

At **Pharmosaic Consulting™ LLC**, we provide expert consulting services across all stages of pharmaceutical development, including:

- API developability
- Formulation of small molecules, biologics, and polymeric actives
- Drug product development for liquid and semisolid dosage forms
- Process development and scale-up
- Statistical analysis and Design of Experiment (DoE)
- Chemistry, Manufacturing, and Controls (CMC) and Quality by Design (QbD)
- Innovation and emerging technologies
- Fractional leadership in pharmaceutical and formulation development

We welcome the opportunity to discuss your specific development needs during a complimentary consultation.

Email us at mdoherty@pharmosaic.com to schedule your session.

Michael Quinn Doherty
Founder & Principal Consultant
Pharmosaic Consulting™ LLC

With over 20 years of experience across drug substance, drug delivery, and product development, I bring deep expertise and hands-on expertise to every project.

I've held leadership roles at both CDMOs and pharmaceutical companies, where I've advanced high-concentration biologics delivery, developed cutting-edge topical formulas, and led innovations in controlled-release technologies.

Grounded in chemistry and guided by scientific rigor and creative problem-solving, I specialize in navigating complex pharmaceutical and regulatory challenges.

Let's move your development program forward —strategically, efficiently, and with purpose.
