(54) Title: METHOD TO SCRUB GREENHOUSE GASES FROM THE ATMOSPHERE

WO 2008/115186 A1

(57) Abstract: The present method or invention provides a chemical method which may be employed to change the nature of Carbon Dioxide, Methane, Nitrous Oxide or so called Greenhouse Gases resulting in the formation of salts and water which may be more beneficial to the environment. This method employs Oxidation - Reduction chemistry, primarily Titration to change the nature of these compounds, resulting in their elimination or reduction in the atmosphere thereby decreasing the impact of Global Warming.
