Tibesti Government in Exile – Statement on the Fifth Anniversary Press Release N/01/2025, Saturday, August 9, 2025

On September 14, 2020, we proclaimed the restoration of our state on the ancestral lands of the Tibesti Massif, respecting the territories of Libya, Niger, and Sudan, in full accordance with the UN Charter and the principle of self-determination. We formally notified the UN in September 2020 and August 2021, requesting missions to witness the reality on the ground.

The Ndjamenan regime and an ethnic militia run by drug traffickers is destroying Tibesti's environment. In recent years, the Ndjamenan authorities, supported by certain foreign interests, have engaged in harmful (Gold and REE), extraction practices in Tibesti, including the use of chemical agents, causing severe and lasting damage to the environment and the fragile ecosystem of our mountains. In response, in October 2018, we established a local governance system (Wogoda) with the dual purpose of environmental protection and community security, responsible for security management, have been appointed to monitor movement into and out of Tibesti in order to protect our land and culture.

This criminal regime survives only through the direct backing of France. French nationals control Chad's security services, advise the militia leader, manage his assets, and dominate the political police. Since 1990, Chad has been a false state administered from France, while aiming to eradicate our people, the drug-trafficking regime of Ndjamenan, aided by its European allies, seeks to exterminate our people and seize Tibesti.
