On-Demand Salt Delivery

No Contracts. No Heavy Lifting.

HYDRO SOLUTIONS

Authorized Dealer For Maytag® Water Products

How Does Salt Delivery Work?

- Check your brine tank—if the salt level is low, simply call or text our team to request a delivery.
- There are no recurring subscriptions, minimums, or contracts required. You only order when your system actually needs salt.
- Deliveries are scheduled on our standard neighborhood routes within 24–48 business hours.

How Much Does Salt Delivery Cost?

- You pay the current market price per 40 lb bag of high-purity water softener salt, plus a variable delivery fee based on your location and bag quantity.
- There are no hidden monthly fees—you only pay for the salt and delivery on the days you order.
- You can pay conveniently by card over the phone, via secure text link, or on-site at the time of delivery (Subject to market price adjustments).

What Is Included With My Delivery?

- Our technician will carry the 40 lb bags directly to your water softener and pour the salt into your brine tank for you.
- We haul away and dispose of all empty salt bags so you have zero mess or heavy lifting left behind.
- While your tank is open, our technician will perform a quick visual check of your brine water level and system display to make sure everything is running properly.
