HIGHLINE  
URBAN ELEGANCE

## WHY CHOOSE AN ENTRANCE<sup>®</sup> COMPOSITE DOOR?

**Low Maintenance** - Impact resistant GRP skins, hand painted for a perfect finish with our paint system which boasts a 10 year surface guarantee. Each Entrance<sup>®</sup> composite door is supplied with a Care Card on how to look after your door to last you for years to come.

**Unique to You** - With a choice of 6 door colour combinations, 12 frame colours, 6 glass designs and multiple handle options, the Highline collection is unique to you with over 1000 combinations.

**All in the Detail** - From our triple-glazed glass designs to our door handles and furniture, Entrance<sup>®</sup> carefully pick the finest range of products to compliment our doors. To keep to the industrial trend of the Highline door and glass designs, we have selected our new Brooklyn lever on rose handles to enhance the aesthetics of the door.

**Superior Security** - Our doors have been tested to and passed the rigours of PAS 24 security

testing. Each door is supplied with a Winkhaus lock independently approved by the 'Secured by Design' policing initiative known for their knowledge in quality and security, paired with the Brisant Ultion 3 Star security cylinder with a £2,000 Guarantee to the homeowner against burglar attacks (see page 14).

**Structural Strength** - The internal frame of the door is manufactured from laminated timber which prevents any twisting and warping, giving you the benefits of a Composite but look of a Timber door, resulting in a 10 year structural guarantee.

**Thermal Efficiency** - With a high-density, foam insulated core, our composite doors have been proven to be 19% more thermally efficient than 48mm solid timber core composite doors, and 17% more than your traditional timber door. Our doors help keep the heat locked inside your home by preventing heat escaping through your door, therefore decreasing the energy loss and costs!

Door Builder

# SIX LITE

Our SixLite design is truly reminiscent of the iconic mid-century steel window designs and is our most requested style.

With the Fluted glass option, the SixLite is a truly stunning Art Deco design available in a wide range of glazing configurations to suit entrance doors, back doors or even double French doors.

# TRILITE

The TriLite design is a minimalist Heritage design with the slimline parallel bars that create a more modern, lighter version of the iconic steel door designs.

Additional detail can be added with our range of glass options and the Kensington etch option has proven to be our most popular.

# FOUR LITE

The slimline horizontal bars of the 4 Lite design allow for a more simple Heritage look and has proven popular as a porch door option when combined with our clear glass option.

The design is available as a double door set or with either a composite or glazed sidelite for larger entrances.

# NINE GRID

The NineGrid option is designed to work with a 3-quarter glazed composite door and is a cross-over between the 1930s heritage look and more traditional Georgian style.

With the option of matching sidelites or a double door option the 9 grid can either make a statement entranceway or a more traditional French door set.

## SECURITY & HARDWARE

Every Entrance® composite door is supplied with high security multipoint locking from market leading German manufacturer, Winkhaus. Paired with the Brisant Ultion 3 Star cylinder with a £2000 guarantee from burglar break-ins via the cylinder, an Entrance® composite door offers the complete package on security.

As 'Standard' we offer the Winkhaus Trulock, which offers the popular lift-lever operation to deadlock your door, also available is the new generation of lock the Winkhaus AV4 which gives you the automated locking system that

can secure on door closure, with the new feature of the day latch allow the door to be pushed open for easier access during the day.

## SECURITY AS STANDARD

Our handle operated Trulock features two compressing security hooks combined with a central deadbolt, providing high levels of both security and weather performance.

We offer an extensive range of door handles, including the 'Sweet' range featured in this brochure, with complementary door furniture including knockers and letterplates\*

More handles available online at [www.entranceway.co.uk](http://www.entranceway.co.uk)

\*Please note - not all door designs offer the possibility of a letterplate

## AV4 AUTOLOCK

Introducing the new AV4 alongside our new Brooklyn lever on rose handles, perfectly complementing the industrial look of the exciting new Highline door designs. The knurled, ridged handles are available in Satin PVD Brass, Matt Black and Satin Stainless Steel.

We also offer a large range of bar handle options in high performance Grade 316 Stainless Steel and PVD Black. Visit us online at [www.entranceway.co.uk](http://www.entranceway.co.uk) for more options and information

Using a magnetic trigger system the AV4 multi-point locking system automatically deploys its security hooks when you pull the door closed, taking away the need to lift a handle or turn a key to lock your door. The optional innovative Day Latch feature offers instant access when needed over a short period of time by blocking the magnet allowing the door to be easily pushed open, all by flicking a simple switch!

A derivative of the market leading AV2, the AV4 has is an evolution of its predecessor and now offers 40% lower opening tolerances along with the widest installation tolerances, reducing the need for keep adjustment throughout the life of your door.
