DESIGN & MANUFACTURE

Where it all began...

Funcional living spaces... done right

ABOUT US.

Established in 1994, IMCO Lumber is one of Texas' few resources of highly specialized lumber materials. We work closely with architects, builders, and cabinet shops to ensure they get the best material on the market so they can produce one-of-a-kind results.

VISION.

Our vision is to satisfy the clients with our products and customer service. Also, we want to promote the care of the environment, using only wood from forests cultivated with the purpose of being used for wood companies.

MISSION.

Our mission is provide the best service to our customers, offer an extensive variety of goods and materials necessary for their needs, continually bringing new products with the best quality.

Nanox Clean®

MDF ANTI COVID19

Scan to know more

More protection for you and your family.

All decorative lines count on the exclusive application of Nanox Clean®, a product that guarantees antimicrobial protection, naturally and specifically against germs, bacteria, and other microorganisms.

Its antimicrobial action turns surfaces permanently free from invisible everyday threats including Covid-19.

Titus+

T-type Concealed Hinge

Titus+

Tekform Drawer

Cabinet Hardware Solutions

Titus' concealed hinge with integrated soft-closing is the perfect solution for high-end cabinets. It provides a lifetime of consistent performance for a lifetime of consumer satisfaction. Its intuitive, tool-free mounting system saves valuable time in cabinet assembly.

Titus' Drawer Systems are also a perfect solution for the high end kitchen and bathroom furniture. Its 14mm sides create a sleek look and ensure an efficient utilisation of the drawer space.

Sketching and Digitization.

Our main store has industrial machines for panel cutting and edge band placement. Which allows us to offer you panel pieces of the sizes that your project requires.

Once you have the explosion drawing generated, we will review it with your team so that, through our software, we optimize the largest amount of material, in the fewest possible cuts. Generating an efficient, functional and complete process.
