

Refinishing Care & Maintenance

To keep your refinished surface looking great and to maintain your warranty, it's important to follow these care guidelines:

ADX Refinishing guarantees that the finish will not peel or lose adhesion from the primer or topcoat for the following periods:

- 36 months for bathtubs, counters, and showers**
- 12 months for kitchen and bathroom sinks**

Please note the warranty does not cover damage caused by misuse or accidents, cracked grout, or issues with caulking.

Failure to follow these care instructions will void the warranty.

NOTE: After refinishing, it's normal for a small amount of dust to settle on the surface as the coating cures. This may result in a slightly rough texture at first, but don't worry—regular cleaning and use will naturally remove this surface dust over the next few weeks.

Maintenance

- Do not use any abrasive cleaners or cleaning pads, such as Ajax, Comet, Soft Scrub, bleach, Tile X, SOS pads or pumice stones
- Take care not to drop or drag any objects that can cause the finish to chip, scrape or mar.
- Do not use the tub/sink for liquid storage or dyes for hair or clothing as it will stain.
- The owner/user must maintain faucets and plumbing. Dripping water will erode the new finish, causing it to wear prematurely.
- Do not use mats with suction cups on tub or shower bottoms.
- Do not use liquid drain openers on refinished fixtures.
- Do not use refinished countertops as a cutting board.
- Do not place hot pans on refinished countertops. Extreme heat can damage the finish.

Care Instructions:

- Clean refinished fixture once a week.
- Wipe excess water from the surface after each use for the first 10 days after refinishing
- Recommended cleaners: Pine-Sol, 409, Mr. Clean, Fantastik, Dow, Scrubbing Bubbles, or any other non-acidic, non-abrasive, non-bleaching cleaners
- Recommended cleaning pads: sponge, wash cloth, or cleaning pads designed for Teflon surfaces.
- Owner must maintain caulking on all areas to keep surfaces sealed.
- We recommend the use of liquid soap or body wash since they rinse easily and prevent bar soap residue.
