KENNY FORREL

ABOUT

Kenny Forrel, a young, new artist from North Carolina, who makes RnB music that is heavily influenced by classic hip hop music, lofi and beloved seventies staples. His church filled youth and experience on the drums, both performing and teaching, has given him a structured understanding of music that heavily translates into the composition of his songs. All of his music contains a strong essence of nostalgia and often includes an intense sense of longing. Longing for love, success, and happiness. Moreover, it's clear from Kenny's discography that he is a lovestruck fool and often takes us along with us as he navigates the relatable topics of relationships and the concept of love. Kenny has curated an extremely smooth sound. From Kenny's voice itself to his melodies, lyrics and production choices, it all places his listeners in a space of relaxation and introspection. Kenny Forrel always creates a funky, groovalicious atmosphere no matter the subject and his lyrics are insightful and honest and always written by himself, which assist in creating a signature safe, intimate space at shows and in the minds of his listeners.
