

<b>ADULT &amp; CHILD CHOKING</b> (Conscious) 1 Year Old +	How to Check	Corrective Actions
<b>1. Identify Yourself</b>	Ask if he/she is choking. If they cannot speak... 	Call 911 or other local emergency number. Get behind the person, cup your fist, place it over their navel and give them 5 thrusts, in a scooping motion (Heimlich Maneuver). Continue until the object comes out or he/she becomes unconscious.

<b>ADULT &amp; CHILD CHOKING</b> (Unconscious) 1 Year Old +	How to Check	Corrective Actions
<b>1. Check Responsiveness</b>	<b>SCENE SAFETY!</b> Shake and tap the person. If he/she does not respond...	Call 911 or other local emergency number.
<b>2. Check Breathing</b> 	Open the Airway (Head Tilt/Chin Lift). Look, listen and feel for breaths. If he/she is not breathing...	Attempt 2 breaths. If they do not go in, re-adjust the head and try again. If they do not go in proceed to step 3.
<b>3. Clearing The Airway</b>	Check for an object in the patient's mouth. 	Perform 30 chest compressions. Compress the chest 1 ½ - 2 inches ( <b>adult</b> ), 1 – 1 ½ inches ( <b>child</b> ). Check the mouth for an object and attempt 2 breaths. Continue this step until the patient begins to breathe on their own. <b>Do not use an AED on the patient until the airway is clear and he/she is still not breathing.</b>

Continue these steps until help arrives or the patient begins to breathe on their own.
