

Job Title: Highway Engineering Associate I

Position Number J-BUJV2W

Grit Government Solutions is looking for a qualified Highway Engineering Associate I to work at our customer's facility located in Orlando, FL.

Civil highway engineering associate position will be part of the infrastructure team, you'll serve an integral role in the firm by compiling data and assisting with permit and report preparation and material testing; completing elementary design calculations and preparing quantity takeoffs and estimates and engineering plans; performing basic design tasks utilizing engineering software and technology; preparing drawings and visual aids; and performing as-needed field reviews and observations of ongoing construction projects to gain increased understanding of construction practices and design applications.

Must Have:

- Have a bachelor's degree in engineering from an accredited program or an equivalent combination of education and experience.
- Be knowledgeable around applicable federal, state and local codes, criteria, regulations, and ordinances.
- Be proficient in production software and construction document production.
- Have a passion for structural engineering and a willingness to grow and learn.
- Possess strong oral and written communication skills and have the ability to effectively interact with and build strong relationships with clients, customers, contractors, team members, and other key stakeholders.
