WASTE EQUIPMENT INTERNATIONAL

Forklift Tipping Bins

The Papas Tipper bin is designed to transport material from one location to another for emptying of general waste, recyclables, scrap metal, machining swarf, sawdust, timber offcuts, glass and any other material both wet and dry. Once the container has been secured to the forklift by the safety chain, the driver is not required to leave the seat during the transportation or emptying operation.

Tipping Bins can also be manufactured to transport and tip up to 6 x 240 litre mobile garbage bins at one time

The tipper bin operates by attaching the front lip over the side of the bin or hopper, reversing forklift to activate slide system, raise fork tynes and drive forward to tip contents. Reverse action and return tipper bin for refilling.

Model number	Capacity	A	B	C	D	E	F
PTB – 10	1.0m3	1200	1000	900	1000	1025	355
PTB - 125	1.25m3	1200	1250	900	1000	1025	355
