

# KATTDOCK™ Ladder Access Landing Platform

The aluminum **KATTDOCK™ Ladder Access Landing Platform** is designed to provide a secure attachment point for portable ladders when accessing a roof. The landing platform with gate allows the user to create a safe distance between themselves and the leading edge. With the support bracket and landing platform fastened to the roof, there is then a clear, secure, designated roof access area.

## FEATURES

- Simple installation using standard fixings
- Prevents sideway movement and ladder base slip
- Ladder support bracket - High strength stainless steel construction
- Ladder access landing platform - High strength aluminum construction
- PVC, TPO and EPDM rooftop mount options available
- OSHA compliant
- Attachment point approved by all major membrane manufacturers
