

**Job Title: Junior Full Stack Developer**

Location : Chantilly, VA

Position Number: J-VN7UKP

Grit Government Solutions is looking for a Junior Full Stack Developer (TS/SCI FSP), for its customer at Tysons, VA

**Job Details:**

Grit Government Solutions is seeking a Junior Full Stack Software Developer (TS/SCI FSP), Developer works with the Lead Engineer and fellow team members to design, develop, test, and deliver completed software solutions in an Agile environment. Developers contribute to all levels of the application, including frontend end user interfaces, backend application services, and data layers.

**Responsibilities:**

Include translating functional requirements into technical implementations, developing, and integrating with RESTful APIs, and supporting integrations with other software systems and databases. Developer participates in code reviews, assists with testing and deployment activities, and helps maintain deployed applications. Developer will have experience or exposure to modern JavaScript frameworks, Python or similar backend languages, and related web development technologies. Experience with cloud-based platforms and both relational and non-relational databases is beneficial.

**Required Skills:**

- Front end development with modern JavaScript frameworks
- Backend service development and RESTful APIs
- Relational and non-relational databases
- Experience developing, deploying, and maintaining systems on cloud platforms (AWS, Azure)
- Experience in Agile / Scrum
- Experience building and maintaining web applications using:
- React with TypeScript (or comparable frameworks like Vue or Angular)
- Python (or another modern backend language) for backend services and RESTful APIs development
- SQL and/or NoSQL databases
- AWS services such as Lambda, DynamoDB, RDS, S3
- Infrastructure or deployments using CI/CD pipelines (DevOps)
- 508 compliance/accessibility testing
- Writing or maintaining automated tests
- Working in an Agile or Scrum-based team
