### STINGER 70100

## **Boom Truck Crane**

# 

### **FEATURES**

- 70,000 lb (31 752 kg) maximum lifting capacity
- ▶ 110' (33.53 m) maximum sheave height
- ▶ 163' (49.68 m) maximum sheave height with 30.5-55' (9.30-16.76 m) jib
- 30.5-100' (9.30-30.48 m) four-section full power fully synchronized boom
- Exclusive color coded boom and load charts
- Easy-to-install optional 30.5' (9.30 m) one stage or 30.5-55' (9.30-16.76 m) two stage telescoping jib, man baskets or work platform increase job capacities

- Electronic Load Moment Indicator and anti-two-block device standard with internal cable
- Externally located planetary rotation drive for easy accessibility for maintenance
- 2-speed planetary winch has 12,900 lb (5 851 kg) maximum permissible 1 part line, 45,400 lb (20 593 kg) breaking strength, 196 ft/min (60 m/min) maximum line speed
- Dual control station with direct mechanically controlled hydraulic system
- ▶ 90 gal (342 L) capacity hydraulic tank

### RANGE DIAGRAM (30.5 - 100 FT BOOM)

### **GENERAL NOTES**

- 1. The operator must read and understand the Owner's Manual before operating this crane.
- Positioning or operation of crane beyond areas shown on this chart is not intended or approved except where specified in Owner's Manual.
- Loaded boom angles at specified boom lengths give only an approximation of the operating radius. The boom angle before loading should be greater to account for deflections. Do not exceed the operating radius for rated loads.
- 4. Use rating of next longer boom for boom lengths not shown. Use rating of next greater radius for load radii not shown.
- Boom must be fully retracted when jib is erected before lowering below minimum angle. Retracted jib has no lifting capacity below a 50° boom angle.
- 6. Use rating of next lower boom angle for boom angles not shown on jib load rating chart.
- 7. Lifting off the main boom point while the swing around jib is erected is not intended or approved.
- 8. Do not lower boom into this area, as hydraulic pressure will not allow raising the boom without retracting boom first.
- Crane load ratings on outriggers are based on freely suspended loads with the machine leveled and standing on a firm
  uniform supporting surface. No attempt shall be made to move a load horizontally on the ground in any direction.
   Practical working loads depend on supporting surface, wind and other factors affecting stability such as hazardous
- surroundings, experience of personnel, and proper handling, must all be taken into account by the operator.
- 11. The maximum load which may be telescoped is limited by hydraulic pressure, boom angle, and boom lubrication. It is safe to attempt to telescope any load within the limits of the load rating chart.

### INFORMATION

- Deductions must be made from rated loads for stowed jib, optional attachments, hooks and loadblocks (see deduction chart). Weights of slings and other load handling devices shall be considered a part of the load.
- chart). Weights of slings and other load handling devices shall be considered a part of the load.2. Crane load ratings with outriggers are based on outriggers and stabilizers extended and set with all load removed from the carrier wheels.
- 3. Load ratings do not exceed 85% of tipping load.

### DEFINITIONS

- Operating radius is the horizontal distance from the axis of rotation to the center of the vertical hoist line or load hook with load suspended.
- Loaded boom angle as shown in the Load Ratings Chart is the included angle between the horizontal and longitudinal axes of the boom base after lifting rated load at rated radius.

### BT MODEL

### **SPECIFICATIONS**

### **BOOM**

30.5-100' (9.30-30.48 m) four-section full power fully synchronized boom. Patented keel boom design utilizes a keel shaped base plate combined with a deep, four plate boom section to optimize strength / rigidity-to-height ratio. Exclusive, patented color-coded boom and load charts allow the operator to easily determine boom extension, boom angle and load capacity. Maximum tip height with four-section 30.5-100' (9.30-30.48 m) boom is 110' (33.53 m). Maximum tip height with optional two-stage 30.5-55' (9.30-16.76 m) jib is 163' (49.68 m).

### **WINCH**

 Hydraulic winch with gear motor and planetary reduction gearing provides 2-speed operation. First layer rope pull is 15,000 lb (6 804 kg). Wire rope size is 5/8" (16 mm) with 45,400 lb (20 593 kg) breaking strength.

### **OPERATING SPEEDS**

 Mainframe / turret assembly planetary gear rotation provides 180° rotation (370° with optional front bumper outrigger). Swing rotation is 75 seconds. Boom up/down is 60/41 seconds and boom extend/retract is 108/50 seconds.

### **HYDRAULICS**

Three-section pump allows the operator to perform simultaneous crane operations (winch, boom and swing). Capacities are 32, 17 and 8 gpm (122, 64 and 30 L/m). Hydraulic tank capacity is 90 gal (342 L).

### **CONTROLS**

Fully proportional, excellent metering characteristics for precise boom movements. Independent outrigger controls allow the crane to be stable and level in rigorous working conditions. Load Moment Indication System has audio alarm and functional shut down when operator encounters an overload situation.

### **OUTRIGGERS**

- Front outriggers are Out & Down. The maximum width over main outrigger pads is 25' 6" (7.78 m).
- Rear outriggers are Out & Down. The maximum width over auxiliary outrigger pads is 17' 6" (5.33 m).

### **SUBFRAME**

 Single fabricated, closed-box style subframe yields greater strength and rigidity. Wheelbase for standard truck crane mounting configuration is 261" (6.62 m).

### **OPTIONS AND ACCESSORIES**

- Single and two-stage jibs
- Multi-part load blocks
- Main winch with 2 speed motor
- Auxiliary winch
- Rotation-resistant load line
- Heavy duty wood flatbeds
- Extra heavy duty wood flatbeds
- ▶ Extra heavy duty steel flatbeds
- Radio remote controls
- One-man or two-man baskets

- ▶ Self-leveling work platform
- Winch drum tensioner
- Continuous rotation
- ▶ Oil cooler
- ▶ Single front bumper outrigger (required for 370° or continuous rotation)
- Hydraulic hose reel
- Hydraulic auxiliary tool circuit
- ▶ Tool box
