New early entry program

2021 Swinburne University Early Entry Program

Swinburne has just announced a new early entry program for the 2021 intake! Offers will be made on a recommendation from your school and will be 'ATAR free'.

You will still need to complete year 12 and meet subject prerequisites, but in the words of Swinburne, *'this isn't an easy way out, it's a determined person's way forward'*.

How do I apply?

Step 1: check that your course is eligible and that you meet the subject prerequisites.

Step 2: ask your school to fill out the recommendation form. Your school will make an assessment based on your past results and capacity for tertiary study.

Step 3: In August / September, add your course/s to your VTAC preference list. Your career adviser will talk to you about the order of courses on your list.

If your school agrees to recommend you and if you achieve a minimum English study score of 20, meet other subject prerequisites and complete year 12, you will receive a guaranteed offer.

For a list of eligible courses, to download the recommendation form and to register your interest, go to <https://bit.ly/2UMKGtT>

Changes to the cost of university courses - 2021

From 2021, the cost of some university courses will change.

Currently, the Government provides funding to universities for courses at different levels according to the study areas.

Essentially, the Government funds part of your degree, and you pay the rest - this is called the 'student contribution amount'.

There are currently 3 levels of student contribution bands. You can see these at <https://bit.ly/30WWc9K>

The great thing about the student contribution bands is that it will cost the same for your units of study no matter where you go to university in Australia.

From 2021, student contribution bands for certain study areas will either increase, decrease or stay the same.

What does this mean for me?

How this will impact you will depend on what you study in 2021. For example:

Courses in nursing, teaching, languages, agriculture and maths will significantly decrease

Courses in science, health, architecture, environmental science, IT and engineering etc., will decrease.

Courses in medicine, dental and veterinary science etc., won't change.

Courses in law and commerce will increase.

Courses in humanities and social sciences will significantly increase by around 113%

Bookmark the Study Assist website and check regularly for updates to university fees and HECS-HELP and FEE-HELP information, www.studyassist.gov.au/

Passionate about the environment?

The University of Newcastle will launch the Bachelor of Climate Science and Adaptation in 2021.

Warming global temperatures are impacting our lives like never before. This new course will turn your passion into practice and provide you with tools to tackle climate challenges.

You will learn to identify and assess the impacts of climate change, develop goals and actions to minimise the risk of these impacts, and establish a process to implement a climate change adaptation plan, www.newcastle.edu.au

University of Tasmania

Schools Recommendation Program

Students who would like to apply for courses at the University of Tasmania have the option of applying for their Schools Recommendation Program.

Applications close on Friday 10 July, <https://bit.ly/2yrYQbO>

Prospective students can watch a webinar about the program at <https://bit.ly/3euoCMn>

Cyber Security at Victoria University (VU)

In 2019, cybercrime cost the Australian economy \$1 billion (Australian Criminal Intelligence Commission).

This year, rates of cybercrime are even higher, as cybercriminals exploit the IT changes created by the COVID-19 pandemic, in particular the security vulnerabilities created by people working from home. Businesses are looking to dramatically increase their spending on cyber security, during the pandemic and beyond.

VU is training professionals to meet this demand through the following two courses:

- Bachelor of Information Technology - high-achieving students are eligible to receive a 12-month paid IT internship, <https://bit.ly/2B2NBI3>
- Certificate IV in Cyber Security, VU Polytechnic, <https://bit.ly/2V6hSg0>

Focus on Agriculture

Agriculture isn't just farming- It is focused on "the entire food chain, managing the environment and minimising the impact of human endeavours on natural resources".

About 50% of all jobs in the agriculture industry are in capital cities.

These jobs include environmental management, research, development, agribusiness and education.

Most people in agriculture work full time.

The demand for agricultural science graduates grew strongly over the past 5 years and around 5000 job openings will be available by 2024, <https://bit.ly/2HZWFel>

There is also an ongoing demand for agricultural science graduates with economics and management training.

Experts are needed in the areas of:

- Sustainable farming practices
- Land management
- Land conservation
- Climate change practices
- Food security
- Agricultural research and policymaking.

Students can specialise in areas such as:

- Economics
- Marketing
- Animal and plant biotechnology
- Catchment management
- Climate change impacts
- Crop management and production
- Plant and soil science
- Nutrition and feed production
- Sustainable production and consumption
- Water management

Technology is advancing rapidly in agriculture and students are advised to study maths, sciences and business at school.

Students who don't want to work 'on the land' have many opportunities to work in cities and in offices.

Courses

The following are examples of agriculture schools

VICTORIA

- La Trobe University: <http://bit.ly/1FGtcP0>
- University of Melbourne, <http://bit.ly/1BWdaib>
- Longerenong College, <http://bit.ly/2sGcMcT>
- Marcus Oldham, <http://bit.ly/1wEGiuc>

NEW SOUTH WALES

- Charles Sturt University, <http://bit.ly/1MkDAj6>
- University of New England, <http://bit.ly/1KSOtZc>

TASMANIA

- University of Tasmania, <https://bit.ly/2Nnk0vE>

Health Information Management

Interested in health, IT and business? You may enjoy a career in health information management. According to La Trobe University, "there is a national workforce shortage in this industry, which means graduates are in high demand. Salaries range from \$50 000 - \$180 000 at senior level".

You can study health information management at both the undergraduate and the graduate level at La Trobe University, Melbourne, <http://bit.ly/1Uvhddl>

Upcoming virtual events

Ernst and Young (EY) - Ready to Launch

Join EY for an interactive webinar where you can learn about the work of a global professional services organisation and why it's so important to understand the diverse and global world that we live in. We'll share our views on why your mindset, not just your skills set, is important, and what you can be doing to prepare for your future.

You'll hear from a range of EY professionals, including some current and recent graduates who will answer your questions on the transition to university, the workforce and, specifically starting their career journey at EY.

Thursday 9 July, <https://bit.ly/3erXLk9>

Upcoming virtual events

Discover Deakin Seminars

Deakin University is running the following online information sessions for prospective students:

June

25	Environment
----	-------------

July

4	Teaching
---	----------

15	Medical Imaging
20	Occupational Therapy
21	Public Health & Health Promotion
22	Optometry
23	Nursing and Midwifery
27	Exercise and Sport Science
28	Nutrition Sciences
29	Psychology
30	Health Sciences

Information and RSVP - <https://bit.ly/2YIZXi5>

Monash University – Online Information Seminars

Monash is hosting online information evenings for prospective students and their families on the following dates in August: 11, 12, 25.

Register via <https://bit.ly/39GmmOQ>
