

Spex•Lite® 6724 EPS

Material Properties

- **Particle Composition**
Expanded Polystyrene
- **Bulk Density (loose)**
~0.9 – 1.2 pcf
- **Specific Gravity**
~0.033
- **Size**
~1 – 2.3 mm
- **Made in America**

Spex•Lite® 6724 EPS Lightweight Additive

Spex•Lite® 6724 EPS is a lightweight modified expanded polystyrene bead additive. It mixes with Portland cement / pozzolanic binders to provide air voids and reduce system densities. It's ultra low bulk density is ~80x lighter than sand. It has little to no dust, no silicosis.
