CHARUSAT
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

# ACADEMIC REGULATIONS & SYLLABUS

## Faculty of Technology & Engineering

## Bachelor of Technology Programme
## (Fourth Year Civil Engineering)

Effective From 2019-20

## Vision

"To provide state of the art education in Civil Engineering guided by innovative research leading to centre of excellence in Civil Engineering education having recognition at national and international levels"

## Mission

"Being a pioneering branch of Engineering, the department of Civil Engineering under the shelter of CHARUSAT is intended as a facilitator for creating a liaison between the brilliant student community and the next generation industrial needs"

## Programme Educational Objectives (PEO's):

**PEO 1:** The graduate will possess foundation of engineering knowledge and exhibiting critical thinking and problem solving skills

**PEO 2:** The graduates will have trait of lifelong learning and be able to inculcate the capabilities to meet the diversified needs of industry, academia and research.

**PEO 3:** The graduate will exhibit the professional ethics and be supportive to the social needs

**PEO 4:** The graduates will possess comprehending, analyzing and designing capabilities to generate sustainable solutions

## Programme Outcomes (PO's)

Engineering Graduates will be able to:

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project Management and Finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## Programme Specific Outcomes (PSO's):

By the completion of Civil Engineering program, the student will attain:

**PSO 1:** The ability to serve the infrastructure sector with capabilities to plan, design, analyze and building civil engineering-based systems

**PSO 2:** The ability to adopt to the state-of-the-art practices in all sectors of Civil Engineering.

**PSO 3:** Employability skills with the cognizance of social and environmental necessity along with ethical responsibility to have a successful career and to become an entrepreneur.

# CHARUSAT welcomes you for a Bright Future

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
Accredited with Grade A by NAAC,
Accredited with Grade A by KCG

Faculty of Technology and Engineering

**Academic Year – 2019-20**

# CHARUSAT

## FACULTY OF TECHNOLOGY AND ENGINEERING
## ACADEMIC REGULATIONS
## Bachelor of Technology Programmes

To ensure uniform system of education, duration of undergraduate and post graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

### *1. System of Education*

The Semester system of education should be followed across the Charotar University of Science and Technology (CHARUSAT) both at Undergraduate and Master's levels. Each semester will be at least of 90 working days duration. Every enrolled student will be required to take a specified load of course work in the chosen subject of specialization and also complete a project/dissertation if any.

### 2. *Duration of Programme*

| | |
|---|---|
| Undergraduate programme | (B. Tech.) |
| Minimum | 8 semesters (4 academic years) |
| Maximum | 12 semesters (6 academic years) |

### *3. Eligibility for Admissions*

As enacted by Govt. of Gujarat from time to time.

### 4. *Mode of Admissions*

As enacted by Govt. of Gujarat from time to time.

### 5. *Programme Structure and Credits*

***As per Annexure – I attached***

## *6. Attendance*

All activities prescribed under these regulations and enlisted by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student regarding attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Principal.

Student's attendance in a course should be 80%.

## *7. Course Evaluation*

### *7.1 The performance of every student in each course will be evaluated as follows:*

7.1.2 Internal evaluation by the course faculty member(s) based on continuous assessment, for 30% of the marks for the course; and

7.1.3 Final examination by the University through modes such as; written paper or practical test or oral test or presentation by the student or a combination of any two or more of these, is set to 70% of the marks for each the course.

### *7.2 Internal Evaluation*

***As per Annexure – I attached***

### *7.3 University Examination*

The final examination by the University for 70% of the evaluation for the course will be through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these.

### *7.4 In order to earn the credit in a course a student has to obtain grade other than FF.*

### *7.5 Performance at Internal & University Examination*

7.5.1 Minimum performance with respect to internal marks as well as university examination will be an important consideration for passing a course.
Details of minimum percentage of marks to be obtained in the examinations (internal/external) are as follows:

| Minimum marks in University Exam per course | Minimum marks Overall per course |
|---|---|
| 40% | 45% |

7.5.2 A student failing to score 40% in the final examination will get an FF grade.

7.5.3 If a candidate obtains minimum required marks in each course but fails to obtain minimum required overall marks, he/she has to repeat the university examination till the minimum required overall marks are obtained.

## *8. Grading*

8.1 The total of the internal evaluation marks and final University examination marks in each course will be converted to a letter grade **on** a ten-point scale as per the following scheme:

***Table: Grading Scheme (UG)***

| Range of Marks (%) | ≥80 | <80 ≥73 | <73 ≥66 | <66 ≥60 | <60 ≥55 | <55 ≥50 | <50 ≥45 | <45 |
|---|---|---|---|---|---|---|---|---|
| Corresponding Letter Grade | AA | AB | BB | BC | CC | CD | DD | FF |
| Numerical point (Grade Point) corresponding to the letter grade | 10 | 9 | 8 | 7 | 6 | 5 | 4 | 0 |

**8.2** The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his/her performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are calculated as follows:

(i) SGPA = $\Sigma C_i G_i / \Sigma C_i$ where,
$C_i$= Number of credits of course i
$G_i$ = Grade Point for the course i
i = 1 to n
n = number of courses in the semester

(ii) CGPA = $\Sigma C_i G_i / \Sigma C_i$ where,
$C_i$ = Number of credits of course i
$G_i$ = Grade Point for the course i
i = 1 to n
n = number of courses of all semesters up to which CGPA is computed

(iii) No student will be allowed to move further in next semester if CGPA is less than 3 at the end of an academic year.

(iv) A student will not be allowed to move to third year if he/she has not cleared all the courses of first year.

(v) A student will not be allowed to move to fourth year if he/she has not cleared all the courses of first and second year.

## *9. Award of Degree*

9.1 Every student of the programme who fulfills the following criteria will be eligible for the award of the degree:

9.1.1 He/ She should have earned minimum required credits as prescribed in course structure; and

9.1.2 He/ She should have cleared all internal and external evaluation components in every course; and

9.1.3 He/ She should have secured a minimum **CGPA of 4.5** at the end of the programme;

9.1.4 In addition to above, the student has to complete the required formalities as per the regulatory bodies, if any.

9.2 The student who fails to satisfy minimum requirement of CGPA will be allowed to improve the grades so as to secure a minimum CGPA for award of degree. Only latest grade will be considered.

## *10. Award of Class*

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

| | | |
|---|---|---|
| Distinction | : | CGPA ≥ 7.5 & ≤ 10.0 |
| First class | : | CGPA ≥ 6.0 & < 7.5 |
| Second Class | : | CGPA ≥ 5.0 & < 6.0 |

## *11. Transcript*

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA,CGPA, class obtained, etc.

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
(CHARUSAT)

FACULTY OF TECHNOLOGY & ENGINEERING (FTE)

# CHOICE BASED CREDIT SYSTEM

## A. Choice Based Credit System:

With the aim of incorporating the various guidelines initiated by the University Grants Commission (UGC) to bring equality, efficiency and excellence in the Higher Education System, Choice Based Credit System (CBCS) has been adopted. CBCS offers wide range of choices to students in all semesters to choose the courses based on their aptitude and career objectives. It accelerates the teaching-learning process and provides flexibility to students to opt for the courses of their choice and / or undergo additional courses to strengthen their Knowledge, Skills and Attitude.

### 1. CBCS – Conceptual Definitions / Key Terms (Terminologies)

#### 1.1. Core Courses

##### 1.1.1 University Core (UC)

University Core Courses are those courses which all students of the University of a Particular Level (PG/UG) will study irrespective of their Programme/Specialization.

##### 1.1.2 Programme Core (PC)

A 'Core Course' is a course which acts as a fundamental or conceptual base for Chosen Specialization of Engineering. It is mandatory for all students of a particular Programme and will not have any other choice for the same.

#### 1.2 Elective Course (EC)

An 'Elective Course' is a course in which options / choices for course will be offered. It can either be for a Functional Course / Area or Streams of Specialization / Concentration which is / are offered or decided or declared by the University/Institute/Department (as the case may be) from time to time.

##### 1.2.1 Institute Elective Course (IE)

Institute Courses are those courses which any students of the University/Institute of a Particular Level (PG/UG) will choose as offered or decided by the University/Institute from time-to-time irrespective of their Programme /Specialization

##### 1.2.2 Programme Elective Course (PE)

A 'Programme Elective Course' is a course for the specific programme in which students will opt for specific course(s) from the given set of functional course/ Area or Streams of Specialization options as offered or decided by the department from time-to-time.

### 1.2.3 Cluster Elective Course (CE)

A 'Cluster Elective Course' is a course which students can choose from the given set of functional course/ Area or Streams of Specialization options (e.g. Common Courses for EC/CE/IT/EE) as offered by or decided by the Institute from time-to-time.

## 1.3 Non Credit Course (NC) - AUDIT Course

A 'Non Credit Course' is a course where students will receive Participation or Course Completion certificate. This will not be reflected in Student's Grade Sheet. Attendance and Course Assessment is compulsory for Non Credit Courses.

## CL 441: DESIGN OF STRUCTURES – I
B TECH 7TH SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Theory | Practical | Total | Credit |
|---|---|---|---|---|
| Hours/Week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A. Course Outline:**

| Sr. No | Title of Unit | Minimum number of Hours |
|---|---|---|
| | **Concrete Element Design** | |
| 1 | Design of Flexure Members | 12 |
| 2 | Design of Slabs | 05 |
| 3 | Design of Compression Members with/without Bending | 05 |
| 4 | Design of Footings | 05 |
| 5 | Design Concepts of Bunkers and Silos | 03 |
| | **Steel Element Design** | |
| 6 | Connections Design | 10 |
| 7 | Design of Tension Members | 05 |
| 8 | Design of Compression Members | 05 |
| 9 | Design of Built-up Column and Column Bases | 06 |
| 10 | Plastic Design of Beam | 04 |

**Total Hours (Theory): 60**
**Total Hours (Lab): 30**
**Total Hours: 90**

**B. Detailed Syllabus:**

**Concrete Element Design**

1. **Design of Flexure Members** **12 Hours** **20%**
   - 1.1 Methods of design of concrete structures
   - 1.2 Limit state of collapse: Flexure, Compression, Shear
   - 1.3 Characteristic and design values & partial safety factors
   - 1.4 Limit state of serviceability: Deflection, Cracking
   - 1.5 Basis of design, loads & forces

| | | | |
|---|---|---|---|
| 1.6 | Behaviour of R.C.C. beams under loads | | |
| 1.7 | Design of singly reinforced sections | | |
| 1.8 | Design of doubly reinforced sections | | |
| 1.9 | Design of T- sections | | |
| **2.** | **Design of Compression Members with/without Bending** | **05 Hours** | **09%** |
| 2.1 | Analysis & design of axially loaded short column | | |
| 2.2 | Design of axially loaded column with uni & bi-axial bending | | |
| **3.** | **Design of Slabs** | **05 Hours** | **09%** |
| 3.1 | Method of slab analysis | | |
| 3.2 | Design of One-way slab (simply supported) | | |
| 3.3 | Design of Two-way slab (restrained, simply supported) | | |
| **4.** | **Design of Footings** | **05 Hours** | **09%** |
| 4.1 | Pressure distribution under Footing | | |
| 4.2 | Design of isolated footing (square & oblong) | | |
| **5.** | **Design Concepts of Bunkers and Silos** | **03 Hours** | **05%** |
| 5.1 | Introduction | | |
| 5.2 | Difference between Bunker & Silo | | |
| 5.3 | Concepts of loading and design | | |

**Steel Element Design**

| | | | |
|---|---|---|---|
| **6.** | **Connections Design** | **10 Hours** | **16%** |
| | **Bolted Connections** | | |
| 6.1 | Bolt as connection, types of bolts, types of bolted joints | | |
| 6.2 | Load transfer mechanism, failure of bolted joints | | |
| 6.3 | Bearing type connections | | |
| 6.4 | Tensile strength of plate | | |
| 6.5 | Strength and efficiency of the joint | | |
| 6.6 | Beam – Beam connection, Column – Beam connection, Unstiffened connection | | |
| | **Welded Connections** | | |
| 6.7 | Welding processes, welding electrodes, advantages of welding | | |

| | | | |
|---|---|---|---|
| 6.8 | Types and properties of welds, types of Joints | | |
| 6.9 | Effective area of welds | | |
| 6.10 | Design of welds, simple joints | | |
| 6.11 | Moment resistant connections | | |
| 6.12 | Beam-to-column connections | | |
| **7.** | **Design of Tension Members** | **05 Hours** | **09%** |
| 7.1 | Types of tension members | | |
| 7.2 | Net sectional area, effective net area, types of failures | | |
| 7.3 | Design strength of tension members, slenderness ratio | | |
| 7.4 | Design of tension member | | |
| **8.** | **Design of Compression Members** | **05 Hours** | **08%** |
| 8.1 | Effective length, slenderness ratio, types of sections | | |
| 8.2 | Types of buckling | | |
| 8.3 | Column formula, design strength of angle sections, I-section and more | | |
| 8.4 | Design of axially loaded compression members | | |
| **9.** | **Design of Built-up Column and Column Bases** | **06 Hours** | **10%** |
| 9.1 | Introduction to Built-Up columns | | |
| 9.2 | Design of Lacing | | |
| 9.3 | Design of Battening | | |
| 9.4 | Slab based, Gusseted base foundation | | |
| **10.** | **Plastic Design of Beam** | **04 Hours** | **05%** |
| 10.1 | Plastic Hinge Concept | | |
| 10.2 | Plastic-Collapse Load | | |
| 10.3 | Design of continuous beams and portal frame using plastic design approach. | | |

**C. Course Outcomes:**

On the successful completion of this course, students will be able to:

CO1 The students will get an idea regarding the fundamentals design concepts of any R.C.C. and Steel structural member.

CO2 The students will be able to design all three types of R.C.C. flexure members like singly reinforced, doubly reinforced and flanged sections.

CO3 The students will be able to understand the design of one-way slab and two-way slabs.

CO4 The students will be able to design the columns with axially loaded with uni-axial and bi-axial bending. Also be able to design of square and oblong isolated footing.

CO5 The students will be able to understand the designing of connections which are really an important for the stability and safety of the steel structure.

CO6 The students will be able to design the steel structure members which are either subjected to axial loading or transverse kind of loading.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 3 | 2 | 2 | - | - | 1 | - | - | 1 | 2 | 2 | 3 | 3 | 2 | 3 |
| CO2 | 2 | 1 | 2 | - | - | 1 | - | - | 1 | 2 | 2 | 3 | 3 | 2 | 3 |
| CO3 | 3 | 3 | 2 | 1 | 1 | 2 | 1 | 1 | 1 | 2 | 2 | 3 | 3 | 2 | 3 |
| CO4 | 3 | 2 | 2 | - | 1 | 1 | 1 | 1 | 1 | 2 | 2 | 2 | 3 | 3 | 3 |
| CO5 | 3 | 3 | 2 | 1 | 1 | 2 | 1 | - | 1 | 2 | 2 | 3 | 3 | 2 | 3 |
| CO6 | 3 | 3 | 2 | 1 | 1 | 2 | 1 | 1 | 1 | 2 | 2 | 3 | 3 | 2 | 3 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

**Text Books:**

1. Shah, H.J., Reinforced Concrete Vol-I & II, Charotar Publishing House.
2. Shah, V.L. and Karve, S.R., Limit State Theory and Design of Reinforced Concrete, Structures Publications.
3. Punamia, B.C. and Jain, A.K., R.C.C. Designs (Reinforced Concrete Structures), Laxmi Publications (P) Ltd.
4. Duggal, S.K., Limit State Design of Steel Structures, McGraw Hill Education (P) Ltd, New Delhi.
5. Subramanian, N., Steel Structures: Design and Practice, Oxford University Press.

**Reference Books:**

1. Variyani and Radhaji, Manual of Limit State Design, CBS Publishers, New Delhi.
2. Pillai, S. and Menon, D., Reinforced Concrete Design, TATA McGraw-Hill.
3. Ramchandra and Gehlot V., Limit State Design of Concrete Structures, Scientific Publishers, India.

**Other Materials:**

1. IS: 456: Plain and Reinforced Concrete-Code of Practice
2. IS: 875 (Part 1 to 5), Code of Practice for Design Loads
3. IS: 800, General Construction in Steel- Code of Practice
4. SP 16, Design Aids for Reinforced Concrete to IS: 456
5. SP 6, Handbook for Structural Engineers

## CL 442: TRANSPORTATION ENGINEERING- II
B TECH 7th SEMESTER (CIVIL ENGINEERING)

**Credit and Hours:**

| Teaching Scheme | Theory | Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/Week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A Outline of the Course:**

| Sr. No | Title of Unit | Minimum number of Hours |
|---|---|---|
| 1 | Railway Engineering | 17 |
| 2 | Bridge Engineering | 12 |
| 3 | Tunnel Engineering | 6 |
| 4 | Airport Engineering | 17 |
| 5 | Harbour Engineering | 8 |

**Total hours (Theory): 60**
**Total hours (Lab): 30**
**Total Hours: 90**

**B Detailed Syllabus:**

**1 Railway Engineering** **17 Hours** **28%**

1.1 **Introduction**

1.1.1 Development of railways in India

1.1.2 Permanent way and railway track components, Ideal requirement of permanent way, Capacity of railway track, Gauge, Conning of wheels

1.1.3 Rails - function and types of rails, rail sections, defects in rails, creep of rails, rail joints and welding of rails

1.1.4 Sleepers - function, types, spacing and density

1.1.5 Ballast - function and Types of Ballast material, Sub-ballast

1.1.6 Rail fixtures and Fastenings

1.1.7 Subgrade and embankment

1.2 **Geometric design of railway track**

1.2.1. Gradients

1.2.2. Speed of the trains on curves

1.2.3. Super elevation

1.2.4. Curves

1.2.5. Radius of the curves

1.2.6. Widening on curves

1.3 **Railway Traction, Crossing, Stations, Yards, Signaling and Interlocking**

1.3.1. Railway traction and track resistance, stresses in railway track - rails, sleepers, ballast

1.3.2. Points and crossings - turnouts, switches, crossings

1.3.3. Track junctions - types and salient features

1.3.4. Railway stations - requirements, facilities, classifications, platforms, loops, sidings

1.3.5. Railway yards - types, required equipment in yards

1.3.6. Signaling and control system - necessity, objectives, classification

1.3.7. Interlocking of signals and points, Mechanical Interlocking devices

1.4 **Railway Track**

1.4.1. Railway track - construction, drainage, maintenance

1.4.2. Recent developments in railways - high speed trains, modernization in track for high speed, Metro rails, Monorail, Maglev Rails, Tube Rails, Automation in operation and control

1.4.3. Safety in railways - accidents and remedial measures

**2 Bridge Engineering** **12 Hours** **20%**

2.1 **Introduction**

2.1.1 Selection of site

2.1.2 Data collection

2.1.3 Stages of investigation

2.1.4 Waterway calculations

2.1.5 Scours depth, Afflux

2.1.6 Free board, Vertical clearance and economic span.

2.2 **Classification**

2.2.1. Classification of superstructures with respect to structural behavior and material used

2.2.2. Types of substructures, flooring joints, bridge bearings, movable bridges, temporary bridges

2.3 **Construction methods**

2.3.1. Methods of erection of various types of bridges, Superstructures and Substructures

2.4 **Maintenance**

2.4.1. Testing and strengthening of bridges

2.4.2. Equipment used in bridge engineering

**3 Tunnel Engineering** **06 Hours** **10%**

3.1 **Introduction**

3.1.1. Necessity/Advantage of a tunnel

3.1.2. Classification of Tunnels

3.1.3. Size and shape of a tunnel

3.1.4. Alignment of a Tunnel, Portals and Shafts

3.1.5. Problems in Tunneling

3.2 **Tunneling in Hard Rock**

3.2.1. Sequence of operation

3.2.2. Faces of attack

3.2.3. Methods of tunneling in hard rock

3.3 **Tunneling in Soft Ground**

3.3.1. Types and factors affecting the choice of method to sort ground

3.3.2. Methods of tunneling in soft rocks

3.4 **Lighting, Ventilation and Dust control**

3.4.1. Tunnel Lighting

3.4.2. Ventilation of Tunnel

3.4.3. Methods of Ventilation, Dust control

3.4.4. Drainage of tunnel, Drainage system, Safety

**4 Airport Engineering** **17 Hours** **28%**

4.1 **Introduction to Airport Engineering**

4.1.1. History and development

4.1.2. Policy of air transport

4.1.3. Air transport authorities, air transport activities

4.1.4. Air crafts and its characteristics

4.1.5. Airport classifications as per ICAO

4.2 **Airport Planning**

4.2.1. Regional planning-concepts and advantages

4.2.2. Requirements of an ideal airport layout

4.2.3. Location and planning of airport as per ICAO and F.A.A. recommendations

4.2.4. Airport Elements - airfield, terminal area, obstructions, approach zone, zoning laws, airport capacity

4.2.5. Airport size and site selection

4.2.6. Estimation of future air traffic & development of new airport

4.3 **Run Way Design**

4.3.1. Wind rose and orientation of runway

4.3.2. Wind coverage and crosswind component

4.3.3. Factors affecting runway length

4.3.4. basic runway length and corrections to runway length

4.3.5. Runway geometrics and runway patterns (configurations)

4.3.6. Runway marking, Threshold limits, Cross section of runway

4.4 **Taxiway Design**

4.4.1. Controlling factors

4.4.2. Taxiway geometric elements, layout, exit taxiway, location and geometrics, holding apron, turnaround facility

4.4.3. Aprons - locations, size, gate positions

4.4.4. Aircraft parking configurations and parking systems

4.4.5. Hanger - site selection

4.4.6. Planning and design considerations

4.4.7. Fuel storage area, blast pads

4.4.8. Wind direction indicator

4.5 **Air Traffic Control and Visual Aids**

4.5.1. Air traffic control objectives, Control system

4.5.2. Control network - Visual aids-landing information system

4.5.3. Airport markings and lighting

**5 Harbour Engineering** **08 Hours** **14%**

5.1 **Harbour Planning**

5.1.1. Harbour components

5.1.2. Ship characteristics

5.1.3. Characteristics of good harbour and principles of harbour planning

5.1.4. Size of harbour, site selection criteria and layout of harbours

5.1.5. Surveys to be carried out for harbour planning

5.1.6. Natural Phenomena: Wind, waves, tides formation and currents phenomena, their generation characteristics and effects on marine structures, silting, erosion and littoral drift.

5.2 **Marine Structures**

5.2.1. General design aspects & principles

5.2.2. Breakwaters - function, types

5.2.3. Wharves, Quays, Jetties, Piers, Pier heads, Dolphin, Fenders

5.2.4. Mooring accessories - function, types, suitability, design and construction features

5.3 **Docks and Locks**

5.3.1. Tidal basin

5.3.2. Wet docks - purpose, design consideration

5.3.3. Operation of lock gates and passage

5.3.4. Repair docks - graving docks, floating docks

5.4 **Port Amenities and Navigational Aids**

5.4.1. Ferry, transfer bridges, Floating landing stages, Transit sheds, Warehouses, Cold storage, Aprons, Cargo handling equipment

5.4.2. Purpose and general description

5.4.3. Channel and entrance demarcation

5.4.4. Buoys, Beacons, Light house, Electronic communication devices.

**C Course Outcomes:**

The course content should be taught and learning imparted with the aim to develop required knowledge and skills so that they are able to acquire following competency:

CO1 The students will gain an experience in the implementation of Railway, Bridge, Tunnel, Airport and Harbour Engineering on engineering concepts which are applied in field of Transportation Engineering.

CO2 The students will get a diverse knowledge of Railway, Bridge, Tunnel, Airport and Harbour engineering practices applied to real life problems.

CO3 The students will learn to understand the theoretical and practical aspects of Railway, Bridge, Tunnel, Airport and Harbour engineering along with the design and management applications.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 1 | - | 2 | - | 1 | 1 | 1 | - | 3 | 2 | - | 1 | 2 | 1 | 1 |

## List of Tutorials

| Tutorial No. | Name of Tutorials |
|---|---|
| 1 | Introduction, Railway Track Gauge, Alignment of Railway lines |
| 2 | Track and Track stresses, Rails, Sleeper |
| 3 | Ballast, Track fittings, Geometric design of Track |
| 4 | Resistance to Traction, Points and crossings, Railway Stations and Yards |
| 5 | Signaling and interlocking |
| 6 | Bridge –General, Classification of Bridge Construction methods, Maintenance |
| 7 | Tunnel-General, Tunneling in Hard Rock, Tunneling in Soft Ground, |
| 8 | Lighting, Ventilation , Drainage and safety |
| 9 | Layout of Airport, components of airport, authorities of airport |
| 10 | Factors affecting runway design , Wind rose diagram, Design of runway |
| 11 | Design of taxiway |
| 12 | Navigational aids of Airport |
| 13 | Components of harbor, Factors affecting the site selection |
| 14 | Different natural phenomena and wave actions, Harbour infrastructure |

**Credit and Hours:**

| Teaching Scheme | Theory | Practical | Total | Credit |
|---|---|---|---|---|
| Hours/Week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A Outline of the Course:**

| Sr. No | Title of Unit | Minimum number of hours |
|---|---|---|
| 1 | Sewage: Generation, Collection and Conveyance | 08 |
| 2 | Sewage: Characteristics | 10 |
| 3 | Sewage: Primary Treatment | 06 |
| 4 | Sewage: Secondary Treatment | 20 |
| 5 | Sewage: Tertiary Treatment | 03 |
| 6 | House Drainage & Decentralized Sewage Treatment System | 05 |
| 7 | Solid Waste Management | 08 |

**Total hours (Theory): 60**
**Total hours (Lab): 30**
**Total Hours: 90**

**B Detailed Syllabus:**

**1 Sewage - Generation, Collection and Conveyance** **08 Hours** **13%**

1.1 Definitions: sewage, sullage, sewerage, Conservancy and water carriage system

1.2 Introduction to material/mass balance

1.3 Sewer: Shapes and materials of sewers, Design of sewers

1.4 Systems of sewerage and their layouts, Laying and testing of sewers, Sewer joints, Sewer appurtenances, Ventilation of sewers, Construction and Maintenance of sewers,

1.5 Pumping of sewage - Types, selection of pumps, Pumping station

1.6 Estimating domestic wastewater discharge

| | | | |
|---|---|---|---|
| **2** | **Sewage - Characteristics** | **10 Hours** | **17%** |
| 2.1 | Sampling of sewage, Analysis of sewage | | |
| 2.2 | Aerobic decomposition, anaerobic decomposition | | |
| 2.3 | Characteristics - physical, chemical, biological | | |
| 2.4 | Standards for effluent disposal & receiving water body | | |
| **3** | **Sewage - Primary Treatment** | **06 Hours** | **10%** |
| 3.1 | Treatment processes - Objective, methods of treatment, flow sheets of STP | | |
| 3.2 | Screens, Grit chamber, Primary and secondary clarifier. Design of primary treatment units. | | |
| **4** | **Sewage - Secondary Treatment** | **20 Hours** | **34%** |
| 4.1 | Biological unit processes - bacterial growth and its kinetics, its applications to treatment systems, | | |
| 4.2 | Suspended and attached growth process | | |
| 4.3 | Aerobic treatments - trickling filter, activated sludge process, rotating biological contactors (RBC), stabilization pond and aerated lagoons<br>Anaerobic treatments – Up-flow Anaerobic Sludge Blanket (UASB) | | |
| 4.4 | Sludge treatment & disposal - anaerobic sludge digestion,<br>Self-purification of natural water bodies - Oxygen economy | | |
| 4.5 | Numerical on BOD, Sewage farming. | | |
| 4.6 | Disposal of treated effluent | | |
| **5** | **Sewage - Tertiary Treatment** | **03 Hours** | **05%** |
| 5.1 | Removal of residual organics | | |
| 5.2 | Removal of nutrients | | |
| 5.3 | Recycling and reuse of wastewater | | |
| **6** | **House Drainage & Decentralized Sewage Treatment System** | **05 Hours** | **08%** |
| 6.1 | Plumbing fixtures, materials used for plumbing system, systems of plumbing, anti-siphonic and vent pipes | | |
| 6.2 | Septic tanks, Soak Pits, Low Cost Sanitation | | |

**7 Solid Waste Management** **08 Hours** **13%**

7.1 Importance of solid waste management

7.2 Quantity, composition and characteristics of domestic and municipal solid waste

7.3 Methods of solid waste collection: Based on availability of Services & modes of Operation

7.4 Solid waste treatment – composting, incineration.

**C Course Outcomes:**

On the completion of the course the students will be able to:

CO1 Understand the design principles involved in treatment of municipal wastewater.

CO2 Identify, analyze and select the appropriate physical, chemical, and biological parameters used for assessing waste characteristics.

CO3 To apply appropriate breadth and depth of skills in identification of engineering problems designed with realistic constraints and contribute to sustaining and improving community.

CO4 To improve written communication and design skills by preparing a preliminary design report detailing the design of a wastewater treatment plant

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 2 | - | - | - | - | 1 | - | 1 | - | - | - | - | 2 | 1 | - |
| CO2 | 3 | 3 | - | - | - | 2 | - | 1 | - | - | - | 1 | 1 | 1 | - |
| CO3 | - | 3 | 3 | 3 | 1 | 3 | 3 | 3 | 2 | 1 | 3 | 3 | 2 | 3 | 3 |
| CO4 | - | 1 | 2 | 3 | 2 | 1 | 1 | 1 | 2 | 3 | 1 | 1 | 1 | 2 | 3 |

## List of Experiments

| Experiment No. | Name of Tutorial / Experiment (At least eight to be performed) |
|---|---|
| 1 | Determination of chlorides |
| 2 | Determination of pH of sewage |
| 3 | Determination of Total Solids, suspended solids, dissolved solids, volatile solids |
| 4 | Determination of Dissolved oxygen |
| 5 | Determination of Bio chemical Oxygen Demand of sewage sample |
| 6 | Determination of Chemical Oxygen Demand of sewage sample |
| 7 | Determination of Sulphates |
| 8 | Determination of Nitrates |
| 9 | Determination of Oil & Grease |
| 10 | Determination of Ammoniacal Nitrogen |
| 11 | To find Sludge Volume Index (SVI) of sewage sample |
| 12 | Plumbing demonstration of accessories, fittings and fixtures |

**Credits and Hours:**

| Teaching Scheme | Theory | Practical | Total | Credit |
|---|---|---|---|---|
| Hours/week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Soil Exploration | 08 |
| 2 | Earth Pressure | 10 |
| 3 | Stability of Slopes | 10 |
| 4 | Shallow Foundation | 10 |
| 5 | Deep Foundation | 14 |
| 6 | Stress Distribution | 08 |

**Total Hours (Theory): 60**

**Total Hours (Lab): 30**

**Total Hours: 90**

**B. Detailed Syllabus:**

**1 Soil Exploration** **8 Hours** **13%**

1.1 Introduction, Stages in sub-surface Exploration, Depth of Exploration, Location and number of pits and Borings

1.2 Methods of boring/exploration

1.3 Sampling of soils, types of soil samplers

1.4 Standard penetration test, Cone penetration test: Static and Dynamic

1.5 Field vane shear test

1.6 Field plate load test, NDT method

| | | | |
|---|---|---|---|
| **2** | **Earth Pressure** | **10 Hours** | **17%** |
| 2.1 | Introduction, effects of wall movements on earth pressure, lateral earth pressure at rest | | |
| 2.2 | Rankine's & Coulomb's theory for active and passive earth pressure conditions for cohesionless and cohesive backfill, Rebhann's and Culmann's graphical method | | |
| **3** | **Stability of Slopes** | **10 Hours** | **17%** |
| 3.1 | Introduction, types of slope failure, factor of safety | | |
| 3.2 | Slice method, friction circle method, Taylor's stability number & other methods of analysis | | |
| 3.3 | Improving stability of slopes, various stability conditions in an earth dam & canals | | |
| **4** | **Shallow Foundation** | **10 Hours** | **17%** |
| 4.1 | Introduction, bearing capacity of soil, types of failure in soil, allowable bearing pressure | | |
| 4.2 | Terzaghi's bearing capacity theory, factors affecting bearing capacity, depth of foundation | | |
| 4.3 | Bearing capacity of foundation subjected to eccentric loads, settlement-consideration & computation, effect of water-table | | |
| 4.4 | Ultimate bearing capacity of footing based on SPT and CPT values, IS code of practice for computing bearing capacity | | |
| **5** | **Deep Foundation** | **14 Hours** | **23%** |
| 5.1 | Introduction, types of piles, method of installation and load carrying behavior, necessity of pile foundation | | |
| 5.2 | Static pile load formulae, pile load test, dynamic pile formulae | | |
| 5.3 | Bearing capacity of single pile subjected to vertical load in sands and clays, pile subjected to uplift load | | |
| 5.4 | Negative skin friction, group action of piles in cohesionless & cohesive soil | | |
| 5.5 | Settlement of group pile | | |
| 5.5 | Pile Integrity Test (PIT) | | |
| 5.6 | Well Foundation: Introduction | | |

5.7 Introduction to Ground Improvement Techniques

**6 Stress Distribution** **08 Hours 13 %**

6.1 Stress strain parameters, geostatic stresses, concentrated force - Boussinesq's equations

6.2 Pressure distribution diagram, vertical stress distribution on horizontal plane, vertical stress distribution on vertical plane, vertical pressure distribution under uniformly loaded circular area, line load, strip load & uniformly loaded rectangular area

6.3 Newmark's influence charts, Westergard's analysis

6.4 Contact pressure distribution, limitation of elastic theories

**C. Course Outcome:**

At the end of the course, the students will be able to

CO1 Students will be aware of various soil exploration techniques and also know the various I.S. code criteria for SPT test and results

CO2 Student will be able to compute the lateral earth pressure against retaining wall.

CO3 Students will be able to analysis the slope stability using different methods.

CO4 Students will be able to determine the bearing capacity of shallow and deep foundation in sand and clay

CO5 The student will have the knowledge about the various techniques depending on type of soil to improve the soil properties.

CO6 Students will be able to determine the vertical pressure for different loading condition on surface through different methods

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 1 | - | 2 | 3 | 3 | - | - | - | 3 | 1 | - | 2 | 2 | - | 3 |
| CO2 | 3 | 3 | 3 | 3 | 2 | - | - | - | 2 | 1 | - | 2 | 3 | - | 3 |
| CO3 | 3 | 3 | 3 | 2 | 1 | - | 2 | - | - | 1 | - | 2 | 3 | - | 3 |
| CO4 | 3 | 3 | 3 | 3 | 3 | - | - | - | - | 1 | - | 3 | 3 | - | 3 |
| CO5 | 3 | 3 | 3 | 2 | 2 | - | - | - | - | 1 | - | 3 | 3 | - | 3 |

## List of Experiments

| Experiment No. | Name of Experiment |
|---|---|
| 1 | Standard Penetration Test |
| 2 | Cone Penetrometer Test for Liquid Limit |
| 3 | Unconfined Compression Test |
| 4 | Laboratory Vane Shear Test |
| 5 | Laboratory Plate Load Test |
| 6 | Static Cone Penetration Test |

**CL 445: SUMMER INTERNSHIP - II**

B TECH 7th SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Project | Total | Credit |
|---|---|---|---|
| Hours/week | 45 | 90 | 3 |
| Marks | 150 | 150 | |

**A. Instructional Method and Pedagogy:**

- Summer internship shall be at least of 90 hours during the summer vacation only.
- Department/Institute will help students to find an appropriate company/industry/organization for the summer internship.
- The student must fill up and get approved a Summer Internship Acceptance form by the company and provide it to the Coordinator of the department within the specified deadline.
- Students shall commence the internship after the approval of the department Coordinator. Summer internships in research centers are also allowed.
- During the entire period of internship, the student shall obey the rules and regulations of the company/industry/organization and also those of the University.
- Due to inevitable reasons, if the student is not able to attend the internship for a few days with the permission of the supervisor, the department Coordinator should be informed via e-mail and these days should be compensated later.
- The student shall submit two documents to the Coordinator for the evaluation of the summer internship:
  1. Summer Internship Report
  2. Summer Internship Assessment Form
- Upon the completion of summer internship, a hard copy of "Summer Internship Report" must be submitted to the Coordinator on the first day of the new term.
- The report must outline the experience and observations gained through practical internship, in accordance with the required content and the format described in

this guideline. Each report will be evaluated by a faculty member of the department on a satisfactory/unsatisfactory basis at the beginning of the semester.

- If the evaluation of the report is unsatisfactory, it shall be returned to the student for revision and/or rewriting. If the revised report is still unsatisfactory the student shall be requested to repeat the summer internship.

**B. Format of Summer Internship Report:**

The report shall comply with the summer internship program principles. Title is to be centered and written in capital boldface letters. Sub-titles shall be written in small letters and boldface. The typeface shall be "Times New Roman" font with a font size of 12pt. All the margins shall be 2.5cm. The report shall be submitted in printed form and filed. A soft copy of the report shall be submitted in a CD and enclosed with the report. Each report shall be bound in a simple wire vinyl file and contain the following sections:

- Cover Page
- Page of Approval and Grading
- Abstract page: An abstract gives the essence of the report (usually less than one page). Abstract is written after the report is completed. It must contain the purpose and scope of internship, the actual work done, and conclusions arrived at.
- TABLE OF CONTENTS (with the corresponding page numbers)
- LIST OF FIGURES AND TABLES (with the corresponding page numbers)
- DESCRIPTION OF THE COMPANY: Summarize the type of work, administrative structure, number of each category of employees, etc. Provide information regarding
    1. Location and spread of the company
    2. Number of employees, engineers, technicians, administrators in the company
    3. Divisions of the company
    4. Your group and division
    5. Administrative tree (if available)
    6. Main functions of the company
    7. Customer profile and market share
- INTRODUCTION: In this section, give the purpose of the summer internship, reasons for choosing the company, and general information regarding the nature of work you carried out.

- PROBLEM STATEMENT: What is the problem you are solving, and what are the reasons and causes of this problem.
- SOLUTION: In this section, describe what you did and what you observed during the summer internship. It is very important that majority of what you write should be based on what you did and observed that truly belongs to the company/industry/organization.
- CONCLUSIONS: In the last section, summarize the summer internship activities. Present your observations, contributions and intellectual benefits. If this is your second summer internship, compare the first and second summer internships and your preferences.
- REFERENCES: List any source you have used in the document including books, articles and web sites in a consistent format.
- APPENDICES: If you have supplementary material (not appropriate for the main body of the report), you can place them here. These could be schematics, algorithms, drawings, etc. If the document is a datasheet and it can be easily accessed from the internet, then you can refer to it with the appropriate internet link and document number. In this manner you don't have to print it and waste tons of paper.

**C. Course Outcomes:**

After completion of the course students will able:

CO1 To apply knowledge and skills gained in company/industry/organization to real-world problems and to solve engineering problems.

CO2 To learn to work as a team and to work with teammates from other disciplines.

CO3 To use experience related to professional and ethical issues in the actual work environment.

CO4 To explain the impact of engineering solutions employed in a project, in a global, economic, environmental, and societal context.

CO5 To find relevant sources (e.g., library, Internet, experts) and gathers information and to demonstrate knowledge of contemporary issues related with engineering in general and to use new tools and technologies.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**CL 471: ADVANCED STRUCTURAL ANALYSIS**
B TECH 7th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE-III

**Credits and Hours:**

| Teaching Scheme | Theory | Tutorial / Practical | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction | 02 |
| 2 | Direct Stiffness Method | 28 |
| 3 | Finite Element Method | 15 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction** **02 Hours 04 %**

1.1 Basic concepts of Analysis

**2 Direct Stiffness Method** **28 Hours 62%**

2.1 Introduction: Stiffness Method

2.2 Overview of different stiffness & rotation-transformation matrices

2.3 Analysis of beam, plane truss, plane frames, grid, space truss and space frame by stiffness method member approach

2.4 Analysis of beam, plane truss and plane frame under various secondary effects like support sinking, prestraining and temperature effect

2.5 Symmetry and Anti-symmetry

2.6 Oblique supports and elastic supports

**3 Finite Element Method** **15 Hours** **34%**

3.1 Introduction to FEM, Advantages and disadvantages of FEM

3.2 Types of problems, stresses & equilibrium, strain-displacement relations, stress-strain relations

3.3 Application of FEM to one dimensional (for bar & beam) & two dimensional problems using constant strain triangles

3.4 Two dimensional iso-parametric elements: Four node quadrilateral elements, numerical integration, higher order elements

3.5 Application of FEM to two dimensional truss element

**C. Course Outcomes:**

On the completion of the course the students will be able:

CO1 To solve the structural problems using Finite element method.

CO2 Use Direct stiffness method for the analysis of Frame structures

CO3 To recognize the importance of structural analysis and the different tools used to determine the response of a structural system to external loads.

**Course Articulation Matrix:**

**CL 472: ADVANCED GEOTECHNICAL ENGINEERING**

B TECH 7th SEMESTER (CIVIL ENGINEERING)

PROGRAMME ELECTIVE - III

**Credits and Hours:**

| Teaching Scheme | Theory | Tutorial/ Practical | Total | Credit |
|---|---|---|---|---|
| Hours/Week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction | 01 |
| 2 | Influence of Soil Structure Interaction | 04 |
| 3 | Introduction to Rock Mechanics | 08 |
| 4 | Foundation on Expansive Soils | 10 |
| 5 | Foundation on Collapsible Soils | 05 |
| 6 | Environmental Waste Effects On Soils | 07 |
| 7 | Machine Foundations | 10 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction** **01 Hour 02%**

1.1 Course review

1.2 Overview of Soil Mechanics and Rock mechanics

1.3 Overview of Foundation Engineering

**2 Influence of Soil Structure Interaction** **04 Hours 09%**

2.1 Introduction

2.2 Concept of Soil Structure Interaction

| | | | |
|---|---|---|---|
| **3** | **Introduction to Rock Mechanics** | **08 Hours** | **18%** |
| 3.1 | Introduction | | |
| 3.2 | Geological classification of rocks | | |
| 3.3 | Index properties of rocks | | |
| 3.4 | Classification of rocks for engineering purpose | | |
| 3.5 | Rock strength and failure criteria | | |
| 3.6 | Modes of failure of rocks | | |
| **4** | **Foundation on Expansive Soils** | **10 Hours** | **22%** |
| 4.1 | Identification of expansive soils | | |
| 4.2 | Parameters of expansive soils | | |
| 4.3 | Causes of moisture changes | | |
| 4.4 | Preventive measures for expansive soils | | |
| 4.5 | Techniques for Controlling Swelling: Horizontal Moisture Barriers, Vertical Moisture Barriers, Surface and Subsurface Drainage, Prewetting, Soil Replacement Sand Cushion Techniques, CNS Layer | | |
| 4.6 | Technique. Modification of Swelling Characteristics: Lime Stabilization, Mechanisms, Limitations, Lime Injection, Lime Columns, Mixing, Chemical Stabilization, Design of Foundation on Expansive soils: Drilled Pier, Belled Drilled Pier, Under-Reamed Piles. | | |
| **5** | **Foundation on Collapsible Soils** | **05 Hours** | **11%** |
| 5.1 | Types of collapsible soils | | |
| 5.2 | Parameters of collapsible soils | | |
| 5.3 | Treatment Methods for Collapsible Soil: Induce Collapse Prior to Construction, Decrease Foundation Pressures, Solidify the Soil, Densify Collapsible Soil, Other Methods | | |
| 5.4 | Design of foundation on un-wetted collapsible soil, Soil subjected to wetting. | | |
| **6** | **Environmental Waste Effects on Soils** | **07 Hours** | **15%** |
| 6.1 | Man made changes in geotechnical environment - mining, | | |

| | | | |
|---|---|---|---|
| | embankments, pumping, reservoir, landfills and reclamation effect and control. | | |
| 6.2 | Control of contamination with use of clay barriers, geosynthetics, cut-off walls, leachate collection systems. | | |
| 6.3 | Stabilization - different materials and techniques in control of ground pollution and treatment | | |
| **7** | **Machine Foundations** | **10 Hours** | **23%** |
| 7.1 | Introduction of Soil dynamics, basic definitions | | |
| 7.2 | Types of machine foundation | | |
| 7.3 | General criteria for design of machine foundation | | |
| 7.4 | Vibration analysis of a machine foundation | | |
| 7.5 | Examples based on topic | | |
| 7.6 | Indian Standard on Design and Construction of Foundation for Reciprocating Machines | | |
| 7.7 | Liquefaction | | |

**C. Course Outcomes:**

On the successful completion of this course

CO1 Learn the various theoretical and practical aspects of geotechnical engineering and apply a diverse knowledge that is applicable to real life problems and can conduct independent work along with the design.

CO2 Understand the concept of soil structure interaction and its influence on soil behavior.

CO3 To be able to analyze and to determine mechanical and engineering properties of rocks for engineering application, critically review rock mechanics principles and methods and their applications to engineering practices. And analyses rock slope stability and foundations on rock.

CO4 Design and analyze the foundation on problematic soils.

CO5 The student will learn to assess the quality of soil and extent of soil pollution and soil degradation and suitable remediation.

CO6 Understand soil response when subjected to dynamic actions, fundamentals of wave propagation and seismology and the knowledge of in situ and laboratory tests for soil dynamic characterization.

**Course Articulation Matrix:**

|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the course:**

| Sr. No. | Title of the unit | Minimum number of hours |
|---|---|---|
| 1. | Overview of the Course | 02 |
| 2. | Water Pollution | 06 |
| 3. | Industrial Wastewater Management | 12 |
| 4. | Hazardous Waste Management | 12 |
| 5. | Air Pollution Control | 10 |
| 6. | Environmental Policies for Pollution Prevention | 03 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1. Overview of the Course** **02 Hours 04%**

1.1 Concept of pollution prevention and cleaner production, environmental management hierarchy

1.2 Industrialization and sustainable development

**2. Water Pollution** **06 Hours 13%**

2.1 Classification of freshwater pollutants, Heat pollution and its effects, process of self-cleaning, Dissolved oxygen profile, Eutrophication and its impact

2.2 Sampling methods - Purpose of sampling, different types of samples, collection methods and various instruments used for

| | | | |
|---|---|---|---|
| | it | | |
| 2.3 | Marine water pollution - Types, sources and consequences | | |
| **3.** | **Industrial Wastewater Management** | **12 Hours** | **27%** |
| 3.1 | Effects of industrial wastes on sewerage system and receiving water bodies | | |
| 3.2 | Industrial waste survey - Process flow charts, condition of waste stream | | |
| 3.3 | Pre-treatment of industrial wastewater - Volume reduction, strength reduction, neutralization, equalization and proportion, removal of organic and inorganic dissolved solids | | |
| 3.4 | Wastewater treatment in specific industries - Distillery, sugar, pulp and paper, cement, textile, dairy, fertilizer, pesticides, pharmaceutical, etc. | | |
| **4.** | **Hazardous Waste Management** | **12 Hours** | **27%** |
| 4.1 | Introduction, sources, classification, regulations for hazardous waste management, hazardous waste characterization, designated hazardous wastes | | |
| 4.2 | Waste minimization and resource recovery - Approaches, development of a waste tracking system | | |
| 4.3 | Transportation of hazardous waste - Requirements, regulations, containers, bulk and non-bulk transport, emergency response | | |
| 4.4 | Physico-chemical, chemical and biological treatment of hazardous waste | | |
| 4.5 | Sanitary landfill - Design approach, leachate and gaseous collection system, facility siting and process selection for treatment, storage, disposal facility (TSDF) | | |
| 4.6 | Recent developments in solid wastes reuse and disposal - Power generation, blending with construction materials and Best Management Practices | | |
| 4.7 | Biomedical waste management - Sources, treatment and disposal | | |

| | | | |
|---|---|---|---|
| **5.** | **Air Pollution Control** | **10 Hours** | **22%** |
| 5.1 | Meteorology - Composition and structure of the atmosphere, wind circulation, solar radiation, lapse rates, atmospheric stability conditions, wind velocity profile, Maximum Mixing Depth (MMD), temperature inversions, wind rose diagram | | |
| 5.2 | Monitoring of particulate matter and gaseous pollutants - Respirable, non-respirable and nano-particulate matter, CO, CO2, Hydrocarbons (HC), SOX and NOX, photochemical oxidants | | |
| 5.3 | Pollutants dispersion models - Description and application of point, line and areal sources | | |
| 5.4 | Air pollution control equipment for particulate matter & gaseous pollutants: Gravity settling chambers, centrifugal collectors, wet collectors, fabric filters, electrostatic precipitator (ESP), adsorption, absorption, scrubbers, condensation and combustion | | |
| **6.** | **Environmental Policies for Pollution Prevention** | **03 Hours** | **07%** |
| 6.1 | Introduction to environmental legislations | | |
| 6.2 | Environmental auditing - Financial and managerial opportunities | | |

**C. Course Outcomes:**

At the end of the course the students will be able to

CO1 Discover correctly the knowledge related to environmental pollution.

CO2 Understand the theories and practical aspects of pollution control along with the design and management applications.

CO3 Propose ideas to control environmental pollution with respects to professionalism and ethics.

**Course Articulation Matrix:**

## List of Experiments

| Experiment No. | Name of Experiment |
|---|---|
| 1 | Introduction to Sampling in water and wastewater analysis |
| 2 | Determination of BOD/COD ratio |
| 3 | Monitoring of Noise |
| 4 | Determination of PM10 and PM2.5 in ambient air |
| 5 | Determination of gaseous pollutants in ambient air |
| 6 | Determination of various parameters in solid waste |
| 7 | Treatability studies of industrial wastewater |

**CL 474: ADVANCED HIGHWAY & TRAFFIC ENGINEERING**
B TECH 7th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE -III

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/ Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Pavement Materials Characterization | 13 |
| 2 | Pavement Evaluation, Rehabilitation & Maintenance | 10 |
| 3 | Road Safety & Environmental Impact Assessment | 5 |
| 4 | Design of Intersections and Parking Analysis | 5 |
| 5 | Traffic Flow Theory | 7 |
| 6 | Road Making Machinery & Modern Highway System | 5 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Pavement Materials Characterization** **13 Hours** **28 %**

1.1 Bituminous Materials: conventional and modified binders, production, types and grade , physical and chemical properties and uses

Modified bitumen: Crumb Rubber Modified bitumen, Natural rubber modified bitumen, polymer modified bitumen

Introduction to emulsified bitumen and its characterization; Long term and short term ageing and its effect on bitumen performance

1.2 Bituminous Mix design ,Desirable properties of bituminous mixes,

Modified Marshall's specifications, Introduction to super pave mix design procedure

1.3 Requirements of paving concrete, design of mixes – IRC, absolute volume, , Vibrated Concrete mix design, design of DLC and SFRC mixes

1.4 Composites, Plastics and Geo-synthetics: Plastics and polymerization process, properties, durability and chemical composition, Reinforced Polymer Composites, Geo-synthetics, Dry Powdered Polymers- Enzymes.

1.5 Reclaimed/Recycled Waste Products: Reclaimed Materials – waste products in civil engineering applications, effect of waste products on materials, structure and properties, self-healing and smart materials

**2 Pavement Evaluation, Rehabilitation & Maintenance** **10 Hours** **23 %**

2.1 Pavement Evaluation : Methods of Pavement Evaluation, Visual Rating Pavement Serviceability Index(PSI), Roughness Measurements: Importance of smooth riding surface, measurement of road roughness, Towed Fifth Wheel Bump Integrator, Skid Resistance: Measurement, Importance, governing, Factors Pavement Deterioration Research

2.2 Pavement failures: Types of pavement distress: its symptoms, remedies and causes, Techniques for functional and structural evaluation of pavements.

2.3 Overlay Design and Construction :

Need, Types, Overlay design methods for flexible pavements by conventional design method, Benkelman beam method, Falling Weight Deflection Method, I.R.C. Guidelines &Asphalt Institute Method.

Overlay Design Methods for Rigid Pavements, Flexible overlays over rigid slabs

2.4 Recycling of flexible and rigid pavements,

**3 Road Safety & Environmental Impact Assessment** **5 Hours** **11 %**

3.1 Introduction, Collision & condition diagram, Causes of accidents,

| | | | |
|---|---|---|---|
| | Accident studies & records, Analysis of accident studies, Road Safety Improvement Strategies. | | |
| 3.2 | Road Safety Audit Process, Black Spot, Black Route, Area Identification | | |
| 3.3 | Transport related different types of pollution& their sources, Effects of Weather Conditions, Vehicular emission parameters, Pollution standards, Measurement and analysis of vehicular emission, Mitigative Measures. | | |
| 3.4 | Urban and non-urban traffic noise sources, Noise level factors, Effects of traffic noise, Propagation and measurement of traffic noise, Prediction and control measures, Noise studies, Noise standards. | | |
| 3.5 | EIA requirements of highway projects, EIA procedures, guidelines, EIA practices in India. | | |
| **4** | **Design of Intersection and Parking Analysis** | **5 Hours** | **11 %** |
| 4.1 | Principles of design, channelization, roundabouts, staggered intersections<br>Design of rotary intersection. | | |
| 4.2 | Introduction to Parking Studies ,Types of parking facilities, Modes of parking , Parking studies and analysis, Evaluation of parking parameters, Ill effects of parking | | |
| **5** | **Traffic Flow Theory** | **7 Hours** | **16 %** |
| 5.1 | Uninterrupted traffic Flow Theory :<br>Fundamentals of Traffic flow theory, Uninterrupted Traffic flow including Macroscopic and Microscopic Traffic flow models | | |
| 5.2 | Interrupted traffic Flow Theory :<br>Fundamentals of Interrupted Traffic Flow, Shockwave Analysis, Car following theory, Queuing Theory, Vehicle arrival: Gap and Gap acceptance | | |
| 6 | **Road Making Machinery & Modern Highway System** | **5 Hours** | **11%** |
| 6.1 | Role of Labour vs. machinery in road construction, Earth work machinery, volume changes, clearing and grubbing, Tractors, Tractor Dozers, scrapers, Graders. | | |

6.2 Rock excavation machinery, Transporting Equipment, Compaction Equipment , Production of aggregates

6.3 Bituminous concrete road equipment, Cement Concrete road making Equipment, Equipment Usage charges

6.4 Automated Highway System , ITS

6.5 Green Highway, Smart Highway, Electric Highway & Solar Highway

**C. Course Outcomes:**

The course content should be taught and learning imparted with the aim to develop required knowledge and skills so that they are able to acquire following competency:

CO1 The student will develop an understanding of the basic concepts of different paving material and their characteristics.

CO2 The student will be able to identify the distress in pavement and will be able to decide the evaluation and maintenance strategies for the pavement.

CO3 The student will able to understand about the road safety audit process and EIA.

CO4 The student will able to design the parking facilities and at grade intersection.

CO5 The student will capable to understand the traffic flow behaviour on the basis of flow theories.

CO6 The student will learn about the modern equipment and highway system.

**Course Articulation Matrix:**

## CL 475: COMPUTATIONAL METHODS IN WATER RESOURCES ENGINEERING

B TECH 7th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE - III

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the course:**

| Sr. No. | Title of the unit | Minimum number of hours |
|---|---|---|
| 1. | Overview of the Course | 03 |
| 2. | Probabilistic analysis | 06 |
| 3. | Regression Analysis | 08 |
| 4. | Ordinary Differential Equations | 10 |
| 5. | Partial Differential Equations | 10 |
| 6. | Infinite Series | 08 |

**Total Hours (Theory):45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1. Overview of the Course:** **03 Hours** **07%**

1.1 Need for computational and statistical methods, overview of the applications in civil Engineering in general and Water Resources Engineering in particular.

1.2 Review of numerical techniques for finding roots of non-linear equations

**2. Probabilistic analysis:** **06 Hours** **13%**

2.1 Review of basic concepts of probability and probability distributions

| | | | |
|---|---|---|---|
| 2.2 | Probabilistic analysis and treatment of hydro-meteorological and water quality data | | |
| 2.3 | Flood frequency analysis | | |
| **3.** | **Regression Analysis:** | **08 Hours** | **18%** |
| 3.1 | Simple linear and multiple linear regression, evaluation of regression, confidence limits | | |
| 3.2 | Applications – rainfall-runoff analysis, rating curves, water quality modelling | | |
| **4.** | **Ordinary Differential Equations:** | **10 Hours** | **22%** |
| 4.1 | Nature of problems, boundary and initial equations | | |
| 4.2 | Euler's method, modified Euler's method, Predictor-Corrector method, Runge-Kutta method, Boundary value problems | | |
| 4.3 | Applications for reservoir routing, gradually varied flow problems, pipe networks. | | |
| **5.** | **Partial differential equations:** | **10 Hours** | **22%** |
| 5.1 | Classification and nature of problems, Concepts of finite difference method, Solution of parabolic equations, pollutant transport, Solutions of elliptical equation, Laplace equation and Poisson equation. | | |
| 5.2 | Flow through porous media, Solution of hyperbolic equation | | |
| 5.3 | Unsteady flow through open channels, propagation of waves | | |
| 5.4 | Concept of finite volume method | | |
| **6.** | **Infinite Series:** | **08 Hours** | **18%** |
| 6.1 | Basics of Finite Element Method, FEM vs FDM, Element shapes, shape functions, development of shape functions for linear elements | | |
| 6.2 | Formulation of FEM for stress analysis problems | | |
| 6.3 | Flow through porous media, Galerkin's method and Variational method | | |

**C. Course Outcomes:**

At the end of the course the students will be able to

CO1 Apply numerical methods for solution of differential equations in Water Resources and Environmental Engineering

CO2 Apply finite difference schemes for solution of hydraulic and hydrologic models

CO3 Formulate finite element model for solution of flow through porous media

CO4 Perform statistical analysis of water resources systems

**Course Articulation Matrix:**

## List of Tutorials

| Tutorial No. | Name of Tutorial |
|---|---|
| 1 | Probabilistic analysis and treatment of hydro-meteorological and water quality data |
| 3 | Flood frequency analysis |
| 4 | Rainfall-runoff analysis, rating curves, water quality modelling |
| 5 | Euler's method, modified Euler's method, Predictor-Corrector method, Runge-Kutta method, Boundary value problems |
| 6 | Applications for reservoir routing, gradually varied flow problems, pipe networks. |
| 7 | Flow through porous media, Solution of hyperbolic equation |
| 8 | Unsteady flow through open channels, propagation of waves |
| 9 | Applications of infinite series |

## CL 476: GIS & REMOTE SENSING APPLICATIONS IN CIVIL ENGINEERING

B TECH 7th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE - III

**Credits and Hours:**

| Teaching Scheme | Theory | Practical / Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction to Remote Sensing | 03 |
| 2 | Remote sensors and platforms | 07 |
| 3 | Satellite data Analysis | 05 |
| 4 | Digital Image processing | 07 |
| 5 | Introduction to Geographic Information System (GIS) | 05 |
| 6 | GIS data processing | 06 |
| 7 | Introduction to navigational systems | 06 |
| 8 | Integration of GIS and Remote Sensing, Applications in Civil Engineering | 06 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction to Remote Sensing** **03 Hours** **7 %**

1.1 History and development of remote sensing

1.2 Electromagnetic radiation and its interaction with matter

1.3 Atmospheric effects and corrections

**2 Remote sensors and platforms** **07 Hours** **16 %**

2.1 Overview of Remote sensors

| | | | |
|---|---|---|---|
| 2.2 | Remote sensing satellite platforms and orbits | | |
| 2.3 | Optical sensor systems | | |
| 2.4 | Microwave sensor systems | | |
| 2.5 | Indian Satellite Program | | |
| 2.6 | Recent trends in Remote Sensing techniques: Microwave remote sensing, Lasers and radars, Hyper spectral remote sensing | | |
| **3** | **Satellite data Analysis** | **05 Hours** | **11 %** |
| 3.1 | Methods of acquisition of digital images from conventional and space-borne scanners | | |
| 3.2 | Satellite data products | | |
| 3.3 | Visual image interpretation | | |
| 3.4 | Image Processing Systems | | |
| **4** | **Digital Image processing** | **07 Hours** | **16%** |
| 4.1 | Digital Image, Media for digital data recording, Storage, Data formats | | |
| 4.2 | Distortions in Space-borne Digital images and Restoration | | |
| 4.3 | Matching and Registration of satellite images | | |
| 4.4 | Image enhancement through Point Operations : Neighborhood Operations on Satellite Images, | | |
| 4.5 | Image Transforms : Fourier, Wavelet, Hough, color and PCT Arithmetic Operations, | | |
| 4.6 | Digital Image Analysis Through Supervised and Unsupervised Classification, | | |
| 4.7 | Post-classification Analysis: statistical accuracy estimation. | | |
| 4.8 | Image processing softwares. | | |
| **5** | **Introduction to Geographic Information System (GIS)** | **05 Hours** | **11 %** |
| 5.1 | Introduction to GIS, Concept of GIS and Functions and advantages | | |
| 5.2 | Spatial data concepts, map reference systems | | |
| 5.3 | Spatial data - sources, models, structures, Data quality | | |
| 5.4 | Analysis and interpolation | | |
| **6** | **GIS data processing** | **06 Hours** | **13 %** |
| 6.1 | Spatial data model, Geospatial analysis | | |
| 6.2 | Attribute management and metadata concept | | |

6.3 GIS Data sources, Organizing data for analysis

6.4 Linking spatial and attribute data

6.5 Spatial decision support systems,

6.6 GIS Softwares

**7 Introduction to navigational systems** **06 Hours** **13 %**

7.1 Overview of GPS and GNSS

7.2 Current navigational system, components, Functioning and Uses

**8 Integration of GIS and Remote Sensing and their Applications in Civil Engineering** **06 Hours** **13 %**

Case studies in the following areas:

8.1 Environmental engineering

8.2 Water Resources

8.3 Intelligent Transport Systems

8.4 Land-use – Land cover – Urban planning

8.5 Disaster Management

**C. Course Outcomes:**

On the successful completion of this course

CO1 Ability to develop Orthographic and Contour maps using aerial photographs and Remote Sensing Images

CO2 Ability to develop maps using data set from Total Station, GIS, GPS and Scanners

CO3 Ability to create GIS application referencing spatial features with Attribute data

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 2 | 1 | 1 | 1 | - | 1 | 1 | - | - | - | 1 | 2 | 1 | 1 | - |
| CO2 | 3 | 2 | 1 | 1 | - | 2 | 1 | - | - | - | 1 | 2 | 1 | 1 | - |
| CO3 | 3 | 2 | 2 | 2 | 2 | 2 | 2 | - | - | - | 2 | 2 | 1 | 2 | 1 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

**Text Books:**

1. B. Bhatta, Remote Sensing and GIS, 2nd Edition, Oxford University Press, New Delhi
2. George Joseph, Fundamentals of Remote Sensing, Universities Press, India, 2005
3. A.M. Chandra and S.K. Ghosh, Remote Sensing and Geographical Information System, Narosa Publishing House, New Delhi.

**Reference Books:**

## List of Experiments

| Experiment No. | Name of Tutorial / Experiment |
|---|---|
| 1 | Visual Image Interpretation: Photographic Products |
| 2 | Digital Interpretation of True Color Composite and False Color Composite |
| 3 | Image Registration and Geo-referencing |
| 4 | Image Enhancement |
| 5 | Image Transformation |
| 6 | Multiband Image Operations |
| 7 | Supervised Image Classification |
| 8 | Unsupervised Image Classification |
| 9 | Accuracy Assessment of image classification |

| | |
|---|---|
| 10 | Introduction to GIS, Spatial Data Generation |
| 11 | Linking of Spatial and Attribute Data |
| 12 | Linking of Spatial and Attribute Data |
| 13 | Integration of GIS and RS, civil engineering application |

# B. Tech. (Civil Engineering) Programme

# SYLLABI

**(Semester – 8)**

**CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY**

## CL 446: CONSTRUCTION PROJECT MANAGEMENT

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Theory | Practical | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction to Construction Project Management | 07 |
| 2 | Project Feasibility Study | 03 |
| 3 | Management Techniques | 05 |
| 4 | Project Management Through Networks | 05 |
| 5 | Critical Path Method | 10 |
| 6 | Program Evaluation and Review Technique (PERT) | 05 |
| 7 | Resource Allocation and Resource Scheduling | 05 |
| 8 | Contracts and Tender | 05 |

**Total Hours (Theory): 45**

**Total Hours (Lab): 30**

**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction to Construction Project Management** **07 Hours** **15%**

1.1 Introduction to Construction Management

1.2 Necessity, objectives of construction management

1.3 Unique features of Construction Project

1.4 Stages in construction project management, Factors affecting various stages of construction management

1.5 Construction Resources

1.6 Function of Construction Management

1.7 Causes of failures construction projects and its relevance with construction management

| | | | |
|---|---|---|---|
| **2** | **Project Feasibility Study** | **03 Hours** | **6%** |
| 2.1 | Need of Project Feasibility Study | | |
| 2.2 | Technical Analysis | | |
| 2.3 | Financial Analysis | | |
| 2.4 | Economic Analysis | | |
| 2.5 | Ecological Analysis | | |
| **3** | **Management Techniques** | **05 Hours** | **11%** |
| 3.1 | Work Breakdown structure for various projects | | |
| 3.2 | Gantt or Bar chart | | |
| 3.3 | Mile stone Chart | | |
| 3.4 | Line of Balance technique | | |
| **4** | **Project Management Through Networks** | **05 Hours** | **11%** |
| 4.1 | Definition and Objective of network techniques | | |
| 4.2 | Types of network | | |
| 4.3 | Elements of network like activity, dummy and event | | |
| 4.4 | Interrelationship of Events, Interrelationship of Activity | | |
| 4.5 | Network Rules and Fulkerson's rule for Numbering Events | | |
| 4.6 | Advantages of Network techniques over conventional techniques | | |
| **5** | **Critical Path Method** | **10 Hours** | **24%** |
| 5.1 | Introduction | | |
| 5.2 | Activity Time estimate-EST, LST, EFT, LFT | | |
| 5.3 | Event time estimate- $T_E$, $T_L$ | | |
| 5.4 | Critical activities, Critical path and Floats | | |
| 5.5 | Cost optimization by crashing a Network | | |
| 5.6 | Updating of CPM Network | | |
| **6** | **Program Evaluation and Review Technique (PERT)** | **05 Hours** | **11%** |
| 6.1 | PERT Network : Introduction , Difference between PERT and CPM | | |
| 6.2 | Expected time, frequency distribution, mean, variance and standard deviation | | |
| 6.3 | PERT Network Analysis | | |
| **7** | **Resource Allocation and Resource Scheduling** | **05 Hours** | **11%** |
| 7.1 | Introduction | | |

7.2 Resource smoothing

7.3 Resource leveling

**8 Contracts and Tender** **05 Hours** **11%**

8.1 Contract- definition , Essentials of contract

8.2 Types of contract & Suitability for construction projects

8.3 Tender – definition, Tender Notice and Tender submission

8.4 Opening of tender, Scrutiny of tender, Acceptance of tender

8.5 Rejection of Tender

**C. Learning Outcomes:**

On the successful completion of this course, the students will be able to:

CO1 Explain various functions of construction management.

CO2 Identify alternative methods of course of action and select best course of action through feasibility analysis of construction project.

CO3 Apply basic principles of management and its applications in construction industry.

CO4 Estimate, analyze and control project durations by using various management techniques like Bar Charts, PERT and CPM in construction industry

CO5 Manage resources through cost time trade off, updating, rescheduling and compressing with applications in construction industry.

CO6 Understand and apply knowledge of the tendering procedure and various construction contract systems.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | - | - | - | - | - | 2 | - | - | - | - | 3 | - | - | 2 | - |

## CL 447: WATER RESOURCES ENGINEERING - II

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the course:**

| Sr. No. | Title of the unit | Minimum number of hours |
|---|---|---|
| 1. | Dams | **14** |
| 2. | Reservoir | **09** |
| 3. | Diversion Head Works | **06** |
| 4. | Spillways & Energy Dissipators | **04** |
| 5. | Canal Irrigation System | **08** |
| 6. | Cross Drainage Works & Outlets | **02** |
| 7. | Canal Regulation Works | **02** |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Dams** **14 Hours** **32%**

1.1 Definition, classification, factors affecting selection of type of dam

1.2 Selection & investigation of site for a dam

1.3 Earth dams - Types, foundation requirements, causes of failure, design criteria, suitable preliminary sections, seepage line determination & analysis, stability analysis - side slope, foundation, checking of stability, seepage control measures

| | | | |
|---|---|---|---|
| 1.4 | Rockfill dams - Foundation requirements, typical sections, design consideration for a rockfill dam | | |
| 1.5 | Gravity dam - Definition, forces acting on dams, load combination for design, modes of failure & criteria for structural stability, stability analysis, elementary & practical profile, design of gravity dam, openings in dams | | |
| **2** | **Reservoir** | **09 Hours** | **20%** |
| 2.1 | Definition, types, site selection factors | | |
| 2.2 | Capacity-elevation and area elevation curves of a reservoir site, derivation & examples based on topic | | |
| 2.3 | Storage zones | | |
| 2.4 | Reservoir capacity - Catchment yield and reservoir yield, determination of dependable catchment yield of reservoir, fixing the reservoir capacity for the computed value of the dependable yield of the reservoir catchment, relation between the inflow, outflow and storage data for a reservoir, fixing the reservoir capacity from the annual inflow and outflow data, mass curve and demand curve | | |
| 2.5 | Reservoir losses | | |
| 2.6 | Reservoir sedimentation and control | | |
| 2.7 | Reservoir clearance | | |
| **3** | **Diversion Head Works** | **06 Hours** | **13%** |
| 3.1 | Classification of head works | | |
| 3.2 | Types & components of diversion head works | | |
| 3.3 | Location & typical layout of diversion headworks | | |
| 3.4 | Difference between dam, weir and barrage | | |
| 3.5 | Types of weirs with merits and demerits | | |
| 3.6 | Criteria for designing weir and barrage | | |
| 3.7 | Theories of subsurface flow - Bligh's creep theory, Lane's weighted creep theory, theory of seepage flow (critical gradient), Khosla's theory | | |

| | | | |
|---|---|---|---|
| **4** | **Spillways & Energy Dissipators** | **04 Hours** | **9%** |
| 4.1 | Spillways - Definition, location, essential requirements, components, classification | | |
| 4.2 | Energy Dissipators - Formation & types of hydraulic jump; Jump Height Curve (JHC), Tail Water Rating Curve (TWRC) and alternatives of JHC & TWRC, types of energy dissipators | | |
| **5** | **Canal Irrigation System** | **08 Hours** | **18%** |
| 5.1 | Classification of canals, alignment | | |
| 5.2 | Distribution system | | |
| 5.3 | Cross section and longitudinal sections of canals | | |
| 5.4 | Design of unlined canal in alluvial & non-alluvial soils | | |
| 5.5 | Design of channel using Kennedy's Garrat's diagram & Lacey's regime diagram | | |
| 5.6 | Canal lining & design | | |
| **6** | **Cross Drainage Works & Outlets** | **02 Hours** | **4%** |
| 6.1 | Cross Drainage Works - Definition, types, selection criteria | | |
| 6.2 | Outlets - Definition, requirements, types | | |
| **7** | **Canal Regulation Works** | **02 Hours** | **4%** |
| 7.1 | Falls - Definition, necessity, location, types | | |
| 7.2 | HR & CR - Definition, functions | | |
| 7.3 | Escapes - Definition, necessity, types | | |

**C. Course Outcomes:**

On the completion of the course one should be able to:

CO1 Understand concepts of different hydraulic structures.

CO2 Plan and design irrigation projects.

CO3 Design channels and other irrigation structures required for irrigation, drainage, soil etc.

CO4 Develop Conservation, flood control and other water-management projects.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 2 | 3 | - | 3 | - | - | - | - | - | 1 | - | 1 | - | 1 | - |
| CO2 | 1 | 2 | 3 | 2 | 2 | 3 | 3 | 2 | 3 | 2 | 1 | 1 | 3 | 2 | 2 |
| CO3 | 1 | 2 | 3 | 2 | 1 | 2 | 1 | 2 | 3 | 2 | 1 | 1 | 3 | 2 | 2 |
| CO4 | - | - | 3 | 2 | 1 | 3 | 3 | 2 | 3 | 2 | 1 | 3 | 3 | 2 | 3 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

**Text Books:**

1. Garg, S.K., Irrigation Engineering and Hydraulic Structures, Khanna Publishers, New Delhi.
2. Modi, P.N., Irrigation Water Resources and Water Power Engineering, Standard Book House, New Delhi.
3. Punmia and Pande, Lal, B.B., Irrigation and Water Engineering, Standard Publishers Distributors, New Delhi.

**Reference Books:**

2. http://nptel.ac.in

**List of Experiments**

| Experiment No. | Name of Experiment |
|---|---|
| 1 | Stability Analysis of an Earth dam<br>**Sheet 1**: Analysis of Earth dam by Fellenious ( slip circle ) method |
| 2 | Design and Stability Analysis of a Gravity dam<br>**Sheet 2**: Gravity Dam Design and analysis |

| | |
|---|---|
| 3 | Diversion Head Works |
| 4 | Spillways & Energy Dissipaters |
| 5 | Canal Design<br>**Sheet 3**: Canal sections in Alluvial soil<br>( i ) Canal in cutting,<br>( ii ) Canal in filling and<br>( iii ) Canal in embankment |
| 6 | Cross drainage works, outlets and canal regulation works |
| 7 | Reservoirs |

## CL 448: PROFESSIONAL PRACTICES

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/ Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours / Week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1. | Estimation | **05** |
| 2. | Rules & Method of Measurement | **04** |
| 3. | Detailed Quantity Estimation | **30** |
| 4. | Specification | **04** |
| 5. | Rate Analysis | **07** |
| 6. | Valuation | **10** |

**Total Hours (Theory): 60**
**Total Hours (Lab): 30**
**Total Hours: 90**

**B. Detailed Syllabus:**

**1. Estimation** **05 Hours** **8%**

1.1 General

1.2 Purpose of estimates

1.3 Types of estimates

1.4 Approximate estimate, general principle of approximate estimate, Construction cost index, approximate method of costing for buildings, water supply and sanitary works.

1.5 Detail estimate, data required for detail estimate, preparation of detail estimate, Standard measurement form, Abstract of

measurement. Factors to be consider during preparation of a detailed estimate.

1.6 Procedure of estimate

1.7 Quantity estimate, Revised estimate, Supplementary estimate, complete estimate and Annual maintenance or repair estimate Data required for sanction of project, Administrative approval, expenditure sanction, Technical Sanction

**2 Rules and Methods of Measurement** **04 Hours** **6%**

2.1 General rules which are applicable during the calculation of quantity for different associated items

2.2 Principles in selecting units of measurement for items, various units and standard modes of measurement for different item of work and materials as per IS:1200 revised

2.3 Deduction criteria for various item of works

**3. Detailed Quantity Estimation** **30 Hours** **50%**

3.1 Building Estimate: General items of work for building estimate and their units of measurements, long wall short wall and centre line methods.

- Estimation of quantity of load bearing structure.
- Quantity analysis of R.C.C. component: footing, column, lintel, chajja, beam, slab, with schedule of bar bending, material estimate.
- Quantity analysis of steel roof truss
- Abstract preparation

3.2 Estimate of retaining wall,

3.3 Estimate of a septic tank and soak pit including sanitary and water supply installations

3.4 Road work: Estimation of earthwork for roads. Estimates of Metalled road, Estimate of village road culvert

3.5 Irrigation work: Estimation of earthwork for canal. Quantity of lining work for canal. Estimate of aqueduct.

| | | | |
|---|---|---|---|
| **4** | **Specifications** | **04 Hours** | **7%** |
| 4.1 | Definition | | |
| 4.2 | Objective, importance, use, types of specification | | |
| 4.3 | General and special specification | | |
| 4.4 | Specification for material and workmanship | | |
| 4.5 | Design and principles of specification | | |
| 4.6 | Sources of information | | |
| 4.7 | Typical specification of various item of works | | |
| **5** | **Rate Analysis** | **07 Hours** | **12%** |
| 5.1 | Rate analysis and requirement of the rate analysis | | |
| 5.2 | Factors affecting rate analysis | | |
| 5.3 | Method of preparation of rate analysis of work | | |
| 5.4 | Quantity of materials per unit rate of work | | |
| 5.5 | Estimating Labor | | |
| 5.6 | Cost of equipment or tools and plants | | |
| 5.7 | Overhead expenses | | |
| 5.8 | Contractor Profit | | |
| 5.9 | Task of work | | |
| 5.10 | Load of trucks | | |
| 5.11 | Rate analysis of all typical items of works for building construction | | |
| **6** | **Valuation** | **10 Hours** | **17%** |
| 6.1 | Valuation, value, price and cost, purpose and principle of valuation | | |
| 6.2 | Different form of value | | |
| 6.3 | Mortgage and lease | | |
| 6.4 | Freehold and Leasehold property | | |
| 6.5 | Sinking Fund, depreciation, types of depreciation | | |
| 6.6 | Year of purchase | | |
| 6.7 | Outgoings | | |
| 6.8 | Methods of Valuation | | |
| 6.9 | Rent Fixation | | |

**D. Course Outcomes:**

On the successful completion of this course

CO1 The students will get a diverse knowledge of estimating, costing and professional practice, which will be use full in tackling real life problems.

CO2 The students will be able to understand the procedure to carry out the estimation and steps to prepare reports of the construction works.

CO3 The students will learn the purpose and importance of valuation

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

## CL 449: DESIGN OF STRUCTURES-II

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 4 | 2 | 6 | 5 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Analysis & Design of Multi-storied Building | 16 |
| 2 | Design of Retaining Wall | 10 |
| 3 | Design of Intze Tank | 06 |
| 4 | Design of Steel Beam | 05 |
| 5 | Design of Plate Girder | 07 |
| 6 | Design of Gantry Girder | 08 |
| 7 | Analysis & Design of Roof Truss | 08 |

**Total Hours (Theory): 60**
**Total Hours (Lab): 30**
**Total Hours: 90**

**B. Detailed Syllabus:**

**1 Analysis & Design of Multi-storied Building 16 Hours 27%**

1.1 Framed Buildings

1.2 Loads, Distribution of Loads, Combination of Loads

1.3 Structural Layout of Building

1.4 Gravity Loads Analysis

1.5 Typical Floor Design

1.5.1 Design of Slab

1.5.2 Design of Beams

1.5.3 Analysis and Design of Column

1.5.4 Design of Combined Footing

| | | | |
|---|---|---|---|
| 1.6 | Classifications of Stairs | | |
| | 1.6.1 Design Requirements of Stairs | | |
| | 1.6.2 Design of Dog-legged Stair | | |
| 1.7 | Detailing of Members | | |
| **2** | **Design of Retaining Wall** | **10 Hours** | **17%** |
| 2.1 | Types of Retaining Wall | | |
| 2.2 | Active & Passive Earth Pressure | | |
| 2.3 | Design of Cantilever Retaining Wall | | |
| 2.4 | Design of Counter fort Retaining Wall | | |
| **3** | **Design of Intze Tank** | **06 Hours** | **10%** |
| 3.1 | Introduction | | |
| 3.2 | Analysis and Design | | |
| 3.3 | Reinforcement in Cylindrical Wall | | |
| 3.4 | Wind Forces on Container and Staging | | |
| 3.5 | Checking of Column Design for Wind Loads | | |
| **4** | **Design of Steel Beam** | **05 Hours** | **08%** |
| 4.1 | Beam Type, Section Classification, Lateral Stability, Effective Length | | |
| 4.2 | Design of Laterally Supported Beams in Bending | | |
| 4.3 | Design of Laterally Un-Supported Beams | | |
| 4.4 | Shear Behaviour | | |
| 4.5 | Web Buckling and Web Crippling | | |
| **5** | **Design of Plate Girder** | **07 Hours** | **12%** |
| 5.1 | Introduction | | |
| 5.2 | Components of Plate Girder | | |
| 5.3 | Buckling of Plate Elements | | |
| 5.4 | Buckling of Web Plate | | |
| 5.5 | Requirements of Plate Girder Components | | |
| 5.6 | Design of Plate Girder | | |
| **6** | **Design of Gantry Girder** | **08 Hours** | **13%** |
| 6.1 | Introduction | | |
| 6.2 | Loads on Gantry Girder | | |
| 6.3 | Maximum Load Effects | | |

6.4 Selection of Gantry Girder

6.5 Design of Gantry Girder

**7 Analysis & Design of Roof Truss 08 Hours 13%**

7.1 Selection of the Type of Truss, Spacing of Truss

7.2 Panel Layout of Truss

7.3 Loads on the Roof Truss, Load Combinations

7.4 Analysis of Roof Truss, Deflection of Truss

7.5 Selection of Sections, Connections

7.6 End Bearings, Bracing of Truss

7.7 Design of Roof Truss

**C. Students Learning Outcomes:**

At the end of the course, the students will be able to

CO1 Recognize the design philosophy of steel and reinforced cement concrete structures.

CO2 Apply methods and computer software to analyze Multi-storey Building.

CO3 Identify the typical failure modes of staircase, retaining walls and combined footing with detailing.

CO4 Understand the behavior of tanks under forces and application of design with detailing.

CO5 Give economical design of girder considering the effects of bending and shear with proper connections.

CO6 Understand the force transfer mechanism of roof truss and economical design of members.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

4. S.S. Bhavikatti, Design Of Steel Structures (By Limit State Method As Per IS: 800), I. K. International Pvt Ltd,.
5. V L Shah,Veena Gore, Limit State Design of Steel Structures, Structures publications.

**IS Specifications:**

1. IS: 456, Plain and Reinforced Concrete-Code of Practice
2. IS: 875 (Part 1 to 5), Code of Practice for Design Loads
3. IS: 800, General Construction in Steel- Code of Practice
4. SP 16, Design Aids for Reinforced Concrete to IS: 456
5. SP 34, Handbook on Concrete Reinforcement and Detailing
6. SP 6, Handbook for Structural Engineers

**Term Work:**

1. Analysis & Design of Multi-storied Building along with Detailing of Structural Elements in Drawing Sheet
2. Design of Cantilever and Counterfort Retaining Wall
3. Design of Intze Tank
4. Design of Steel Beam
5. Design of Plate Girder
6. Design of Gantry Girder
7. Design of Roof Truss
8. Drawing Sheets of Multi-storied Building, Cantilever and Counterfort Retaining Wall, Intze Tank, Roof Truss

## CL 450: PROJECT

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

**Credit and Hours:**

| Teaching Scheme | Project | Total | Credit |
|---|---|---|---|
| Hours/Week | 30 | 150 | 5 |
| Marks | 150 | 150 | |

**A. Outline of the Course:**

| Sr. No | Title of Unit | Percentage weightage % |
|---|---|---|
| 1. | Selection of the Project Topic | **05** |
| 2. | Progress of Project | **20** |
| 3. | Report Writing | **50** |
| 4. | Presentation | **25** |

**B. Detailed Syllabus:**

**1. Selection of the Project Topic** **05%**

1.1 Type of Project will be assigned to a student / group of students based on their inclination / willingness / interest

**2. Progress of Project** **20%**

2.1 Students should report to respective project mentor at every week regarding the progress of the respective project

**3. Report Writing** **50%**

3.1 The students are required to prepare a report including the Preamble, Objectives, Scope, Study Area Selection, Activities learned during project, Design or any task to be asked to performed by mentor, Conclusions, Recommendations and Annexure of the concerned project

**4. Presentation** **25%**

4.1 At the end of the semester presentation will be prepared by student/group of students to evaluate the project.

**C. Learning Outcomes:**

After completion of the course students will able to:

CO1 Apply knowledge and skills learned in company/industry/organization to solve engineering problems.

CO2 Work in a team with teammates from other disciplines.

CO3 Use experience related to professional and ethical issues in the work environment.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 1 | 2 | 1 | 1 | 1 | 1 | - | - | - | 3 | 1 | 1 | 1 | 1 | - |
| CO2 | - | - | - | - | - | - | - | - | 3 | - | - | - | - | - | 1 |
| CO3 | - | - | - | - | - | - | - | 2 | - | - | - | - | - | - | 1 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

- Project related study is to be carried out by each student/group of students.
- Reference Books/Text Books
- e – Books
- e – Journals
- IS-Codes

**CL 481: DESIGN OF STRUCTURES USING INTERNATIONAL CODES**

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

PROGRAMME ELECTIVE - IV

**Credits and Hours:**

| Teaching Scheme | Theory | Practical / Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1. | Overview of ACI 318 | 15 |
| 2. | Euro code 2 – Design of concrete Structures | 30 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Overview of ACI 318** **15 Hours 33%**

1.1 Standards for tests and materials

1.2 Construction Requirements: Durability, Concrete quality, mixing and placing, Formwork, Embedded pipes and construction joints

Details of Reinforcement

1.3 General Requirements : Analysis and design- general considerations, Strength and serviceability requirements, Flexural and axial loads, Shear and Torsion

1.4 Structural Systems or Elements: two way Slab systems, Walls, Footings, Composite concrete flexural members

1.5 Informatives: Appendix C (Alternative load and strength reduction factor), Appendix E (Steel reinforcement information)

**2 Euro code 2 – Design of Concrete Structures** **30 Hours** **67%**

2.1 Scope of Euro code 2

2.2 Materials : Concrete, Reinforcing steel, Design compressive and tensile strengths, Ductility characteristics

2.3 Durability and cover to reinforcement: Requirements for durability, Methods of verifications, Minimum cover

2.4 Ultimate Limit States (ULS): Bending with or without axial force, Shear, Members not requiring design shear reinforcement, Members requiring design shear reinforcement, Shear between web and flanges of T-sections, Shear at the interface between concrete cast at different times, Shear and transverse bending, Torsion, Design procedure

2.5 Serviceability Limit States (SLS): Stresses, Crack control, General considerations, Minimum reinforcement areas, Control of cracking without direct calculation, Calculation of crack widths, Deflection control, General considerations, Cases where calculations may be omitted.

2.6 Detailing of members and particular rules: General, Beams, Shear reinforcement, Columns, Transverse reinforcement, Deep beams, Foundations,

2.7 Informatives: Annexure A (Modification of partial factors for materials), Annexure B (Creep and shrinkage strain), Annexure C (Properties of reinforcement suitable for use with this Euro code), Annexure E (Indicative strength classes for durability), Annexure F (Tension reinforcement expressions for in-plane stress conditions), Annexure J (Detailing rules for particular situations)

**C. Course Outcomes:**

On the completion of the course the students will be able to:

CO1 Understand and design reinforced concrete structures by using the concepts of Euro code.

CO2 Understand and design reinforced concrete structures by using the concepts of ACI code.

CO3 Deal with design procedures with different fundamentals.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 3 | 2 | 3 | 2 | 2 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 3 | 1 | 1 |
| CO2 | 3 | 2 | 3 | 2 | 2 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 3 | 1 | 1 |
| CO3 | 2 | 2 | 3 | - | - | 1 | - | 1 | 1 | - | - | - | 1 | - | - |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**CL 482: FIELD APPLICATIONS OF GEOTECHNICAL ENGINEERING**
B. TECH 8th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE - IV

**Credits and Hours:**

| Teaching Scheme | Theory | Tutorial/ Practical | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Reinforced Soil Structures | 10 |
| 2 | Ground Improvement Techniques | 12 |
| 3 | Foundation of Marine Structures | 09 |
| 4 | Geosynthetics in Civil Engineering | 06 |
| 5 | Remote Sensing Applications in Geotechnical Engineering | 08 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Reinforced Soil Structures** **10 Hours** **22%**

1.1 Concept of soil reinforcement
1.2 Reinforcing materials and their properties
1.3 Design of soil reinforcement for stability
1.4 Durability of reinforcement materials
1.5 Applications of Reinforced earth structures

**2 Ground Improvement Techniques** **12 Hours** **27%**

2.1 Principles of ground improvement
2.2 Properties of compacted soil, Compaction control tests.

| | | | |
|---|---|---|---|
| 2.3 | Mechanical Stabilization - Principle of mechanical modification, Dynamic Stabilization, Vibro-floatation, Pre-compression and Compaction piles. | | |
| 2.4 | Hydraulic modification, Dewatering systems, Preloading and vertical drains, Sand Drain, Electro-kinetic dewatering | | |
| 2.5 | Chemical modification, Modification by admixtures | | |
| 2.6 | Bearing capacity & Slope stability improvement | | |
| **3** | **Foundation of Marine Structures** | **09 Hours** | **20%** |
| 3.1 | Origin, Nature and distribution of marine soils and their engineering properties | | |
| 3.2 | Sampling and sample disturbance, In-situ testing of marine soil | | |
| 3.3 | Offshore platforms | | |
| 3.4 | Shallow foundations on marine soil | | |
| 3.5 | Deep foundations on marine soil | | |
| **4** | **Geosynthetics in Civil Engineering** | **06 Hours** | **13%** |
| 4.1 | Introduction - An overview on the development and applications various geosynthetics, geotextiles, geogrids, geonets, geomembranes and geo-composites. | | |
| 4.2 | Designing with geotextiles - Geotextile properties and test methods, functions, designing for separation, reinforcement, stabilization, filtration, and drainage. | | |
| 4.3 | Different test on geosynthetics | | |
| **5** | **Remote Sensing Applications in Geotechnical Engineering** | **08 Hours** | **18%** |
| 5.1 | Definitions and introduction to remote sensing | | |
| 5.2 | Components of remote sensing system, | | |
| 5.3 | Active and passive remote sensing, electromagnetic radiations and their interactions with the earth features and atmosphere. Spectral windows and spectral signatures and their significance in remote sensing | | |
| 5.4 | Radiometric quantities used in the collection of spectral signatures | | |
| 5.5 | Remote sensing satellite orbits, image acquisition process | | |

5.6 Various remote sensing platforms like ground based, air borne and satellite based. Passive and active remote sensors

**C. Course Outcomes:**

On successfully completion of the course, students will be able to

CO1 Evaluate soil properties by performing various experiments

CO2 Carry out soil classification,

CO3 Solve practical problems related to permeability, seepage and consolidation settlement,

CO4 Relate soil properties to workout theoretical soil strength with confidence.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

**CL 483: STRUCTURAL DYNAMICS & EARTHQUAKE ENGINEERING**
B. TECH 8th SEMESTER (CIVIL ENGINEERING)
PROGRAM ELECTIVE- IV

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/ Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Theory of vibrations | 15 |
| 2 | Earthquake Basics & Design Philosophy | 08 |
| 3 | Lateral Load Analysis of Building | 10 |
| 4 | Ductile Detailing | 06 |
| 5 | Special Topics | 06 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Theory of vibrations** **15 Hours** **34%**

1.1 Introduction, Difference between Static and Dynamic load, Basic Terminologies

1.2 Simplified single degree of freedom system, mathematical modeling of buildings, natural frequency, resonance v/s increased response

1.3 Responses of buildings to different types of vibrations like free and forced, damped and un-damped

1.4 Response to multi degree (maximum three) of freedom systems, mode shapes

| | | | |
|---|---|---|---|
| **2** | **Earthquake Basics & Design Philosophy** | **08 Hours** | **18%** |
| 2.1 | Introduction of Earthquake, Definitions of basic terms | | |
| 2.2 | Causes of earthquake and their characteristics, Seismographs, Seismic Zoning practices in India, Seismic Codes | | |
| 2.3 | Earthquake parameters, Characterization of ground motion | | |
| 2.4 | Earthquake Intensity & Magnitude, Recording | | |
| 2.5 | Philosophy of earthquake resistant design, earthquake proof v/s earthquake resistant design | | |
| 2.6 | Four virtues of earthquake resistant (strength, stiffness, ductility and configuration), Seismic structural | | |
| 2.7 | Damages caused during past earthquakes (worldwide) | | |
| **3** | **Lateral Load Analysis of Building** | **10 Hours** | **22%** |
| 3.1 | Lateral analysis of the building systems, Lateral load distribution, | | |
| 3.2 | Torsionally coupled and un-coupled systems | | |
| 3.3 | Design Lateral Loads for RC Building<br>Concept of Response Spectra, Design Response Spectrum | | |
| 3.4 | Equivalent lateral load concept, Rigid floor diaphragm, Codal Provisions | | |
| **4** | **Ductile Detailing** | **06 Hours** | **13%** |
| 4.1 | Concept of ductile detailing, IS 13920 provisions for RC frame. | | |
| **5** | **Special Topics** | **06 Hours** | **13%** |
| 5.1 | Introduction of different control systems - Passive control: base isolation and active control: bracing system, TMD and some latest invention | | |
| 5.2 | Soil liquefaction, causes and its remedial measure | | |
| 5.3 | Introduction to Disaster Management - Types of Disaster, Phases of disaster management, Disaster rescue, psychology and plan of rescue operations | | |

**C. Course Outcomes:**

On the successful completion of this course the students will be able to

CO1 Understand causes, types and measurement of an earthquake.

CO2 Develop response spectrum for earthquake ground motion and estimate lateral load on the structures as per codal stipulations.

CO3 Analyse and design various lateral load resisting systems.

CO4 Appraise concept of ductility and related codal specification for earthquake resistant design.

CO5 Understand basic earthquake mechanisms, tectonics, types of ground motion, and propagation of ground motion and interpret earthquake ground motion data.

**Course Articulation Matrix:**

## CL 484: TRANSPORT PROJECT PLANNING & EVALUATION

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

PROGRAMME ELECTIVE - IV

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/ Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction | 02 |
| 2 | Travel Survey and Traffic Impact Assessment | 04 |
| 3 | Transportation Planning Process and Modeling | 15 |
| 4 | Public to Transportation Systems | 07 |
| 5 | Transportation System Management | 04 |
| 6 | Travel Demand, Elastic Model and Demand Management | 04 |
| 7 | Project Formulation and Evaluation Techniques | 06 |
| 8 | Introduction Transportation Engineering Softwares | 03 |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction** **02 Hours** **4%**

1.1 Introduction to planning

1.2 Levels of planning, Objectives & goals of planning

1.3 Road Infrastructure planning and evaluation of projects

1.4 Planning Morphology

**2 Travel Survey and Traffic Impact Assessment** **04 Hours** **9%**

2.1 Travel Survey: Travel Survey Process

| | | | |
|---|---|---|---|
| 2.2 | Travel Survey: Data Processing and Interpretation, Future Methodologies | | |
| 2.3 | Traffic Impact Assessment: Content of TIA | | |
| 2.4 | Traffic Impact Assessment: TIA and Transportation Planning | | |
| **3** | **Transportation Planning Process and Modeling** | **15 Hours** | **33%** |
| 3.1 | Conventional and Four Stage Modeling Process | | |
| 3.2 | Trip Generation Models | | |
| 3.3 | Trip Distribution Models and Calibration | | |
| 3.4 | Trip Assignment Models | | |
| 3.5 | Mode Choice and Modal Split Models. | | |
| **4** | **Public Transportation Systems** | **07 Hours** | **16%** |
| 4.1 | Introduction to public transportation systems | | |
| 4.2 | Transit Classification and Right of way | | |
| 4.3 | Transit System Performance: Transit Capacity, Frequency and Headway, Quality of Service | | |
| 4.4 | Bus Rapid Transit: System, Technology and Operation | | |
| 4.5 | Rail Rapid Transit: System, Technology and Operation | | |
| 4.6 | Multi-modal Transportation System | | |
| **5** | **Transportation System Management** | **04 Hours** | **9%** |
| 5.1 | Introduction to TSM | | |
| 5.2 | Need, scope and Strategies for TSM | | |
| 5.3 | TSM planning & classification | | |
| **6** | **Travel Demand, Elastic Model and Demand Management** | **04 Hours** | **9%** |
| 6.1 | Demand Management | | |
| 6.2 | Elastic Model: Types of elasticity, Sensitivity & elasticity | | |
| 6.3 | Sensitivity of travel demand, Factors affecting Elasticity | | |
| 6.4 | Demand Model- Kraft Demand Model | | |
| 6.5 | Traffic Management Measures | | |
| 6.6 | Advantages and Disadvantages | | |
| **7** | **Project Formulation and Evaluation Techniques** | **06 Hours** | **14%** |
| 7.1 | Surveys and Investigations- Traffic Surveys, Conventional Ground Survey, Drainage Study, Soil Investigation, Pavement Design Investigation | | |

| | | | |
|---|---|---|---|
| 7.2 | Design Drawing, Estimate and Project Report- Design, Drawing, Estimate, Earthwork Quantities, Project Reports, Stages in project preparation | | |
| 7.3 | Transport Pricing- Methods of road pricing, Transport costs, Elasticity of demand, Average cost and Marginal cost pricing, Pricing Policy, Congestion Pricing, Public and Private Transport Pricing | | |
| **8** | **Introduction to Transportation Engineering Softwares** | **03 Hours** | **6%** |
| 8.1 | Introduction | | |
| 8.2 | Mx Road, TransCAD | | |
| 8.3 | IIT Pave, VISSIM, VISUM | | |
| 8.4 | HDM4 | | |

**C. Course Outcomes:**

The course contents should be taught with the aim to develop required knowledge and skills so that they are able to acquire following competency:

| | |
|---|---|
| CO1 | The students would be able to understand and evaluate current scenarios of traffic management and improve it and they will gain the skill for collecting data about travel behaviour and analyzing the data for use in transport planning. |
| CO2 | Basic understanding of what transportation planning is, its theoretical backgrounds and applications |
| CO3 | Students would be aware of the Principles and Planning of Transportation Infrastructure and would also be able to correlate economy and growth of transportation sector along with basic knowledge to quantify the benefits from well-developed transportation facilities. |
| CO4 | The students would have knowledge on planning of various transit systems like bus and rail, their scheduling and management strategies. |
| CO5 | Students would be equipped with the economic principles in dealing with transport supply and demand and would have gained knowledge on various Transportation software tools and their application in solving transportation problems on a real time basis. |

## List of Tutorials

| Tutorial No. | Name of Tutorial |
|---|---|
| 1 | Introduction |
| 2 | Travel Survey and Traffic Impact Assessment |
| 3 | Transportation Planning Process and Modeling |
| 4 | Public Transportation Systems |
| 5 | Transportation System Management |
| 6 | Travel Demand, Elastic Model and Demand Management |
| 7 | Project Formulation and Evaluation Techniques |
| 8 | Introduction to Transportation Engineering Softwares |

**CL 485: WATERSHED MANAGEMENT**
B. TECH 8th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE - IV

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the course:**

| Sr. No. | Title of the unit | Min. no. of hours |
|---|---|---|
| 1. | Introduction and basic concepts | **04** |
| 2. | Watershed modelling | **07** |
| 3. | Soil Erosion Modelling | **05** |
| 4. | Management of Water Quality | **06** |
| 5. | Storm Water and Flood and Drought Management | **06** |
| 6. | Integrated Watershed Management | **07** |
| 7. | Urban Storm-water Management | **05** |
| 8. | Use of modern techniques in watershed management | **05** |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Introduction and basic concepts** **04 Hours 09%**

1.1 What is Watershed, Watershed management, historical look at watershed management

1.2 Basic hydrology, occurrence and movement of water

1.3 Human interventions to manage water flow or quality

**2 Watershed modeling** **07 Hours 16%**

2.1 Standard modeling approaches and classifications

2.2 System concept for watershed modeling

| | | | |
|---|---|---|---|
| 2.3 | Modeling of rainfall-runoff process, subsurface flows and groundwater flow | | |
| **3** | **Soil Erosion Modeling** | **05 Hours** | **11%** |
| 3.1 | Soil Erosion, Soil water Relationship | | |
| 3.2 | Types and causes of soil erosion, Estimation of soil erosion | | |
| 3.3 | Different methods to control soil erosion | | |
| **4** | **Management of Water Quality** | **06 Hours** | **13%** |
| 4.1 | Water quality and pollution, types and sources of pollution | | |
| 4.2 | Water quality modeling | | |
| 4.3 | Environmental guidelines for water quality | | |
| **5** | **Storm Water and Flood and Drought Management** | **06 Hours** | **13%** |
| 5.1 | Storm water management, design of drainage system, | | |
| 5.2 | Estimation of design flood and design droughts in a watershed | | |
| 5.3 | Flood routing through channels and reservoir, flood control and reservoir operation | | |
| 5.4 | Drought assessment and classification, drought analysis techniques | | |
| 5.5 | Drought mitigation planning | | |
| **6** | **Integrated Watershed Management** | **07 Hours** | **16%** |
| 6.1 | Introduction to integrated approach, conjunctive use of water resources | | |
| 6.2 | Rainwater harvesting, Different methods of water harvesting | | |
| 6.3 | Proposed water harvesting in India through interlinking of rivers | | |
| **7** | **Urban Stormwater Management** | **05 Hours** | **11%** |
| 7.1 | Issues pertaining to watershed management in urban environments | | |
| 7.2 | Methods to control pollution from urban stormwater | | |
| 7.3 | Measures to control urban stormwater pollution | | |

**8 Use of modern techniques in watershed management 05 Hours 11%**

8.1 Applications of Geographical Information System(GIS) and Remote Sensing(RS) in Watershed Management

8.2 Role of RS and GIS in in Watershed Management and Decision Support System

**C. Course Outcomes:**

On the completion of the course one should be able to:

CO1 Understand the fundamental principles and concepts of watershed management.

CO2 Apply various approaches towards storm water management, rainwater harvesting, and flood and drought management.

CO3 Apprehend soil erosion, watershed modelling, and water quality problems.

CO4 Attest the concept of integrated watershed management.

CO5 Corroborate for development and planning of watershed.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 2 | 1 | 1 | 1 | - | 1 | 1 | - | - | - | 1 | 2 | 1 | 1 | - |
| CO2 | 3 | 2 | 1 | 1 | - | 2 | 1 | - | - | - | 1 | 2 | 1 | 1 | - |
| CO3 | 3 | 2 | 2 | 2 | 2 | 2 | 2 | - | - | - | 2 | 2 | 1 | 2 | 1 |
| CO4 | 3 | 3 | 3 | 2 | 2 | 3 | 3 | - | 1 | - | 3 | 2 | 2 | 1 | 2 |
| CO5 | 3 | 2 | 3 | 3 | 2 | 3 | 3 | 1 | 1 | 1 | 3 | 3 | 2 | - | 2 |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

**Text Books**:

1. Watershed Management by J.V.S. Murthy New Age Publishers
2. Watershed Management by Madan Mohan Das, PHI Publication

**Reference Books:**

1. Watershed management: Guidelines for Indian Conditions by E.M. Tideman, Omega Scientific Publishers.
2. Hydrology and Soil Conservation Engineering by Ghanshyam Das, Prentice Hall India.

3. Watershed Planning & Management by Dr. Rajvir Singh, Yash Publishing House.
4. Watersheds - Processes, Assessment and Management by Pau A. Debarry, John Wiley & Sons.

## List of Experiments

| Experiment No. | Name of Experiment |
|---|---|
| 1 | Introduction to Sampling in water and wastewater analysis |
| 2 | Determination of BOD/COD ratio |
| 3 | Monitoring of Noise |
| 4 | Determination of PM10 and PM2.5 in ambient air |
| 5 | Determination of gaseous pollutants in ambient air |
| 6 | Determination of various parameters in solid waste |
| 7 | Treatability studies of industrial wastewater |

## CL 486: INFRASTRUCTURE MANAGEMENT

B. TECH 8th SEMESTER (CIVIL ENGINEERING)
PROGRAMME ELECTIVE - IV

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Introduction and Infrastructure scenario | **04** |
| 2 | Urban Infrastructure | **10** |
| 3 | Rural Infrastructure | **09** |
| 4 | Private Involvement in Infrastructure | **05** |
| 5 | Infrastructure Economics and Finance | **08** |
| 6 | Infrastructure Risk Management | **05** |
| 7 | Infrastructure Maintenance | **04** |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

| | | | |
|---|---|---|---|
| **1** | Introduction and Infrastructure scenario | **04 Hours** | **09%** |
| 1.1 | Types of Infrastructure | | |
| 1.2 | Role of Infrastructure | | |
| 1.3 | Need and scenario of infrastructure | | |
| 1.4 | Infrastructure crisis | | |
| **2** | Urban Infrastructure | **10 Hours** | **22%** |
| 2.1 | Concept of urbanization and economic development | | |
| 2.2 | Scenario of municipal infrastructure | | |

| | | | |
|---|---|---|---|
| 2.3 | Models of urban governance | | |
| 2.4 | Municipal finances | | |
| 2.5 | Major municipal reforms | | |
| 2.6 | Legislations pertaining to urban infrastructure | | |
| **3** | Rural Infrastructure | **09 Hours** | **20%** |
| 3.1 | Overview | | |
| 3.2 | Concept of rural infrastructure planning | | |
| 3.3 | State of rural infrastructure | | |
| 3.4 | Growth | | |
| 3.5 | Rural characteristics | | |
| 3.6 | Strategies to improve infrastructure in rural areas | | |
| **4** | Private Involvement in Infrastructure | **05 Hours** | **11%** |
| 4.1 | Overview | | |
| 4.2 | Benefits | | |
| 4.3 | Problems and challenges of infrastructure privatization | | |
| **5** | Infrastructure Economics and Finance | **08 Hours** | **18%** |
| 5.1 | Principles of finance | | |
| 5.2 | Infrastructure economics | | |
| 5.3 | Developing financial models for infrastructure | | |
| 5.4 | Introduction to project finance | | |
| **6** | Infrastructure Risk Management | **05 Hours** | 11% |
| 6.1 | Risks in infrastructure | | |
| 6.2 | Quantitative risk analysis | | |
| 6.3 | Qualitative risk management | | |
| 6.4 | Risk management strategies | | |
| **7** | Infrastructure Maintenance | **04 Hours** | **9%** |
| 7.1 | Introduction to Infrastructure maintenance | | |
| 7.2 | Need and requirement for Infrastructure maintenance | | |
| 7.3 | Preventive techniques for maintenance | | |

**C. Students Learning Outcomes:**

On the successful completion of this course

CO1 Students will be able to understand concepts of infrastructure, infrastructure economics, policies and regulation.

CO2 Students will be able to identify and analyze issues related to infrastructure projects.

CO3 Students will be able to recommend appropriate infrastructure management plan.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 1 | - | - | - | - | 1 | - | - | - | - | - | - | - | - | - |
| CO2 | - | 1 | - | - | - | - | - | - | - | - | - | - | - | - | - |
| CO3 | - | - | 2 | 2 | - | - | - | - | - | - | 2 | - | 1 | - | - |

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation "-"

**D. Recommended Study Material:**

**Text Books:**

1. J. Parkin and D. Sharma, Infrastructure planning, Thomas Telford
2. P. Chandra, Projects: Planning, analysis, selection, financing, implementation, and review, Tata McGraw-Hill
3. S. Goodman and M. Hastak, Infrastructure planning handbook: Planning, engineering, and economics, McGraw-Hill

**Reference Books:**

1. Ronald W Hudson, "Infrastructure Management: integrating design, Construction, maintenance, rehabilitation and renovation", MGH, 1st Edition, 1997
2. L. Squire and H. G.van der Tak, Economic analysis of projects, John Hopkins University Press, London, 1975.
3. J. D. Finnerty, Project financing - Asset-based financial engineering, John Wiley & Sons, New York, 1996.

**Web Materials:**

## Term Work

Term work will be based on above syllabus with seminar/group project to be incorporated.

## CL 487: ADVANCED CONSTRUCTION TECHNOLOGY

B. TECH 8th SEMESTER (CIVIL ENGINEERING)

PROGRAMME ELECTIVE - IV

---

**Credits and Hours:**

| Teaching Scheme | Theory | Practical/Tutorial | Total | Credit |
|---|---|---|---|---|
| Hours/week | 3 | 2 | 5 | 4 |
| Marks | 100 | 50 | 150 | |

**A. Outline of the Course:**

| Sr. No. | Title of the Unit | Minimum Number of Hours |
|---|---|---|
| 1 | Substructure Construction | **15** |
| 2 | Superstructure Construction | **08** |
| 3 | Concreting Process & Equipments | **06** |
| 4 | Advanced Concrete Technology | **08** |
| 5 | Sustainable Construction Technologies | **08** |

**Total Hours (Theory): 45**
**Total Hours (Lab): 30**
**Total Hours: 75**

**B. Detailed Syllabus:**

**1 Substructure Construction** **15 Hours** **33%**

1.1 Box jacking, Pipe jacking

1.2 Under water construction of diaphragm walls and basement

1.3 Tunnelling techniques

1.4 Piling techniques and load testing, Battered piles

1.5 Driving well and Caissons,

1.6 Cofferdams: types, design considerations, construction sequence, sinking of cofferdam

1.7 Cable anchoring and grouting

1.8 Sheet piles: laying operations for built up offshore

| | | | |
|---|---|---|---|
| | system | | |
| 1.9 | Shoring for deep cutting | | |
| **2** | **Superstructure Construction** | **08 Hours** | **18%** |
| 2.1 | Techniques of construction for continuous concreting operation in tall buildings | | |
| 2.2 | Large span structures – segmental bridge construction techniques | | |
| 2.3 | In-situ pre-stressing in high rise structures | | |
| 2.4 | Post tensioning techniques | | |
| **3** | **Concreting Process & Equipments** | **06 Hours** | **14%** |
| 3.1 | Aggregate crushers, feeders and screens, aggregate handling equipments | | |
| 3.2 | Concrete batching, mixing and pumping equipments | | |
| 3.3 | Ready mix concrete equipment | | |
| 3.4 | Tools and plants for hot weather concreting | | |
| 3.5 | Underwater concreting | | |
| **4** | **Advanced Concrete Technology** | **08 Hours** | **18%** |
| 4.1 | Properties and applications of High strength and high performance concrete | | |
| 4.2 | Reactive powder concrete | | |
| 4.3 | Lightweight, heavyweight, and mass concrete | | |
| 4.4 | Fibre reinforced concrete | | |
| 4.5 | Self-compacting concrete, Self-healing concrete | | |
| 4.6 | Polymer Concrete, Epoxy resins and screeds | | |
| **5** | **Sustainable Construction Technologies** | **08 Hours** | **17%** |
| 5.1 | Necessity and importance | | |
| 5.2 | Criteria for defining as sustainable materials | | |
| 5.3 | Recycled building products from industrial, agricultural and urban waste stream materials | | |
| 5.4 | Recent developments in sustainable building materials and technologies | | |
| 5.5 | Smart buildings | | |

**C. Course Outcomes:**

On the successful completion of this course, the students will be able to:

CO1 Understand and apply operational details of important equipment, techniques and methods employed in substructure construction.

CO2 Understand the systems and techniques used in heavy constructions works and apply the same in construction sector.

CO3 Understand the application of different equipments, techniques and methods of producing and placing of concrete.

CO4 Have in-depth knowledge of different types of advanced concrete and its application.

CO5 Apply different materials and methods used for sustainable building construction.

**Course Articulation Matrix:**

| | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| CO1 | 1 | - | - | - | 1 | 1 | - | - | - | - | - | - | 2 | 1 | 1 |
| CO2 | 1 | - | - | - | 1 | 1 | - | - | - | - | - | - | | 1 | 1 |
| CO3 | 1 | - | - | - | 2 | 1 | - | - | - | - | - | - | | 1 | |
| CO4 | - | 1 | 2 | 1 | 2 | 1 | 2 | - | - | - | - | - | 2 | 1 | 2 |
