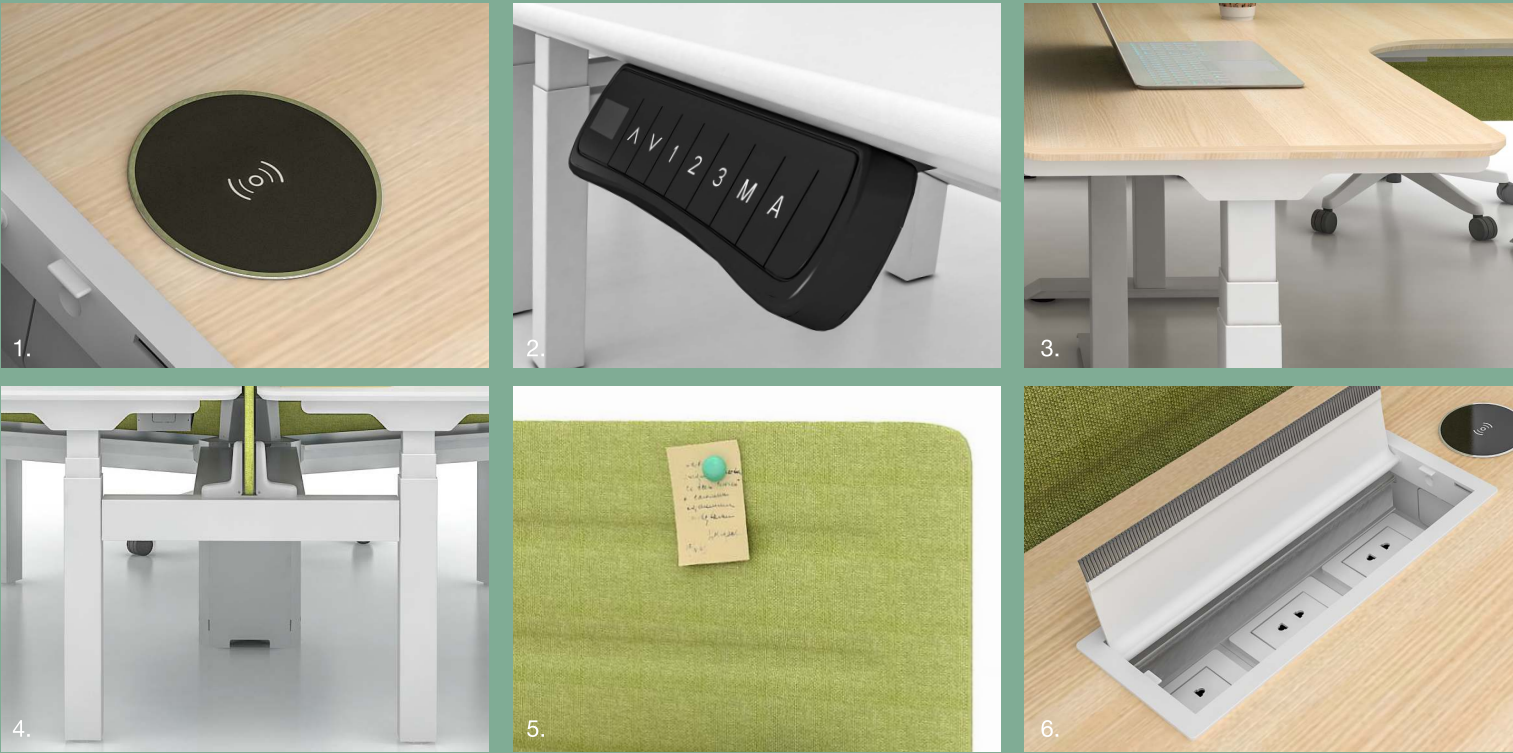

FIT 拥有强大的走线功能并提供多种个性化方案来满足您的需求。台面板在安装的最后一刻，仍然保持着干净、整洁、包装完好，（台面板是最后从上面固定）以确保在交付客户使用时有完美的安装效果。

Technical details 工艺细节

Fit system has a variety of different accessories. These accessories, screens and supports play a substantial role in improving work efficiency and maintaining the order of the workplace, which is more helpful to create a good working atmosphere.

FIT 系统具有多种不同的配件选择，这些配件和屏风、支架在提高工作效率、保持工作场所秩序上发挥实质性作用，更有助于营造一个良好的工作氛围。

1. Wireless phone charging 无线手机充电； 2. Handheld controller 手持控制器； 3. Safety system lifting platform in case of blockage 遇阻回退安全系统升降台架；
4. Hidden wiring system 隐藏式走线系统； 5. Inlet sound-absorbing velvet screen 进口吸音布绒屏风； 6. Submerged hidden receptacle 下沉隐藏式电插

FiT Workstation System

The system will block back the latest safety protection function of the safety protection system. When the system determines that obstacles will be encountered in the 2CM range, the descent will automatically stop and reverse to avoid the possibility of danger as soon as possible.

将阻回退安全保护系统最新安全保护功能，当系统判定在2CM范围内会遇到障碍物的情况下，会自动停止下降并反向回退，及早的规避发生危险的可能性。

BACK OFF DEVICE IN CASE OF OBSTRUCTION

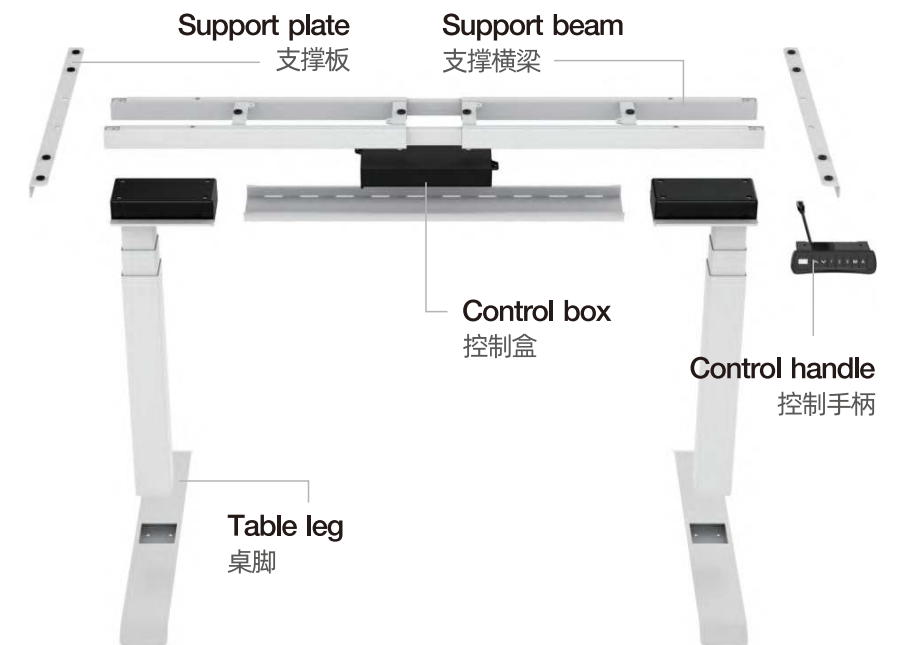

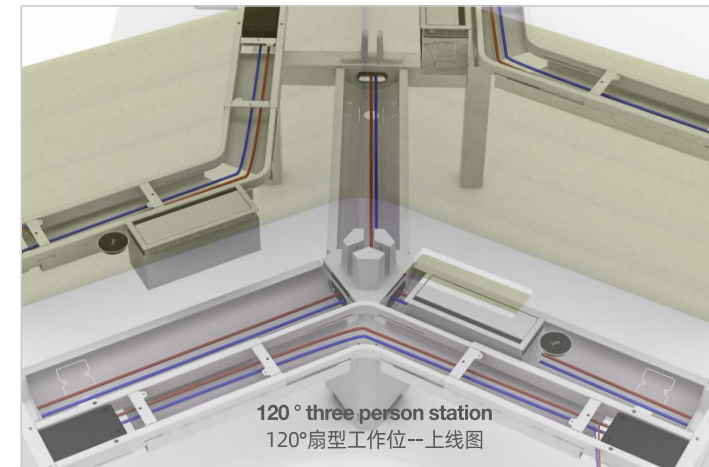

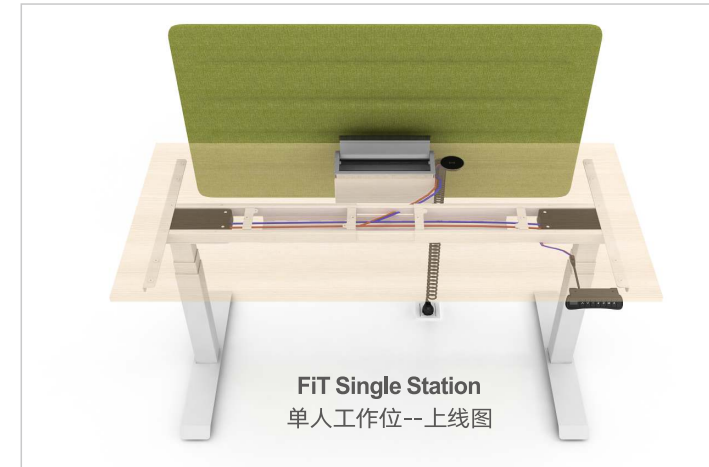

遇阻回退 安全保护系统

When the lower part of the lifting table encounters obstacles, it can realize the upward and backward function of the lifting table.

升降桌下方遇到障碍物时，遇阻回退功能，实现升降桌的向上回退。

When the upper part of the lifting table encounters obstacles, the backward function can realize the downward backward of the lifting table.

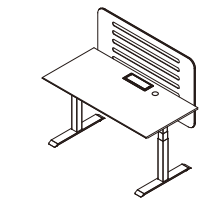

升降桌上方遇到障碍物时，遇阻回退功能实现升降桌的向下回退。
