Test

Test Name: 8271 Juvenile Laryngeal Paralysis & Polyneuropathy (JLPP)

Result

Genotype: N / N (Clear)

Interpretation:

The examined animal is homozygous for the wild-type allele.

It does not carry the JLPP's causative mutation in the RAB3GAP1-gene.

Trait of inheritance: autosomal-recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the Black Russian Terrier and for the Rottweiler breeds.

The current result is only valid for the sample submitted to our laboratory.
