

Press Release Misdirection EP

Rising California DJ and artist SN-1 launches his debut creative EP in 2022, further showcasing his devotion to and talent for embracing the music world from every angle.

Six original tracks make up the hard-hitting new project 'MISDIRECTION', an immersive and memorable debut from a DJ and producer already making waves on the live scene.

From classic rhythms to contemporary and industrial layers of chaotic and mighty escapism, the EP highlights a deeply passionate and skillful creative, with both professionalism and unwavering enjoyment at the forefront of his work.

Beginning with the high-octane pace and intensity of 'RUST', on through the distorted complexities and artistry of a conceptually provocative 'INFECTED', with a handful of unforgettably rhythmic and melodically hypnotic anthems like 'GODZILA' and 'DAY WALKER' appearing along the way, 'MISDIRECTION' proves every bit as unpredictable, original, and freely expressive as its title implies.

Committed to the cause and backed by years of experience on the decks, SN-1's unique journey has seen him share stages with some of our generation's biggest acts. With noteworthy collaborations already reaching vast numbers of monthly listeners, the new solo project is set to help further secure his role as one of electronic music's most refreshing and consistently impressive names.
