

**CHARUSAT**  
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

# ACADEMIC REGULATIONS & SYLLABUS

---

Faculty of Technology & Engineering

Bachelor of Technology Programme

(Second Year Civil Engineering)

Effective from 2020-21

### Vision

“To provide state of the art education in Civil Engineering guided by innovative research leading to centre of excellence in Civil Engineering education having recognition at national and international levels”

### Mission

“Being a pioneering branch of Engineering, the department of Civil Engineering under the shelter of CHARUSAT is intended as a facilitator for creating a liaison between the brilliant student community and the next generation industrial needs”

### Programme Educational Objectives (PEO's):

PEO 1: The graduate will possess foundation of engineering knowledge and exhibiting critical thinking and problem solving skills

PEO 2: The graduates will have trait of lifelong learning and be able to inculcate the capabilities to meet the diversified needs of industry, academia and research.

PEO 3: The graduate will exhibit the professional ethics and be supportive to the social needs

PEO 4: The graduates will possess comprehending, analyzing and designing capabilities to generate sustainable solutions

### Programme Outcomes (PO's)

Engineering Graduates will be able to:

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Programme Specific Outcomes (PSO's):

By the completion of Civil Engineering program, the student will attain:

**PSO 1:** The ability to serve the infrastructure sector with capabilities to plan, design, analyze and building civil engineering-based systems

**PSO 2:** The ability to adopt to the state-of-the-art practices in all sectors of Civil Engineering.

**PSO 3:** Employability skills with the cognizance of social and environmental necessity along with ethical responsibility to have a successful career and to become an entrepreneur.

**CHARUSAT welcomes you for a Bright Future**

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY  
Accredited with Grade A by NAAC,  
Accredited with Grade A by KCG

Faculty of Technology and Engineering

## ACADEMIC REGULATIONS

Bachelor of Technology (Civil Engineering) Programme

Charotar University of Science and Technology (CHARUSAT)  
CHARUSAT Campus, At Post: Changa – 388421, Taluka: Petlad, District: Anand  
Phone: 02697-247500, Fax: 02697-247100, Email: [info@charusat.ac.in](mailto:info@charusat.ac.in)

Academic Year – 2020-21

# CHARUSAT

FACULTY OF TECHNOLOGY AND ENGINEERING

ACADEMIC REGULATIONS

Bachelor of Technology Programmes

To ensure uniform system of education, duration of undergraduate and post graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

- *System of Education*

The Semester system of education should be followed across the Charotar University of Science and Technology (CHARUSAT) both at Undergraduate and Master's levels. Each semester will be at least of 90 working days duration. Every enrolled student will be required to take a specified load of course work in the chosen subject of specialization and also complete a project/dissertation if any.

- *Duration of Programme*

Undergraduate programme	(B. Tech.)
Minimum	8 semesters (4 academic years)
Maximum	12 semesters (6 academic years)

- *Eligibility for Admissions*

As enacted by Govt. of Gujarat from time to time.

- *Mode of Admissions*

As enacted by Govt. of Gujarat from time to time.

- *Programme Structure and Credits*

*As per Annexure – 1 attached*

- *Attendance*

All activities prescribed under these regulations and enlisted by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student regarding attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Principal.

Student's attendance in a course should be 80%.

- *Course Evaluation*

**7.1 The performance of every student in each course will be evaluated as follows:**

- 7.1.2 Internal evaluation by the course faculty member(s) based on continuous assessment, for 30% of the marks for the course; and
- 7.1.3 Final examination by the University through modes such as; written paper or practical test or oral test or presentation by the student or a combination of any two or more of these, is set to 70% of the marks for each the course.

**7.2 Internal Evaluation**

*As per Annexure – 1 attached*

**7.3 University Examination**

The final examination by the University for 70% of the evaluation for the course will be through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these.

**7.4 In order to earn the credit in a course a student has to obtain grade other than FF.**

**7.5 Performance at Internal & University Examination**

- 7.5.1 Minimum performance with respect to internal marks as well as university examination will be an important consideration for passing a course. Details of minimum percentage of marks to be obtained in the examinations (internal/external) are as follows:

Minimum marks in University Exam per course	Minimum marks Overall per course
40%	45%

- 7.5.2 A student failing to score 40% in the final examination will get an FF grade.
- 7.5.3 If a candidate obtains minimum required marks in each course but fails to obtain minimum required overall marks, he/she has to repeat the university examination till the minimum required overall marks are obtained.

- *Grading*

8.1 The total of the internal evaluation marks and final University examination marks in each course will be converted to a letter grade on a ten-point scale as per the following scheme:

*Table: Grading Scheme (UG)*

Range of Marks (%)	≥80	<80 ≥73	<73 ≥66	<66 ≥60	<60 ≥55	<55 ≥50	<50 ≥45	<45
Corresponding Letter Grade	AA	AB	BB	BC	CC	CD	DD	FF
Numerical point (Grade Point) corresponding to the letter grade	10	9	8	7	6	5	4	0

8.2 The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his/her performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are calculated as follows:

- (i)  $SGPA = \frac{\sum C_i G_i}{\sum C_i}$  where,  
 $C_i$  = Number of credits of course i  
 $G_i$  = Grade Point for the course i  
 $i = 1$  to  $n$   
 $n$  = number of courses in the semester
- (ii)  $CGPA = \frac{\sum C_i G_i}{\sum C_i}$  where,  
 $C_i$  = Number of credits of course i  
 $G_i$  = Grade Point for the course i  
 $i = 1$  to  $n$   
 $n$  = number of courses of all semesters up to which CGPA is computed
- (iii) No student will be allowed to move further in next semester if CGPA is less than 3 at the end of an academic year.
- (iv) A student will not be allowed to move to third year if he/she has not cleared all the courses of first year.
- (v) A student will not be allowed to move to fourth year if he/she has not cleared all the courses of first and second year.

## *9. Award of Degree*

- 9.1 Every student of the programme who fulfills the following criteria will be eligible for the award of the degree:
- 9.1.1 He/ She should have earned minimum required credits as prescribed in course structure; and
  - 9.1.2 He/ She should have cleared all internal and external evaluation components in every course; and
  - 9.1.3 He/ She should have secured a minimum CGPA of 4.5 at the end of the programme;
  - 9.1.4 **In addition to above, the student has to complete the required formalities as per the regulatory bodies, if any.**
- 9.2 The student who fails to satisfy minimum requirement of CGPA will be allowed to improve the grades so as to secure a minimum CGPA for award of degree. Only latest grade will be considered.

## *10. Award of Class*

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Distinction	:	CGPA $\geq 7.5$ & $\leq 10.0$
First class	:	CGPA $\geq 6.0$ & $< 7.5$
Second Class	:	CGPA $\geq 5.0$ & $< 6.0$
Pass	:	CGPA $< 5.0$

## *11. Transcript*

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA, class obtained, etc.

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY  
(CHARUSAT)

FACULTY OF TECHNOLOGY & ENGINEERING (FTE)

CHOICE BASED CREDIT SYSTEM

## A. Choice Based Credit System:

With the aim of incorporating the various guidelines initiated by the University Grants Commission (UGC) to bring equality, efficiency and excellence in the Higher Education System, Choice Based Credit System (CBCS) has been adopted. CBCS offers wide range of choices to students in all semesters to choose the courses based on their aptitude and career objectives. It accelerates the teaching-learning process and provides flexibility to students to opt for the courses of their choice and / or undergo additional courses to strengthen their Knowledge, Skills and Attitude.

### 1. CBCS – Conceptual Definitions / Key Terms (Terminologies)

#### 1.1. Core Courses

##### 1.1.1 University Core (UC)

University Core Courses are those courses which all students of the University of a Particular Level (PG/UG) will study irrespective of their Programme/Specialization.

##### 1.1.2 Programme Core (PC)

A 'Core Course' is a course which acts as a fundamental or conceptual base for Chosen Specialization of Engineering. It is mandatory for all students of a particular Programme and will not have any other choice for the same.

#### 1.2 Elective Course (EC)

An 'Elective Course' is a course in which options / choices for course will be offered. It can either be for a Functional Course / Area or Streams of Specialization / Concentration which is / are offered or decided or declared by the University/Institute/Department (as the case may be) from time to time.

##### 1.2.1 Institute Elective Course (IE)

Institute Courses are those courses which any students of the University/Institute of a Particular Level (PG/UG) will choose as offered or decided by the University/Institute from time-to-time irrespective of their Programme /Specialization

##### 1.2.2 Programme Elective Course (PE)

A 'Programme Elective Course' is a course for the specific programme in which students will opt for specific course(s) from the given set of functional course/ Area or Streams of Specialization options as offered or decided by the department from time-to-time.

### 1.2.3 Cluster Elective Course (CE)

A 'Cluster Elective Course' is a course which students can choose from the given set of functional course/ Area or Streams of Specialization options (e.g. Common Courses for EC/CE/IT/EE) as offered by or decided by the Institute from time-to-time.

### 1.3 Non Credit Course (NC) - AUDIT Course

A 'Non Credit Course' is a course where students will receive Participation or Course Completion certificate. This will not be reflected in Student's Grade Sheet. Attendance and Course Assessment is compulsory for Non Credit Courses.

# B. Tech. (Civil Engineering) Programme

## SYLLABI (Semester – 3)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

**MA251: ENGINEERING MATHEMATICS-III**  
**B TECH 3rd SEMESTER (CL/EE/ME)**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	-	4	4
Marks	100	-	100	

**A. Outline of the course:**

Sr. No.	Title of the Unit	Minimum number of hours
1.	Fourier Series and Its Applications	15
2.	Laplace Transform and Its Applications	15
3.	Vector Differential Calculus	10
4.	Vector Integral Calculus	12
5.	Curve Fitting	08
	<b>Total hours:</b>	60

**B. Detailed Syllabus:**

1. **Fourier Series and Its Applications:** 15 Hours    25%
  - 1.1 Periodic functions, Dirichlets conditions, Trigonometric series.
  - 1.2 Euler formulae, Fourier series of periodic function of period  $p$ .
  - 1.3 Fourier series: Discontinuous functions, Even and odd functions.
  - 1.4 Half range Fourier series.
  - 1.5 Solutions of heat, wave, Laplace equations by method of separation of variables and Fourier series.
2. **Laplace Transform and Its Applications:** 15 Hours    25%
  - 2.1 Laplace transform as an improper integral and its existence.
  - 2.2 Laplace transform of elementary functions and its properties.
  - 2.3 Inverse Laplace transform and its properties.
  - 2.4 First and second shifting theorems. Laplace transform of derivatives and integrals.

2.5	Convolution theorem and its application to obtain inverse Laplace transform.		
2.6	Laplace transform of periodic functions, Unit step function, Unit impulse function (Dirac delta function).		
2.7	Solving differential equations using Laplace transform.		
2.8	Applications of ODE : Mechanical vibration system, deflection of beams.		
<b>3</b>	<b>Vector Differential Calculus:</b>	10 Hours	17%
3.1	Revision of concepts of Vector algebra, Scalar and Vector fields.		
3.2	Gradient of a scalar functions, Directional derivatives.		
3.3	Divergence and Curl of a vector field and their properties.		
3.4	Physical interpretations of gradient, divergence and curl. Irrotational and Solenoidal vector fields.		
3.5	Scalar potential function.		
<b>4</b>	<b>Vector Integral Calculus:</b>	12 Hours	20%
4.1	Introduction to line integrals and examples.		
4.2	Statement and examples of Green's theorem.		
4.3	Introduction to Surface and Volume integrals.		
4.4	Statements and examples of Stokes' and Gauss' divergence theorem.		
<b>5</b>	<b>Curve Fitting:</b>	08 Hours	13%
5.1	Normal equations.		
5.2	Fitting a straight line: $y = a + bx$ (linear regression).		
5.3	Fitting a parabola: $y = a + bx + cx^2$ .		
5.4	Fitting a curve by transformation: $y = ab^x, xy^a = b, y = ax^b$ .		

### C. Course Outcome :

At the end of the course, the students will be able to

- CO1 Represent continuous time periodic signals using concepts of Fourier series and determine the solution of complex engineering problems heat, wave and Laplace's equations using it.

- CO2 Classify and apply the necessary Laplace transform and inverse Laplace transform techniques to solve ordinary differential equations of real world problems.
- CO3 Differentiate the dot product, cross product, length of vectors, partial derivatives, derivatives of vector-valued functions, gradient functions and these tools are employed successfully in different branches of engineering and physics.
- CO4 Analyze parameterize curves and calculate line integrals using them and Use vector operators and implement into surface integrals, Classify and examine the Green, Stokes and Divergence theorem
- CO5 Appraise the Least squares fitting method of data approximation and Discuss the concept of curve fitting of different types of curves using specific data

**Course Articulation Matrix (ME/CL):**

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3

Marks	100	50	150	

**A. Outline of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Physical Geology	17
2	Natural Materials	13
3	Structural Geology	12
4	Engineering Geology	18

Total Hours (Theory): 60

Total Hours (Lab): 30

Total Hours: 90

**B. Detailed Syllabus:**

<b>1</b>	<b>Physical Geology</b>	<b>17 Hours</b>	<b>28%</b>
1.1	<b>Earth:</b> Origin, internal structure.	3	
1.2	<b>Work of natural agencies:</b> Lakes, Oceans, Atmosphere, wind, streams, sea, glacier, mass movements	7	
1.3	<b>Plate tectonics:</b> Concepts and plate boundaries	2	
1.4	<b>Earthquakes:</b> Basics of earthquake, intensity and magnitude, causes, Earthquake zones of India	5	
<b>2</b>	<b>Natural Materials</b>	<b>13 Hours</b>	<b>22%</b>
2.1	<b>Minerals:</b> Formation, Identification and Use:	5	

	Physical properties of minerals; basics of optical mineralogy, SEM, XRD		
2.2	<b>Rocks:</b> Types of rock and origin: Igneous (extrusive and intrusive), sedimentary and metamorphic <b>Igneous Rock:</b> Agents, structure, texture, IUGG classification of intrusive and extrusive rocks <b>Metamorphic Rock :</b> Causes of metamorphism (stress, temperature, tectonism, pore fluid), structure and texture <b>Sedimentary Rock:</b> Sedimentation environments, structure, textural classification of siliciclastic and carbonate rock	8	
3	<b>Structural Geology</b>	12 Hours	20%
3.1	<b>Introduction:</b> Outcrop, stratification, dip and strike relation	2	
3.2	<b>Study of Structural Features:</b> Fold, Fault, Joints and Unconformities; Classification, formation and Identification	10	
4	<b>Engineering Geology</b>	18 Hours	30%
4.1	<b>Geologic Mapping:</b> Various methods of geological investigations, mapping, preparation of geologic sections Interpretation of reports.	3	
4.2	<b>Indian geology:</b> Geological framework of India, Geology of Gujarat	2	
4.3	<b>Ground water:</b> Basics and engineering difficulties	2	
4.4	<b>Geology for Site selection:</b> Dam, Tunnel, Reservoir and Highways	6	
4.5	<b>Case studies:</b> Important international and Indian examples of failures of civil structures due to geological constrains.	5	

### C. Course Outcomes:

On the successful completion of this course:

- CO1 The student will have basic understanding of Geology, natural materials such as minerals and rocks, use of rocks and minerals and availability of rocks and mineral.
- CO2 The student will have basic understanding of Geological framework of India and Gujarat.
- CO3 The student will be able to analyse geological maps and process of resolving geological issues in civil engineering projects.
- CO4 The student will be able to apply the knowledge of natural dynamic process, and other geological factors while taking decision on civil engineering constructions.

**LIST OF EXPERIMENTS**

Sr. No.	Name of Experiment
1	<b>Fundamentals of Geology</b>
2	<b>Study of Minerals</b>
	Study of Physical Properties of Minerals
	Identification Rock Forming Minerals by Studying Physical Properties
	Identification Ore Minerals by Studying Physical Properties
3	<b>Study of Rocks</b>
	Study of Igneous Rocks
	Study of Sedimentary Rocks
	Study of Metamorphic Rocks
4	<b>Geological Mapping</b>
	Map of layered horizontal beds
	Map of layered inclined beds
	Map of layered inclined beds
	Map of Unconformity with Inclined and Horizontal Bed Series
	Map of Faulted Sequence
	Map of Folded Sequence
	Various Combination Maps for General Practice

**CL242: SURVEYING**  
**B TECH 3<sup>RD</sup> SEMESTER (CIVIL ENGINEERING)**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

**A. Out Line of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Measurement of Elevation, Contouring	5
2	Theodolite Traversing	10
3	Plane Table Surveying	10
4	Engineering Curves	10
5	Computation of Areas and Volumes	10
6	Hydrography	5
7	Setting Out Works	5
8	Modern Surveying Instruments	5

Total hours (Theory): 60 Hours

Total hours (Lab): 30 Hours

Total hours: 90 Hours

**B. Detailed Syllabus:**

<b>1</b>	<b>Measurement of Elevation, Contouring</b>	<b>05 Hours</b>	<b>08%</b>
1.1	Profile levelling and cross sectioning & contouring		
1.2	Errors in levelling		
1.3	Permanent adjustment of level.		
<b>2</b>	<b>Theodolite Surveying</b>	<b>10 Hours</b>	<b>17%</b>
2.1	Introduction to vernier transit theodolite		
2.2	Temporary and permanent adjustment of theodolite		
2.3	Measuring horizontal and vertical angles		
2.4	Computation of latitudes and departure & gale's table		

2.5	Methods of traversing, closing error		
2.6	Check in closed and open traverse, balancing of traverse		
2.7	Area of traverse, omitted measurement, co-ordinate method		
<b>3</b>	<b>Plane Table Surveying</b>	<b>10 Hours</b>	<b>17%</b>
3.1	Introduction		
3.2	Principle		
3.3	Advantages & limitation		
3.4	Accessories of plane tabling		
3.5	Setting up the plane table		
3.6	Methods of plane table surveying		
3.7	Sources of errors		
<b>4</b>	<b>Engineering Curves</b>	<b>10 Hours</b>	<b>17%</b>
4.1	Introduction to engineering curves		
4.2	Classification & elements of simple circular curve		
4.3	Methods of setting out a simple circular curve		
4.4	Elements of compound curve & reverse curve		
4.5	Transition curve & vertical curve		
<b>5</b>	<b>Computation of Areas and Volumes</b>	<b>10 Hours</b>	<b>17%</b>
5.1	Different methods to compute area of traverse		
5.2	Determining areas from plans, trapezoidal rule- Simpson's rule		
5.3	Planimeter, digital planimeter		
5.4	Computation of volumes, volume from cross sections		
5.5	Trapezoidal and prismoidal formulae		
5.6	Prismoidal correction, curvature correction		
5.7	Determination of capacity of reservoir and volume of borrow pits		
<b>6</b>	<b>Hydrography</b>	<b>05 Hours</b>	<b>08%</b>
6.1	Introduction		
6.2	Purposes, control points		
6.3	Soundings		

6.4 Instruments and methods of locating soundings

**7 Setting Out Works** **05 Hours** **08%**

7.1 Introduction

7.2 Setting out the buildings

7.3 Setting out the sewer grades

7.4 Setting out the bridge & culvert

**8 Modern Survey Instruments** **05 Hours** **08%**

8.1 Introduction

8.2 Electromagnetic distance measurement

8.3 Electronic theodolite

8.4 Total station

**C. Course Outcomes :**

At the end of the course, the students will be able to

CO1 Carry out elevation measurement and prepare contour maps.

CO2 Plan theodolite survey applications.

CO3 Measure and Plot maps with plane table.

CO4 Set out curves, buildings, culverts and tunnels

CO5 Compute ground areas and earthwork volumes

CO6 Carry out basic hydrographic survey and invoke application of modern surveying instruments over conventional instruments.

**CL243: MECHANICS OF SOLIDS**  
**B TECH 3<sup>RD</sup> SEMESTER (CIVIL ENGINEERING)**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

**A. Out Line of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Introduction	3
2	Simple Stresses and Strains	15
3	Principal Stresses and Strains	10
4	Shear Force and Bending Moment	10
5	Moment of Inertia	6
6	Bending and Shear Stresses in Homogeneous and Composite Beam Sections	10
7	Strain Energy	6

Total hours (Theory): 60 Hours

Total hours (Lab): 30 Hours

Total hours: 90 Hours

**B. Detailed Syllabus:**

<b>1</b>	<b>Introduction</b>	<b>03 Hours</b>	<b>05%</b>
1.1	Introduction to mechanics of deformable bodies		
1.2	Principle of superposition		
1.3	Classification of loaded bar		
1.4	Gradual, sudden, impact and shock loading		
1.5	Mechanical properties of materials		
<b>2</b>	<b>Simple Stresses and Strains</b>	<b>15 Hours</b>	<b>22%</b>
2.1	Stress and types of stress, Strain and types of strain		
2.2	Stress strain Characteristics for ductile and brittle materials		
2.3	Shear stresses and strains, Elasticity, Hook's law		

2.4	Axial and shear deformations, Axial force diagram		
2.5	Bars of varying section, Bars of uniformly varying cross section		
2.6	Analysis of stress for statically determinate structures and indeterminate structures		
2.7	Poisson's ratio, Volumetric strain, Biaxial and tri-axial deformations		
2.8	Elastic constant and relation between three elastic constants		
2.9	Stresses due to thermal effect		
<b>3</b>	<b>Principal Stresses and Strains</b>	<b>10 Hours</b>	<b>18%</b>
3.1	Introduction, Sign convention		
3.2	Transformation of stresses for a state of stresses under axial loading Transformation of stresses for plate under biaxial loading		
3.3	Principal plane and principal stresses		
3.4	Maximum shear stress, Element subjected to principal stresses		
3.5	Mohr's circle for stresses on an oblique section of a body subjected		
3.6	to direct stress in one plane and two plane with or without shear stress, Pure shear		
<b>4</b>	<b>Shear Force and Bending Moment</b>	<b>10 Hours</b>	<b>22%</b>
4.1	Concept of shear force and bending moment		
4.2	Sign conventions		
4.3	Relation between bending moment, shear force and rate of loading Bending moment and shear force diagrams for statically		
4.4	determinate beams subjected to all different types of loading Important points for shear force and bending moment diagram.		
<b>5</b>	<b>Moment of Inertia</b>	<b>6 Hours</b>	<b>12%</b>
5.1	Introduction, Radius of gyration		
5.2	Parallel axis theorem and perpendicular axis theorem		
5.3	Polar moment of inertia		
5.4	Moment of inertia by integration		
5.5	Moment of inertia of composite areas		

- 6 Bending and Shear Stresses in Homogeneous and composite beam sections 10 Hours 14%
- 6.1 Pure bending, Theory of pure bending
- 6.2 Assumptions and derivation of theory of simple bending
- 6.3 Neutral axis, moment resistance, section modulus
- 6.4 Strength of section
- 6.5 Bending stress in symmetrical, unsymmetrical and composite sections
- 6.6 Shear stresses, Shear flow
- 6.7 Shear stress distribution for various cross section
- 7 Strain Energy 06 Hours 07%
- 7.1 Elastic strain energy due to gradual loading, sudden loading, impact loading, shear and bending, Resilience

### C. Course Outcomes

At the end of the course, the students will be able to

- CO1 Classify and determine the strength parameters of materials and compute stresses & strains for structural elements due to normal, shear loads and temperature changes.
- CO2 Calculate bending moment and shear force for statically determinate beams and draw the distributions.
- CO3 Calculate the cross sectional moment of inertia using the parallel axis theorem.
- CO4 Analyse stresses in a beam under combined loadings and also Calculate bending stress, shear stress and their distribution at any desired location along the beam elements.
- CO5 Evaluate the different mechanical properties of materials and also Calculate strain energy due to different loadings.

5.4	Causes of Climate Change		
5.5	Global Atmospheric Composition		
5.6	Greenhouse Gases and Aerosols		
5.7	Extreme Weather Events & Sea Level Rise		
5.8	Climate Projections and their Uncertainties		
<b>6</b>	<b>Climate Change-Mitigation</b>	<b>05 Hours</b>	<b>17%</b>
6.1	Global Carbon Cycle		
6.2	Concept of Carbon Sequestration		
6.3	Carbon Credits and Carbon Footprints		
6.4	Policy Perspective: UNFCCC, IPCC, Kyoto Protocol, MoEFCC		

### C. Course Outcomes:

On the completion of the course the students will be able to:

- CO1 Understand & appreciate for the value of quantitative, systems and trans disciplinary thinking of Environmental Sustainability
- CO2 Expand their awareness about the environment as an increasing part of the core business model and day-to-day operations of many organizations
- CO3 Develop an environmental blueprint for action
- CO4 Think strategically and act entrepreneurially to create sustainable future
- CO5 Review on Climate Change and related strategies

**C. Course Outcome :**

At the end of the course, the students will be able to

- CO1 Demonstrate creativity in their day to day activities and academic output.
- CO2 Solve personal, social and professional problems with a positive and an objective mindset.
- CO3 Think creatively and work towards problem solving in a strategic way.
- CO4 Initiate new and innovative practices in their chosen field of profession.
- CO5 Give logical ideas, opinions, and solutions to problems.
- CO6 Think critically over the situation and drawing conclusion.

**CL283: SDG HANDPRINT LABORATORY**  
**B TECH 3<sup>RD</sup> SEMESTER (UNIVERSITY ELECTIVE)**

**Credits and Hours:**

Teaching Scheme	Theory	Tutorial	Practical	Total	Credit
Hours/week	-	-	2	2	2
Marks	-	-	100	100	

**A. Outline of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Introducing Sustainable Development Concepts and Sustainable Development Goals( SDGs)	04
2	Selection of the SDG Target, group formation and Familiarization with the geographical area 1. Group Formation and selection of SDG target 2. Field trip to familiarize the students with the geographical area	10 (2 hours Classroom + 8 hours field visit)
3	Sustainable Rural Development	02
4	Compilation and Analysis of Available Statistical and Geospatial Information	02
5	Ground Reality Check 1. Understanding/developing methodology 2. Baseline study	16
6	Developing Project Strategy and Plan of Action 1. Analysis of data 2. Developing the plan of Action	04
7	Presentation of Strategy and Ethical Evaluation	02
8	Project Implementation and Handprint Action	16
9	Submission of Project Report Presentation, Evaluation and Certification	04

**Total Hours (Theory): 20 (10 session/2 hours each)**

**Total Hours Field Visit: 40 (5 days @ 8 hours per day)**

**Total Hours: 60**

**Total Number of Sessions: 15 sessions (10 classroom and 5 Field visits)**

## B. Detailed Syllabus:

<b>1</b>	<b>Introducing Sustainable Development Concepts and SDGs</b>	<b>04 Hours</b>	<b>07%</b>
1.1	Understanding the key Concepts Global population patterns and trends and world population growth over time Demographic transition: Population growth by the level of development Carbon footprint and Ecological Footprint Climate Change Sustainability and Sustainable Consumption		
1.2	Leapfrogging Sustainable Development Three Pillars of sustainable development		
1.3	Visual framework of SD: Planetary boundaries vs Social boundaries		
1.4	Sustainable Development Goals and the global processes that led to the formation of SD goals		
1.5	SDGs and targets and their interconnectedness Handprint		
1.6	SDG Handprint Lab		
<b>2</b>	<b>Selection of the SDG Target, Group Formation and Familiarization to the geographical area</b>	<b>10 Hours</b>	<b>16%</b>
2.1	Localizing the SDGs: Understanding SDGs in the National, State and selected geographic area context		
2.2	Project Selection: Choosing the SDG target and group formation		
2.3	Presentation by groups on selected project		
2.4	Exposure visit to the Geographic Area to understand the specific aspects of the area related to the project selected		
<b>3</b>	<b>Sustainable Rural Development</b>	<b>02 Hours</b>	<b>03%</b>
3.1	Understanding Sustainable Rural Development in the Indian context - issues, challenges and opportunities (specific to the state of Gujarat)		
3.2	Orientation on Rural development programmes, projects and policies, role of different organizations (Government, Non-		

	government bodies, CSR and other key stakeholders)		
3.3	Different approaches to the management of natural resources in the rural context - sharing of case studies		
<b>4</b>	<b>Compilation and Analysis of available Statistical and Geospatial Information</b>	<b>02Hours</b>	<b>03%</b>
4.1	Providing Guidelines and approaches for baseline study		
4.2	Introduction to Methods of acquiring, interpreting and analyzing geospatial information with an understanding of the appropriate contexts for their use		
4.3	Development of methodology and plan of action for the baseline study		
<b>5</b>	<b>Ground Reality Check</b>	<b>16 hours</b>	<b>27%</b>
5.1	Baseline study and data collection from the geographical area on the selected project.		
5.2	Approaches to data analysis: Understand the gaps; identify opportunities and entry points for strategic intervention		
5.3	Sharing of Learnings: Presentation of the analysis of baseline study		
<b>6</b>	<b>Developing Project Strategy and Plan of Action</b>	<b>04 Hours</b>	<b>7%</b>
6.1	Guidelines on Ethics, Earth Charter and criteria for evaluating the strategy		
6.2	Formulation of intervention strategy and plan of action for implementation of Handprint Action		
<b>7</b>	<b>Presentation of Strategy and Ethical Evaluation</b>	<b>02 Hours</b>	<b>3%</b>
7.1	Session with Experts: Presentation by groups and inputs from mentors/experts		
7.2	General guidelines for field level intervention		
<b>8</b>	<b>Project Implementation and Handprint Action</b>	<b>16 Hours</b>	<b>27%</b>
8.1	Implement the Handprint action in the selected geographical area		
8.2	Guidelines for Report writing and Presentation		
<b>9</b>	<b>Submission of Project Report Presentation, Evaluation and Certification</b>	<b>04 Hours</b>	<b>7%</b>

- 9.1 Preparation and submission of SDG Handprint Lab Report
- 9.2 Sharing the Learning: SDG Handprint Lab
- 9.3 Presentation/Exhibition Evaluation and Certification

**C. Course Outcome :**

On the completion of the course the students will be able to:

- CO1 Identify and explain about the social and environmental dimensions of sustainability issues and the complex inter-relationships between society and nature with particular emphasis on relationship between environment and development.
- CO2 Demonstrate the ability to link key academic concepts used in relation to environmental issues and sustainability and adopt a critical approach to analyzing global environmental issues
- CO3 Get familiar with the SDGs and would be able to connect local sustainability issues to global challenges and agenda.
- CO4 Learn about multiple approaches to understand analyse a sustainability issue and will be acquainted with the tools to identify key challenges pertaining to a particular sustainability issue in a given geographic area.
- CO5 Learn to use a scientific approach to needs assessment and be able to evaluate and take action on feasibility of implementation in terms of cost, speed, effectiveness, durability of the solution etc. and the need for immediate, short-term and long-term strategies.
- CO6 Recognize and define ethical issues and be able to ethically evaluate how their intervention would affect different groups.
- CO7 Develop skills of reading, writing and presentation.

**Course Articulation Matrix:**

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3

# B. Tech. (Civil Engineering) Programme

## SYLLABI (Semester – 4)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

**CL244: FLUID MECHANICS- I**  
**B TECH 4<sup>TH</sup> SEMESTER (CIVIL ENGINEERING)**

---

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

**A. Outline of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Properties of Fluid	4
2	Fluid Statics	10
3	Fluid Kinematics	9
4	Fluid Dynamics	8
5	Measurement of Flow	8
6	Flow Through Pipes	9
7	Open Channel Flow	10
8	Introduction to the Hydraulic machinery	2

Total Hours (Theory): 60

Total Hours (Lab): 30

Total Hours: 90

**B. Detailed Syllabus:**

<b>1</b>	<b>Properties of Fluid</b>	<b>04 Hours</b>	<b>7%</b>
1.1	Types of Fluid		
1.2	Fluid properties		
1.3	Fluids as a continuum		
1.4	Control volume concept		
1.5	Viscometers		
<b>2</b>	<b>Fluid Statics</b>	<b>10 Hours</b>	<b>17%</b>
2.1	Pressure and its measurement		

- 2.2 Pascal's law, hydrostatic pressure, atmospheric, absolute, gauge and vacuum pressure
- 2.3 Pressure measurement through piezometer and manometer
- 2.4 Total pressure, intensity of pressure, centre of pressure, Pressure on horizontal, vertical, inclined and curved surface
- 2.5 Floating Bodies, Buoyancy and centre of buoyancy, meta centre and meta centre height
- 2.6 Condition of equilibrium of floating and submerged body, determination of meta-centric height by experimental and analytical method, stable and unstable equilibrium, pressure in case of accelerated rigid body motion
- 3 Fluid Kinematics 09 Hours 15%**
- 3.1 Types of fluid motion, methods of describing fluid flow - Lagrangian and Eulerian method
- 3.2 Inviscid flows, velocity and acceleration, flow rate
- 3.3 Continuity equation
- 3.4 Potential flows, flow lines, velocity potential and stream function
- 3.5 Flownet its characteristic and utility, circulation and vorticity
- 4 Fluid Dynamics 08 Hours 13%**
- 4.1 Energy processed by a fluid body, Types of forces, Forces influencing fluid motion, head-energy correction factor
- 4.2 Euler and Bernoulli's equations, application of Bernoulli's equation
- 4.3 Flow measurement, momentum of fluid in motion, momentum equation and momentum correction factor
- 4.4 Application of momentum equation, forces on a pipe bend, free jets
- 5 Measurement of Flow 08 Hours 13%**
- 5.1 Orifice & Mouth piece Classification, hydraulic coefficients, experimental determination of hydraulic coefficient, discharge through all types of orifice & mouthpiece, time of emptying the tank through orifice and mouthpiece
- 5.2 Notches and Weirs Classification, discharge through various types of Notches and weirs, time of emptying a reservoir or a tank with notches & weirs

5.3	Venturimeter		
5.4	Nozzles and Bendmeter		
<b>6</b>	<b>Flow Through Pipes</b>	<b>09 Hours</b>	<b>15%</b>
6.1	Introduction		
6.2	Major and minor losses of energy in pipes, hydraulic gradient, total energy line		
6.3	Pipes in series and parallel, flow through branched pipes		
6.4	Hydraulic transmission of power		
6.5	Water hammer and its effects		
<b>7</b>	<b>Open Channel flow</b>	<b>10 Hours</b>	<b>17%</b>
7.1	Comparison between pipe flow and open channel flow		
7.2	Classification of open channel flow		
7.3	Uniform flow – Chezy's formula		
7.4	Manning's formula- numerical		
7.5	Hydraulically efficient channel cross section		
7.6	Rectangular section		
7.7	Trapezoidal section and circular section		
<b>8</b>	<b>Introduction to the Hydraulic machinery</b>	<b>2 Hours</b>	<b>3%</b>
8.1	Introduction to various types of Turbines and hydraulic pumps, Hydraulic press - hydraulic accumulator - Hydraulic ram		
8.2	Working principle, discharge calculations and use of and machines Centrifugal pumps		

**C. Course Outcomes (COs):**

At the end of the course, the students will be able to

- CO1 Determine the properties of fluid and pressure and their measurement.
- CO2 Apply continuity equation and energy equation in solving problems on flow through conduits.
- CO3 Compute the frictional loss in laminar and turbulent flows.
- CO4 Design open channels for most economical sections like rectangular, trapezoidal and circular sections.
- CO5 Select the type of pumps and turbine required with reference to available head of water and discharge.

### Course Articulation Matrix:

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3
CO1	3	3	-	2	-	-	-	-	-	-	-	2	1	-	-
CO2	3	3	2	-	-	-	-	-	-	1	-	2	1	-	-
CO3	2	2	1	-	-	-	-	-	-	-	-	1	1	-	-
CO4	3	3	2	1	-	-	-	-	-	1	-	2	2	-	2
CO5	3	1	-	-	-	1	-	-	-	-	-	2	1	-	1

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation “-”

**CL245.01 : BUILDING CONSTRUCTION TECHNOLOGY**  
**B TECH 4<sup>TH</sup> SEMESTER (CIVIL ENGINEERING)**

**Credits and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	3	2	5	4
Marks	100	50	150	

**A. Outline of the Course:**

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Masonry Works	09
2	Foundations	07
3	Doors, Windows & Ventilators	05
4	Stairs and Staircases	05
5	Floors and Floorings	05
6	Roofs and Roof Coverings	05
7	Wall Finishes	04
8	Temporary Works	05

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

**B. Detailed Syllabus:**

- 1 Masonry Works** **09 Hours 20%**
- 1.1 Stone masonry:  
 Technical terms; materials used; classification – random rubble, square rubble, Ashlar fine tooled, Ashlar chamfered; joints
- 1.2 Brick masonry: Technical terms; bonds in brick work – stretcher, header, English, Flemish, Raking; pointing – method and types

1.3	Composite masonry: Brick-stone composite masonry - properties and uses; Concrete masonry – hollow concrete blocks, Autoclaved aerated concrete (AAC), Advantages and Disadvantages over other cement construction materials; Reinforced brick masonry		
<b>2</b>	<b>Foundations</b>	<b>07 Hours</b>	<b>16%</b>
2.1	Classification, Necessity, essential requirements		
2.2	methods of site exploration		
2.3	Settlement, causes of failures of foundation and remedial measures		
2.4	Bearing capacity of soils		
2.5	Shallow foundations: Depth of footing, types and construction, design of strip footing		
<b>3</b>	<b>Doors, Windows &amp; Ventilators</b>	<b>05 Hours</b>	<b>11%</b>
3.1	Doors: Location, technical terms, door frames, types of doors – construction, suitability - panelled, glazed, flushed doors, collapsible steel doors		
3.2	Windows: Types of windows–construction, suitability - Casement, Sash, and Skylight windows		
3.3	Ventilators: Ventilators combined with window; fan light fixtures and fastenings		
<b>4</b>	<b>Stairs, Staircases and escalators</b>	<b>05 Hours</b>	<b>11%</b>
4.1	Technical terms, requirements of good stair		
4.2	Dimensions of a step, types of steps, classification of stairs		
4.3	Design of stair, example – stair planning, elevators, escalators		
<b>5</b>	<b>Floors and Floorings</b>	<b>05 Hours</b>	<b>11%</b>
5.1	Components of a floor		
5.2	Flooring material and factors affecting selection of flooring material		
5.3	Types of ground floors –cement concrete, tiles, marble, timber etc., Recent Developments in Flooring Technology		
5.4	Types of upper floors –Conventional floors (timber, steel joist), reinforced cement concrete & pre-cast concrete floors		
<b>6</b>	<b>Roofs and Roof Coverings</b>	<b>05 Hours</b>	<b>11%</b>
6.1	Requirements of a good roof, technical terms		
6.2	Types of roofs – single, trussed, steel roof trusses		

6.3 Types of roof covering –G.I. Sheets, light weight roofing, Flat terraced roof – advantages, disadvantages, types, Water proofing techniques in flat roofs.

**7 Wall Finishes** **04 Hours 09%**

7.1 Plastering: Objectives, requirements, terms, tools, cement plaster, special materials used in plastering, defects

7.2 Painting: Painting on different surfaces, defects, Recent Developments in painting technology

**8 Temporary Works** **05 Hours 11%**

8.1 Timbering in trenches

8.2 Component and types of scaffolding

8.3 Formwork

### C. Course Outcomes:

On the successful completion of this course, the students will be able to:

CO1 Understand the types, dimensions and method of construction of various building components along with various checks required for their construction.

CO2 Identify, select and recommend appropriate type of building elements suitable for a particular situation.

CO3 Select and recommend appropriate temporary structures suitable for various building construction needs.

CO4 Select and recommend appropriate mode of vertical movements and design of staircase

CO5 Design strip footing type of shallow foundation.

### Course Articulation Matrix:

| 1. Introduction                                                                                                                                           | 04 Hours | 10% |
| 1.1 Concepts of Structural Analysis                                                                                                                       |          |     |
| 1.2 Idealization of structures                                                                                                                            |          |     |
| 1.3 Static indeterminacy and kinematic indeterminacy                                                                                                      |          |     |
| 2 Slope and Deflection of Statically Determinate Beams                                                                                                    | 09 Hours | 20% |
| 2.1 Differential Equation of the Elastic Curve, Relationship of slope deflection with radius of curvature, bending moment, shear force and load intensity |          |     |

2.2	Relation between Moment, Slope and Deflection using fundamental, Macaulay's Method (Method of Singularity Function), Moment Area Method, Conjugate Beam Method		
<b>3</b>	<b>Combined Direct and Bending Stresses</b>	<b>06 Hours</b>	<b>13%</b>
3.1	Eccentric Loading along One Principle Axis		
3.2	Middle Third Rule, Kernal (Core) of Section		
3.3	Column Subjected to Biaxial Bending		
3.4	Structures Subjected to Lateral Pressure		
<b>4</b>	<b>Columns and Struts</b>	<b>06 Hours</b>	<b>13%</b>
4.1	Buckling of Columns, different end conditions		
4.2	Euler's Theory, Equivalent Length		
4.3	Applicability and limitations of Euler's Formula		
4.4	Rankine's Formula		
<b>5</b>	<b>Influence Line for Determinate Beams</b>	<b>10 Hours</b>	<b>22%</b>
5.1	Uses of influence lines, Various Types of Loading		
5.2	Influence lines for statically determinate beams under moving loads		
5.3	Influence lines for support reactions, shear force & bending moment for uniformly distributed load and several point loads		
5.4	Criteria for maximum effects		
<b>6</b>	<b>Torsion in Circular Shafts</b>	<b>04 Hours</b>	<b>9%</b>
6.1	Assumption for shear stress in a circular shaft subjected to torsion		
6.2	Torsion Stress and Strain, Torsion Formula		
6.3	Power Transmitted by Shaft		
6.4	Design of Shaft: Shafts of Uniform Section, Shaft of Varying Section, Coupling and Keys		
<b>7</b>	<b>Arches</b>	<b>06 Hours</b>	<b>13%</b>
7.1	Arches as structural forms – Examples of arch structures, Types of arches		
7.2	Analysis of three hinged - parabolic and circular arches		

### C. Course Outcomes :

On the successful completion of this course students will be able to

- CO1 Identify the stability and determinacy of planar structures.
- CO2 Calculate deflections for statically determinate beams using different methods of analysis.
- CO3 Analyses the columns with different end conditions and understand the effect of same.
- CO4 Construct influence lines for statically determinate beams and to use influence lines to find maximum load effects in beams.
- CO5 Calculate the combined stresses and torsion in the circular shaft.
- CO6 To analyze the determinate arches.

2	Crystal Structure and Properties	10
3	Mechanism of crystallization & Phase Transformation	06
4	Engineering Steels and Alloys	07
5	Corrosion and degradation of metals	04
6	Fiber Reinforced Composites	08
7	Engineered Wood & Wood Products	06

Total Hours (Theory): 45

Total Hours (Lab): 20

Total Hours: 65

**B. Detailed Syllabus**

<b>1.0 Introduction to Material Science</b>	<b>04 Hours</b>	<b>9%</b>
1.1 Classification of Engineering Materials		
1.2 Engineering requirements of materials		
1.3 Properties of engineering materials		
1.4 Criteria for selection of materials for engineering applications		
1.5 Structure property relationship		
<b>2.0 Crystal Structure and Properties</b>	<b>10 Hours</b>	<b>22%</b>
2.1 Atomic structure & bonding in solids		
2.2 Bravais lattices & Crystal Structure, Crystal planes & directions, Atomic packing		

- 2.3 Bragg Law & Diffraction
- 2.4 Imperfection in solids, Linear defects, Slip, Dislocation & Plastic deformation, Planar defects, Volume defects
- 2.5 Mechanical properties of metals, Strain hardening, Thermal, Magnetic, Electrical & Optical properties of materials
- 3.0 Mechanism of crystallization & Phase Transformation** **06 Hours 13%**
- 3.1 Nucleation - Homogeneous and Heterogeneous  
Nucleation - Growth - Single crystal - Polycrystalline Materials  
- Basic principles of solidification of metals and alloys
- 3.2 Phase diagram & phase transformation
- 4.0 Engineering Steels and Alloys** **07 Hours 16%**
- 4.1 Iron carbon diagram and phase diagrams
- 4.2 Grades of CI, Alloyed Cast Iron, Malleable Iron and S. G. Iron
- 4.3 Classification, Properties and Use of Structural Steels, High Carbon and Mild Steels, TMT Steel
- 4.4 Effects of different alloying metals
- 5.0 Corrosion and degradation of metals** **04 Hours 9%**
- 5.1 Causes and nature of corrosion
- 5.2 Inter-granular corrosion (IGC), Hydrogen embrittlement
- 5.3 Measures of counteracting corrosion,
- 5.4 Metal coatings, Organic coatings, Lining and cladding, Use of Corrosion inhibitors, Cathodic protection against corrosion
- 6.0 Fiber Reinforced Composites** **08 Hours 18%**
- 6.1 Types and application of composites
- 6.2 Particle reinforced composites, Influence of fiber orientation and concentration
- 6.3 Fiber phase and the matrix phase, Polymer matrix composite
- 6.4 Metal matrix composite, Ceramic matrix composite and carbon-carbon composites

## 7.0 Engineered Wood and Wood Products

06 Hours 13%

- 7.1 Laminated veneer lumber (LVL): Laminated strand lumber (LSL), Parallel strand lumber (PSL), Wood I-joists, Glue-laminated beams
- 7.2 Reconstituted products: Particle boards, Medium Density Fibre Board (MDF), Hardboard and Block Board

### C. Course Outcomes :

On the successful completion of this course:

- CO1 Familiar with various atomic bonding and crystal structure, and also their characteristics and influence on engineering properties
- CO2 Understand basic engineering properties of materials and the underlying structural features which are governing such properties
- CO3 Know the mechanism of crystallization and phase transformation in major engineering materials
- CO4 Be able to understand fundamentals of various engineering steels and alloys and should have ability to select suitable materials based on their structure-property relations
- CO5 Be able to understand the corrosion and other degradation in metals and suggest suitable remedial measures.
- CO6 Know the structure, properties and application of various fiber reinforced composites used in engineering, Know process, structure, properties and application of various processed wood products used in engineering

### Course Articulation Matrix:

- 2.6 Water Quality Impact Analysis
- 2.7 Vegetation And Wild Life Impact Analysis
- 2.8 Cumulative Impact Assessment
- 2.9 Ecological Impact Assessment
- 2.10 Risk Assessment
- 3 Process of Impact Assessment** **07 Hours 23%**
- 3.1 Process for Environmental Impact Study
- 3.2 Terms of Reference
- 3.3 Stages in EIS Production: Screening, Scoping, Prediction, Evaluation, Reducing Impact, Monitoring, Conclusions
- 3.4 Components of EIA Reports
- 4 Tools for Assessing Environmental Impact** **07 Hours 23%**
- 4.1 Impact Assessment Methodologies - various Methods - Their Applicability
- 4.2 Rapid EIA
- 4.3 Strategic Impact Assessment
- 4.4 Cumulative Impact Assessment
- 5 EIA in Indian Scenario** **04 Hours 14%**
- 5.1 Provisions in the EIA Notification by MoEFCC
- 5.2 Categorization of Industries for Seeking Environmental Clearance
- 5.3 Procedure for Environmental Clearance
- 5.4 Environmental Management Plan
- 5.5 Case Study: Sardar Sarovar Dam, Narmada Project

### C. Course Outcomes:

On the completion of the course the students will be able to:

- CO1 Decide on the typical parameters to be considered in a EIA study of a developmental project.
- CO2 Fully participate in interdisciplinary environmental report preparation teams
- CO3 Review and understand an EIA document for completeness and adequacy

CO4 Review a typical development project plan and identify possible environmental effects and prepare appropriate initial studies

CO5 Utilize EIA documents for policy development, project planning or for legal or political action planning

**C. Course Outcome :**

At the end of the course, the students will be able to

CO1 Understand the concepts and mechanics of values and ethics.

CO2 Understand the significance of value and ethical inputs in and get motivated to apply them in their life and profession.

CO3 Understand the significance of value and ethical inputs in and get motivated to apply them in social, global and civic issues.

CO4 Develop their responsibility towards society.

CO5 Comprehend their own core values and adhere to those values at their workplace.

CO6 Practice Ethical Leadership.

A. Outline of the course:

Sr. No.	Title of the unit	Minimum Number of Hours
1.	Basics of Python	01
2.	Variables and Data Types	04
3.	Loops and Conditional Control	06
4.	Advanced Data Structures	04
5.	Functions	02
6.	Object Oriented Programming in python	08
7.	Reading and Writing Files	03
8.	Packages and Modular Programming	02

Total Hours (Theory): 30

Total Hours (Lab): 60

Total Hours: 90

B. Detailed Syllabus:

1.	Basics of Python	01 Hour	03%
1.1	Introduction to Python		
1.2	Installation and Environment Setup		
1.3	Simple Python Program Practice		
2.	Variables and Data Types	04 Hours	13%
2.1	Variables, Operators, Precedence and Associativity		
2.2	Data Types , Indentation, Comments, Reading Input, Print Output		
2.3	Memory Optimization		
2.4	Type Conversion		

<b>3. Loops and Conditional Control</b>	<b>06 Hours</b>	<b>20%</b>
3.1 The if... Decision Control Flow Statement, The if...else Decision Control Flow Statement, The if...elif...else Decision Control Statement		
3.2 Nested if Statement, The while Loop, The for Loop,		
<b>4. Advanced Data Structures</b>	<b>04 Hours</b>	<b>13%</b>
4.1 Lists- Basic List Operators, Replacing, Inserting, Removing an Element, Searching and Sorting Lists, Tuples.		
4.2 Dictionaries- Dictionary Literals, Adding and Removing Keys, Accessing and Replacing Values; Traversing Dictionaries.		
4.3 Sets, Strings, Files and their Libraries		
<b>5. Functions</b>	<b>02 Hour</b>	<b>07%</b>
5.1 Defining a Function, Calling a Function		
5.2 Pass by Reference vs Value, Function Arguments, Required and Default Arguments, Keyword Arguments and Variable-Length Arguments		
5.3 The Anonymous Functions, The Return Statement		
5.4 Scope of Variables		
<b>6. Object Oriented Programming in python</b>	<b>08 Hours</b>	<b>27%</b>
6.1 Object-Orientation Introduction, Class Definition, Class Objects, Instance Objects, Method Objects		
6.2 Class and Instance Variables, Inheritance, Private Variables, The Polymorphism		
<b>7. Reading and Writing Files</b>	<b>03 Hour</b>	<b>10%</b>
7.1 Reading Files, Parsing and Processing Files		
7.2 File storage, File operations (delete, copy)		
<b>8. Packages and Modular Programming</b>	<b>02 Hour</b>	<b>07%</b>
8.1 Executing modules as Scripts, Import and Use of Built-in Modules, Accessing Third Party Packages and Modules		
8.2 Creating Custom Modules and Packages, Importing and Using Custom Modules		

### C. Course Outcomes :

On the completion of the course one should be able to:

- CO1 To describe the core syntax and semantics of Python programming language.
- CO2 To illustrate the process of structuring the data using lists, dictionaries, tuples and sets.
- CO3 To introduce function - focussed programming paradigm through python.
- CO4 To infer the Object-oriented Programming concepts in Python.
- CO5 To indicate the use of regular expressions and built-in functions to navigate the file system.
- CO6 To train in the development of solutions using modular concepts.

### Course Articulation Matrix:

### D. Student Learning Outcomes:

At the end of the course the students will be able to:

- Interpret the fundamental python syntax, semantics and fluent in the use of python control flow statements.
- Determine the methods to create and manipulate python programs by utilizing the data structures like lists, dictionaries, tuples and sets.
- Express proficiency in the handling of strings and functions.
- Articulate the Object-Oriented Programming concepts such as inheritance and polymorphism as used in Python.
- Identify the commonly used operations involving file systems, and regular expressions.
- Execute modules as a script.

## E. Recommended Study Material:

### Text Books:

1. Nagar, Sandeep, "Introduction to Python for Engineers and Scientists - Open Source Solutions for Numerical Computation", Apress, 2018.
2. Kenneth Lambert, "Fundamentals of Python: First Programs", ISBN-13: 978-1337560092, Cengage learning publishers, first edition, 2012.
3. Magnus Lie Hetland, "Beginning Python from Novice to Professional", Third Edition, Apress, 2017
5. Reema Thareja, "Python Programming using Problem Solving Approach", ISBN-13:978-0-19-948017-3, Oxford University Press, 2017.

### Reference Books:

1. David Beazley, Brian K. Jones, "Python Cookbook", 3rd edition, O'REILLY, 2016
2. Brett Slatkin, "Effective Python: 59 Specific Ways to Write Better Python", Novatec, 2016
3. Allen Downey, "Think Python: How to Think Like a Computer Scientist", Green Tea Press, 2015
4. Mark Lutz "Learning Python", 4th Edition, O'REILLY, 2016
6. Vamsi kurama, "Python programming: A modern approach", ISBN-978-93-325-8752-6, Pearson, 2018.
7. W. Chun, "Core python programming", ISBN-13: 978-0132269933, Pearson, 2nd edition, 2016.

### Web Materials:

### Software:

1. Python IDLE
2. Anaconda Python
3. PyCharm

## LIST OF PRACTICALS

Practical No.	Name of Practical
1	Setting Transition curve & vertical curve using python
2	Determination of capacity of reservoir and volume of borrow pits
3	Determining areas from plans, trapezoidal rule- Simpson's rule
4	Estimation of discharge through notches and weirs
5	Estimation of time of emptying a reservoir or a tank
6	Estimation of discharge through Venturimeter
7	Developing the programme to calculate the bending moment and shear force & plot the diagrams
8	Calculation of deflections of determinate structures & plot the diagrams
9	Development of programme to obtain moment of inertia of regular shapes

**MA246: NUMERICAL ANALYSIS**  
**B TECH 4<sup>TH</sup> SEMESTER (MATHS ELECTIVE)**

---

**Credit and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/Week	3	2	5	4
Marks	100	50	150	

**A. Outline of the Course:**

Sr. No	Title of Unit	Minimum number of Hours
1	Numerical Analysis and Computers	05
2	Approximate solutions of nonlinear equations and system of linear equations	07
3	Numerical Integration and Differentiation	07
4	Interpolation and Polynomial Approximation	08
5	Numerical Solution of Ordinary Differential equations	08
6	Numerical Solution of Ordinary and Partial Differential equations	10

**Total Hours (Theory): 45**

**Total Hours (Lab): 30**

**Total Hours: 75**

**B. Detailed Syllabus:**

- |     |                                                                     |          |     |
|-----|---------------------------------------------------------------------|----------|-----|
| 1   | Numerical Analysis and Computers                                    | 05 Hours | 12% |
| 1.1 | Concepts and definitions                                            |          |     |
| 1.2 | Representation of numbers in computers, types of errors             |          |     |
| 1.3 | Basic sources of errors, significant digits                         |          |     |
| 1.4 | Computer arithmetic, errors in computations with digital computers. |          |     |

<b>2</b>	<b>Approximate solutions of nonlinear equations and System of linear equations</b>	<b>07Hours</b>	<b>16%</b>
2.1	Bisection method, Method of False position, Method of Iteration.		
2.2	Newton-Raphson method for single variable		
2.3	Convergence criteria and rate of convergence and error estimates for these methods.		
2.4	Direct Method: Gauss Jordan method, Crout's LU-factorization methods.		
2.5	Indirect methods: Gauss Seidel and Jacobi's methods.		
<b>3</b>	<b>Numerical Integration and Differentiation</b>	<b>07 Hours</b>	<b>16%</b>
3.1	Composite Quadrature (Newton-Cotes Quadrature)		
3.2	Romberg Integration and Gaussian Quadrature		
3.3	Remainder terms, error bounds and estimates of these rules		
3.4	Numerical Differentiation		
<b>4</b>	<b>Interpolation and Polynomial Approximation</b>	<b>08 Hours</b>	<b>18%</b>
4.1	Finite differences and associated operators		
4.2	Newton's difference interpolation		
4.3	Lagrange interpolation, Hermite interpolation		
4.4	Error estimates of these formulae		
<b>5</b>	<b>Numerical Solution of Ordinary Differential equations</b>	<b>08 Hours</b>	<b>18%</b>
5.1	Euler and Modified Euler Method, Runge -Kutta methods		
5.2	Wilson-Theta Method, Newmark Beta Method		
<b>6</b>	<b>Numerical Solution of Partial Differential equations</b>	<b>10 Hours</b>	<b>20%</b>
6.1	Finite difference approximations to derivatives		
6.2	Solution of Laplace Equation by Gauss Jacobi and Gauss Seidel Method		
6.3	Solution of Heat Equation in One dimension		
6.4	Solution of Wave Equation in One dimension		

### C. Course Outcome:

After learning the course, students will be able to

- CO1 Employ the knowledge of various types of numerical methods to Engineering and real world problems.
- CO2 Determine approximate solution of non-linear equations and system of linear equations and examine the error using numerical methods.
- CO3 Use numerical techniques for differentiation and definite integration.
- CO4 Interpolate or extrapolate approximate value of dependent variable for any value of independent variable, employing only finitely many tabulated values.
- CO5 Interpret the solution of ordinary and partial differential equation numerically.
- CO6 Construct the algorithm and perform the various commands in programming language.

### Course Articulation Matrix:

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3
CO1	3	3	1	2	-	-	-	-	-	-	-	1	1	1	-
CO2	3	3	1	2	-	-	-	-	-	-	-	-	1	-	-
CO3	3	3	1	2	-	-	-	-	-	-	-	-	1	-	-

**B TECH 4<sup>TH</sup> SEMESTER (MATHS ELECTIVE)**

---

**Credit and Hours:**

Teaching Scheme	Theory	Practical	Total	Credit
Hours/Week	3	2	5	4
Marks	100	50	150	

**A Outline of the Course:**

Sr. No	Title of Unit	Minimum number of Hours
1	Basic Probability Concepts	06
2	Random Variables	07
3	Special Probability Distributions	08
4	Elementary Statistical Inference	06
5	Regression Analysis	08
6	Time Series Analysis	10

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

**B Detailed Syllabus:**

1	<b>Basic Probability Concepts</b>	<b>06 Hours</b>	<b>14%</b>
1.1	Set Theory, Sample Space and Events		
1.2	Probability Set Function,		
1.3	Conditional Probability and Baye's Theorem		
1.4	Independence		
2	<b>Random Variables and Probability distribution</b>	<b>07 Hours</b>	<b>16%</b>
2.1	Discrete and Continuous random variables.		
2.2	Transformations		
2.3	Expectations of a random variable		
2.4	Distributions of two random variables and expectation		

2.5	Transformation and bivariate random variables, conditional distributions and expectation		
2.6	Independent random variable, Linear combinations of random variable		
<b>3</b>	<b>Special Probability Distributions</b>	<b>08 Hours</b>	<b>18%</b>
3.1	Discrete Probability distributions Binomial, Poisson, Geometric and Negative binomial		
3.2	Continuous Probability distribution Uniform, Exponential, Gamma and Normal distribution		
3.3	Sampling distributions: t F and Chi-square distribution		
<b>4</b>	<b>Elementary Statistical Inference</b>	<b>06 Hours</b>	<b>14%</b>
4.1	Confidence Intervals and Hypothesis Testing: Mean, Variance and Proportion		
4.2	Confidence Intervals and Hypothesis Testing: Difference of Two Means, Variances and Difference of Two Proportions		
<b>5</b>	<b>Regression Analysis</b>	<b>08 Hours</b>	<b>18%</b>
5.1	Simple Linear Regression: Fitting a straight line using least squares		
5.2	Tests of significance and confidence intervals		
5.3	Checking the straight line fit		
5.4	Multiple Regression: Formulation of the model		
5.5	Linear least squares solutions using the matrix method.		
5.6	Model diagnostics		
<b>6</b>	<b>Time Series Analysis</b>	<b>10 Hours</b>	<b>20%</b>
6.1	Introduction to Stochastic and Deterministic Dynamic Mathematical Models		
6.2	Stationary and Nonstationary Stochastic Models for Forecasting and Control		
6.3	Autocorrelation Function and Spectrum of Stationary Processes		
6.4	Estimation in the time-domain		
6.5	Stationary processes in the frequency domain		

### C. Course Outcome:

At the end of the course, the students would be able to

- CO1 Solve the problems related Probability and Properties of Probability.
- CO2 Evaluate Probabilities from probability distribution of random variable.
- CO3 Compute summary statistics and apply the methods of Estimation and Tests of Statistical Hypothesis in Civil Engineering.
- CO4 Analyze the nature of relationship between two variables and compute correlation coefficient, regression coefficients.
- CO5 Describe the different types of Time Series Models and evaluate the autocorrelation, Spectrum and related concepts for forecasting. in Civil Engineering
- CO6 Construct and practice the algorithms of statistical techniques using MATLAB software.
