# SELECTING A NEW DOOR

## WARRANTY

Limited Lifetime on Door, Hardware.  
4 Year on Springs.  
Our Quality Assurance,  
Your Piece of Mind.  
(See Warranty Page For Details)  
[www.uniquegaragedoor.com](http://www.uniquegaragedoor.com)

## STEP 1

### CONSTRUCTION

When choosing a new door, you have three options on the construction of your door. First, there is our standard 2" 24 ga non-insulated door, referred to as a Pan Door. Second, is our 2" thick Super Poly Insulated Door which includes a single layer of steel plus a rigid polystyrene core with 1/4" thick Super Poly Back Skin. Strong enough to walk on and is exclusively from Unique. No other company offers it. Your third choice is our 2" thick Insulated Sandwich Steelback. Unique's Steelbacks are strong with a rigid polystyrene insulated core with a steel woodgrain textured back skin.

***Unique's Pan Door is strong,  
our Polyback is stronger  
and our Steelback is the strongest!  
Three good reasons to choose Unique.***

### ***Pan Door***

## **1-GOOD**

### ***Polyback***

## **2-BETTER**

### ***Steelback***

## **3-BEST**

# STANDARD 2" THICK NON-INSULATED

**GOOD**

**PAN DOOR**

**YOU CAN NEVER GO WRONG  
WITH QUIET AND STRONG!**

Standard 2", non-insulated, single layer pan door. Our exclusive Raised Shadow Line provides extra strength and prevents oil canning! (Oil Canning is waves and dips that pop and ping on the face of your door) No other manufacturer offers the extra strength in a single layer pan door. Other companies may use 25 or 26 gauge steel for their pan doors, we use **ONLY** thicker 24

gauge steel on our single layer pan doors. Why you ask? So that you get the strongest and best there is to offer and not a bait and switch to a weaker or thinner builders budget model. When you buy Unique, you can be sure of what you are getting. In addition to using 24 gauge steel, Unique also uses heavy 18 gauge frame stiles for support. Unique uses a 1 MIL thick, heavy paint coat on the inside and out compared to other companies that only use 1/2 MIL or primer on the insides of their doors. Unique prides itself on quality doors that will last, that is why Unique uses hot dipped galvanized steel with two coats of baked on polyester.

# 2" THICK POLY-BOARD, POLY-BACK INSULATED

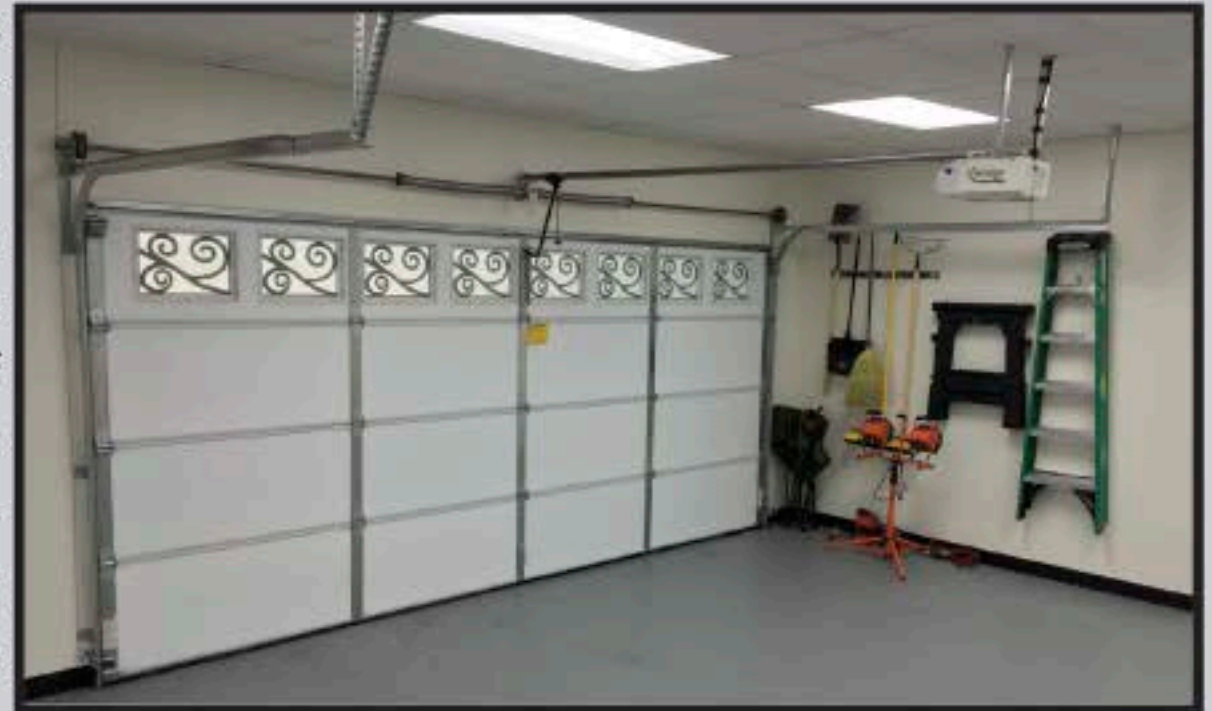

**BETTER**

**POLY BACK**  
R-VALUE 8

**DO NOT BUY A SQUEAK!  
BUY ONLY UNIQUE!**

Unique has the strongest quietest and toughest poly back insulated door in the industry! Our patent pending Super Poly Back us a 2" thick 24 ga insulated model that features a Unique 1/4" thick poly back skin that is so strong you can walk on it! Others use thin vinyl plastic that rips and punctures easily. They even turn yellow after a few years and peel off and ripple. We are the only manufacturer to make our super poly back insulated models with full sheets of polystyrene for second to none strength. Full 8 to 18 foot long solid one piece sheets of safe CFC free polystyrene is bonded to the steel with a patent pending urethane

squeak free bonding process which is done right here in our factory! Other door companies manufacture and sub standard distributors use standard all ready made pan doors and pop in thin vinyl skin polystyrene foam. They pop in 4 pieces per section totaling 16 pieces of foam in each double car sized door. This causes the doors to squeak from the insulation moving around because it does not get bonded together with the door. This adds no strength and squeaks! You are paying for a better door and are not getting one! With Unique, you get a real 24 ga patent pending 2" thick factory made insulated model with the strongest poly in the industry. Not a poor imitation made by others. Before you choose a different brand ask how they build there door first.....Because they might be popping in the foam on the way to your home. Loose fitting and a squeak what will last year after year.

# 2" THICK SANDWICH INSULATED STEELBACK

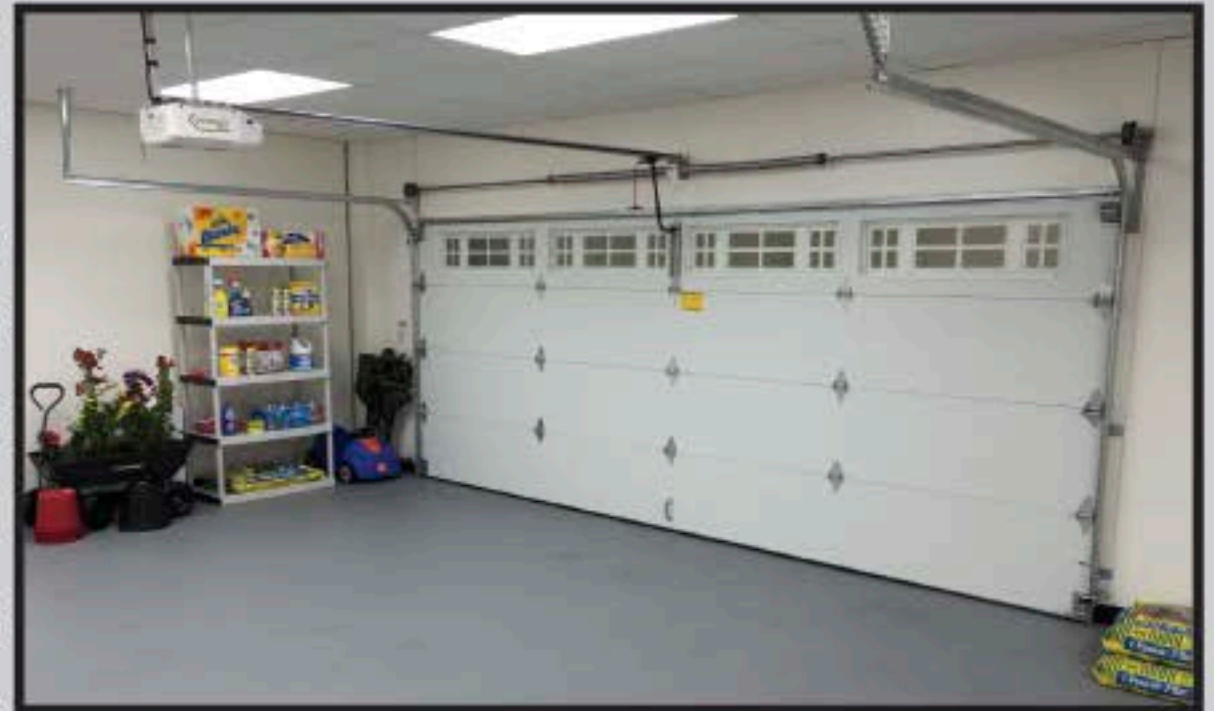

**BEST**

**STEELBACK**

**WITH AN R-VALUE OF 10...  
IT MAKES IT THE BEST!**

Having a Unique Steelback is like having an insulated block wall that rolls up and down every day. They are stronger, quieter, safer, and also offer more security! Our steelbacks have a three layer construction that includes woodgrain steelback with safe, stable, rigid polystyrene insulation. Rigid polystyrene is not going to bubble, delaminate or

become brittle like some of the higher R-value polyurethane doors being offered by other companies. We only use rock solid polystyrene which is tried and time tested. Our Unique process of special density foam and two layers of steel with our pressure-max bonding say it all! Our steelbacks offer rock solid performance because we only use solid sheets of foam unlike other companies that use multiple pieces to insulate. Our steelback is a stronger, more energy efficient and quiet model.

# SELECTING A NEW DOOR

## STEP 2

## DOOR DESIGN CHOICE

All Unique Models come with the World's Quietest Hardware, regardless of Model or Type of Construction. Featuring a top of the line and one of a kind Heavy Duty Quiet System. Others charge more for less. Quiet is standard at Unique and will not cost you a penny more. Plus a Lifetime Warranty for peace of mind.

\*Brushed Aluminum Modern Smooth Shown with Long Panel Window Options

\*Brushed Aluminum Modern Smooth

A one of a kind look and feel.

Smooth- No texture sets this door apart from all the others.  
Clear Anodized finish keeps it looking new year after year.  
Low Maintenance - Just wipe it down with a quality stainless steel type cleaner to keep that new shiny look.

UNIQUE'S Aluminum Modern View Doors are more proportional to most residential homes. Compare them to other manufacturers and you will see. Others use bigger box size aluminum rail frame design. This type of design was mainly used on gas stations and automobile repair garages years ago. They were a heavy commercial type design.

If you are in the market for a more modern friendly residential design, UNIQUE has your door!

# ALL DOORS INCLUDE UPGRADED HARDWARE

## SUPER QUIET HARDWARE

High Quality Fasteners which include flat head track bolts and hardened tek screws

Unique Wide Body Hinge 14 GA. steel with large barrel is bigger and stronger. Plastic hinges do not offer the same strength as steel.

OTHERS

Upgraded Unique Hinges. Others have gaps that create noise. Unique has NO protruding sharp edges like others shown.

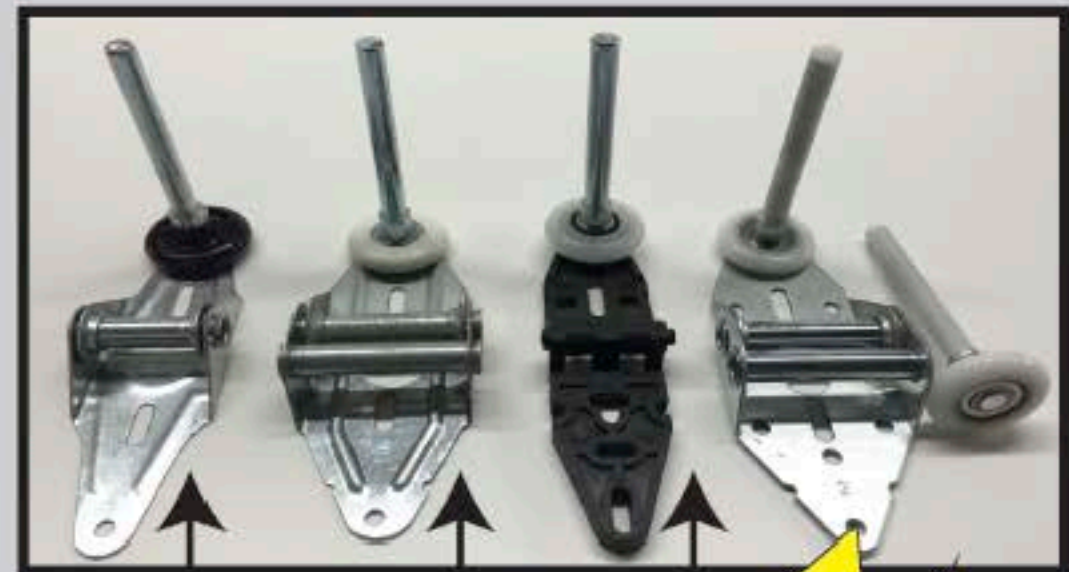

Standard NO Extra Charge Heavy Duty 14GA Steel Quiet Hinges. Sealed Ball Bearing, NO Maintenance Coated Shaft, Super Quiet Rollers.

We want to show you not tell you. When you are finished reading this, please visit our YouTube Page. This way you can hear the difference. It is night and day how much smoother our system is. While others prefer to tell you, we prefer to show you why we are the World's Quietest Garage Door.

Visit our website at [www.uniquegaragedoor.com](http://www.uniquegaragedoor.com) to view our youtube videos

OTHERS

THIN 18 GA BUILDERS TYPE HINGE WITH GAPS THAT MAKE NOISE. NO BEARING. HARD PLASTIC ROLLER AND UNCOATED STEEL SHAFT THAT MAKE IT NOISY.

OTHERS

UPGRADED HINGE WITH GAPS CAUSE NOISE. UNSEALED BALL BEARINGS. UNCOATED STEEL SHAFT THAT MAKE IT NOISY.

OTHERS

SKINNY PLASTIC HINGE LACKS THE STRENGTH OF STEEL. UNCOATED SHAFT MAKE IT NOISY.

14 GA STEEL HINGES WITH NO GAP, NO SLOPPY DESIGN. PLUS SUPER QUIET SEALED NO MAINTENANCE BALL BEARING ROLLERS, COATED STEEL SHAFT FOR SUPER QUIET PERFORMANCE.

# WHY BUY UNIQUE?

## vs. Others

### MADE HERE

MADE IN CALIFORNIA  
MADE IN U.S.A. Factory Fresh Less Handling, Less Damage

### ~~MADE HERE~~

Made Back East/Mid West or import overseas. Bounced around for hundreds or thousands of miles. Transferred and reloaded, prone to damage.

### REPLACEMENT PANELS + LOCATIONS

If you ever need a replacement panel (car backed into door, it does happen) most Unique Panels are in stock or on the floor. If not, it can be made in days or next day emergency service.

### ~~REPLACEMENT PANELS + LOCATIONS~~

May take weeks for replacements to be shipped from Back East/ Mid West. Could be months from overseas.

### THICKER STEEL NON INSULATED DOORS

The thickest steel, most dent resistant 24 ga Heavy Duty Steel Pan Doors (non insulated model) with exclusive raised shadow line for extra strength. No oil canning on face of door. Unique only makes 24 ga Heavy Duty Pan Doors. No Light Duty 26/25 ga Pan Doors. Plus no chance of a bait and switch, someone telling you it's 24 ga and selling you a 26/25 ga thinner model.

### ~~THICKER STEEL NON INSULATED DOORS~~

Thinner steel has oil canning that pings and pops. Very easy for Dealer to bait and switch you without you even knowing. They say it's 24 ga, but slip you a 26 or 25 ga Pan Door. Most never know, until the sections bend or springs need replacing.

### SUPER STRUT

Patented Super Strut comes standard for all double car garages. Gives top section extra strength. One of a kind 2.5" tall Unique Design features a ribbed design for extra strength.

### ~~SUPER STRUT~~

Standard, shorter 2" design has no reinforcing ribs for extra strength. Shorter design height does not provide as much strength as Unique's Super Strut.

### ONE OF A KIND HARDWARE

World's Quietest Garage Doors come with patent pending 14 ga "The Real Deal" Quite Heavy Hinges plus patent pending Super Quiet Rollers with one of a kind coated steel shafts to insure no metal to metal contact.

### ~~ONE OF A KIND HARDWARE~~

Potato chip thin 18 ga hinges or cheap plastic hinges that can break easy. Sloppy with gaps give side to side sloppy movement. Steel roller shafts that make metal to metal contact to create more noise, even on their so called upgraded hardware.

### QUIET HARDWARE STANDARD

All Unique Models come standard with the World's Quietest Hardware. Regardless of being the lowest cost Pan Non Insulated Model or highest cost Premium Steel Back Insulated Model. No up-charges, just the Best in the Industry Standard!

### ~~QUIET HARDWARE STANDARD~~

Others try to upgrade you for an extra cost or inflate the price and tell you it's Free with their Special Sale. What you get are cheap plastic so called quiet hinges that break easy or heavy duty sloppy and noise making upgraded hinges.

## vs. Others

### THE MOST WINDOW DESIGNS

More window insert design choices than any other Garage Door Manufacturer. Over 39 different choices - The Most!

### ~~THE MOST WINDOW DESIGNS~~

Most offer the standard 10 Designs. Not very much selection to choose from. Hard to match your house design with limited selection.

### POLY INSULATED

Super Poly Back Insulated 1/4" thick back skin is so strong you can walk on it! Made with full sheets of foam. More strength, no squeak. Solid bonded construction. This type of design adds strength to the door plus 24 ga construction makes it super strong.

### ~~POLY INSULATED~~

Thin pieces of paper-thin vinyl backed foam, are inserted in a pan (non-insulated) door section. Not bonded, they move around, squeak and give no extra strength to the door. On top of that, it's so easy to poke a hole through the paper-thin vinyl backing. In a year, it turns yellow because it has no UV protection. Heat and light turn it yellow.

### STEEL BACK SANDWICH INSULATED

Steel Back Insulated Models are the strongest in the industry. 24 ga and 25 ga front skin and 25 ga back skin make these the thickest steel back doors in the industry. More dent resistant. Like a rolling steel wall to keep out the elements.

### ~~STEEL BACK SANDWICH INSULATED~~

28, 27, 26 ga thin steel back sandwich doors are the standard offered by most Garage Door Manufacturers. Thinner steel dents very easy and does not provide as much strength.

### ALUMINUM WINDOW FRAMES

Insulated Models with optional windows feature standard SuperTrim™ Aluminum Powder Coated Window Frames. Stronger, non-yellowing, NO twist! NO cracking! Lifetime Design! Upgraded Models, Upgraded Lifetime Parts.

### ~~ALUMINUM WINDOW FRAMES~~

Cheap plastic frames from others can turn yellow, crack and split. Others can not be painted dark colors, even different lighter colors, especially if they get a lot of sun. Some paint chemicals cause plastic frames to twist and distort. Insulated doors should have a stronger frame.

### SMOOTH NO WOODGRAIN TEXTURE MODELS

Smooth, no woodgrain texture. Premium Models available in Flush Design plus Carriage House Design. A modern upgraded custom look found only here.

### ~~SMOOTH NO WOODGRAIN TEXTURE MODELS~~

Others do not offer a rigid smooth option like Unique.

### AUTHENTIC WOOD-LIKE MODELS

Wood-like steel doors have an authentic real wood look. Dark finish color features a clear coat protection that is not found on other manufacturer's standard wood look type models. Longer lasting, real looking finish for year after year, enduring beauty.

### ~~AUTHENTIC WOOD-LIKE MODELS~~

No clear coat offering. Most do not look very authentic. A 2-coat process, not 3, looks more like paint than wood.
