

Saving Your Pet With CPR

If there is no breathing and no pulse, begin CPR immediately.

1 Check for breathing & pulse
Check for pulse using middle and index finger below wrist, inner thigh, below the ankle or where left elbow touches the chest.

2 Look for other warning signs
• Gums and lips will appear gray
• Pupils will be dilated

3 If no pulse, start compressions
Lay animal on right side and place hands over ribs where its elbow touches the chest. Begin compressions. **Do not give compressions if dog has a pulse.**

4 If not breathing, give mouth-to-mouth
Cats & small dogs: place your mouth over nose and mouth, blow air in.
Medium-large dogs: place your mouth over nose, blow air in.

Repeat Procedure

- Check pulse after 1 minute and then every few minutes
- Continue giving CPR until animal has a pulse or is breathing
- Stop CPR after 20 minutes
