

Artificial Intelligence & SmartBuildings: New Partnership

CONDO PARK

PARKING MANAGEMENT SOFTWARE

Sydwire Technologies Inc. is pleased to announce it has entered into partnership with LocoMobi World Inc. (www.locomobiworld.com) to sell and service the complete line of LocoMobi World products including Condo Park, LocoMobi's cloud-based parking and access control system for condo parking.

CondoPark allows building operators to control all parking activities from one central location.

Using License Plate Recognition (LPR), properties can track all vehicles entering/exiting the property in real time. Permits and guest reservations are registered through an online portal making end user experience seamless—car drives up to the property, LPR system verifies the license plate as the virtual permit and allows or denies the vehicle entry to parking area.

No more keys, fobs, or communicating with someone via an entry phone.

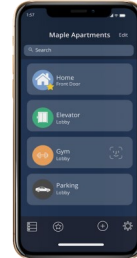

Are you managing multiple properties? Add all properties to your profile in the software to get a clear picture of what is happening with all your properties.
