

Bedrock™ Brome

A superior new Smooth Brome variety

Bromus inermis

Developed over the last 5 years, borrowing parentage from the old standby Manchar, with keen attention to selection for desirable traits. Bedrock™ Smooth Brome germplasm has been specifically bred for supreme palatability, reduced aggressiveness of rhizomatous growth, and high biomass production. Bedrock™ Brome is a great companion for other grasses and legumes. Contact Clearwater Seed for more information: **(509)-343-3108**.
