

# CURE IT ROOFING MATERIALS

See the ready reckoner on the back for material estimation.

**Roofing Resin:** Available in 10kg (6.75m<sup>2</sup> coverage) and 20kg (13.5 m<sup>2</sup> coverage) containers - Used to form the GRP laminate with the reinforcement mat.

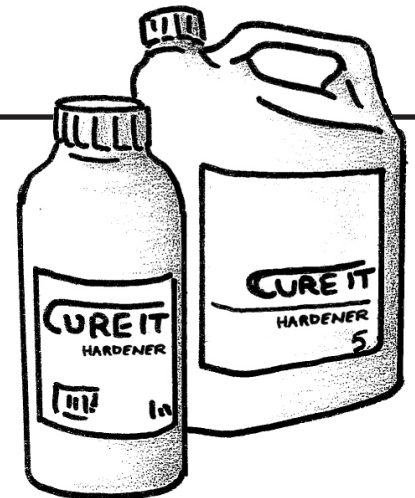

READ THE HANDLING AND STORAGE INSTRUCTIONS BEFORE USING THESE PRODUCTS.

**Roofing Topcoat:** Available in 5kg (12.5m<sup>2</sup> coverage), 10kg (25m<sup>2</sup> coverage) and 20kg (50m<sup>2</sup> coverage) containers - Topcoat provides the finished colour and surface appearance.

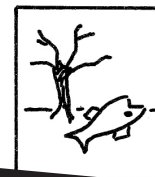

**Acetone:** Available in 1L containers - Used for cleaning tools, spillages and as a surface decontaminant.

**Hardener:** Hardener for resin and topcoat. Supplied in 1L and 5L containers

**IMPORTANT:** Read handling and storage instructions before use!

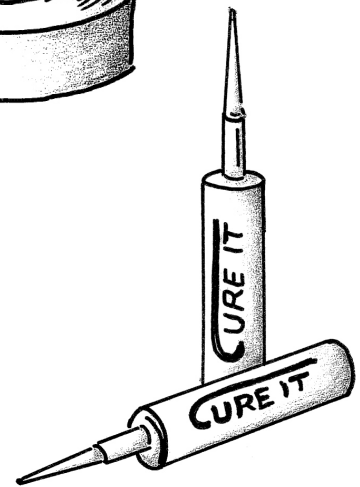

ALL OF THESE MATERIALS ARE ALSO AVAILABLE IN A 12M<sup>2</sup> KIT (EXC. TRIM AND BOARDS).

**Reinforcement mat:** Used with the resin to form the laminate. Available in 33kg (66m<sup>2</sup> coverage), 16.5kg (32m<sup>2</sup> coverage), 6.6kg (13m<sup>2</sup> coverage) rolls. (Heavy duty mat also available for walkways and balconies).

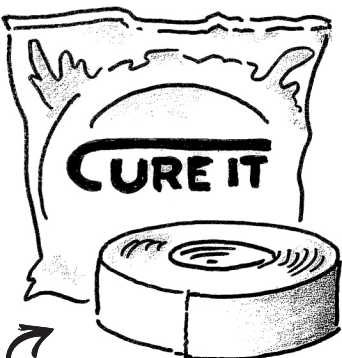

**Detail Tissue:** For finishing corner and joint detail.

**Trim Adhesive:** Used for bonding GRP edge trims around the perimeter of the roof.

**Treated Slate Battens:** Used to support edge trims, allow 2M for every M of drip trim and 1M for every M of raised edge trim.

**Detail bandage:** Used as reinforcement for forming corners and other detail on the roof.

**OSB3 18mm T & G boards:** Recommended decking for the Cure It system.

**Edge trims:** Used around the perimeter of the roof and for any significant changes in pitch.
