Jesus Foretold His Death

- 17 Now Jesus, going up to Jerusalem, took the twelve disciples aside on the road and said to them,
- 18 “Behold, we are going up to Jerusalem, and the ***Son of Man will be Betrayed*** to the chief priests and to the scribes; and they will ***Condemn Him to Death***,
- 19 And deliver Him to the Gentiles to mock & to scourge and to crucify. And the third day ***He will rise again.***”

Matthew Chapter 20 verses 17-19

According to the National Cancer Institute, colon cancer is the second cause of death from cancer in the United States. Most cases of colon cancer begin as small noncancerous clumps of cells called polyps. Over time these polyps can become colon cancers. For this reason, doctors recommend regular screening tests to help prevent colon cancer by removing these polyps before they turn into cancer. People with an average risk of this cancer should consider screening beginning at age 50. However, people with an increased risk factor should consider screening sooner.

Our risk for colon cancer increases as we age, however according to the CDC, in recent years the number of deaths from colon cancer are decreasing in persons over the age of 55 and increasing for those under 50. It is important to discuss your family history with your doctor so that he can properly determine your risks for developing this disease. Risk factors include:

- ◇ Family history of colon cancer
- ◇ Personal history of polyps
- ◇ Getting older
- ◇ African American heritage
- ◇ Inflammatory intestinal conditions such as Crohn's disease
- ◇ Diabetes and heavy alcohol consumption
- ◇ Smoking and Obesity

Early stage colon cancer does not always cause symptoms. If there are symptoms they may include:

- ◇ Rectal bleeding or blood in your stool
- ◇ A change in bowel habits that lasts longer than four weeks
- ◇ Abdominal discomfort such as pain, cramps, aches
- ◇ Weakness or fatigue
- ◇ Unexplained weight loss

Begin today to take steps to reduce your risk of developing colon cancer by making changes in your everyday life. Take steps to:

- ◇ Eat a variety of vegetables, fruit and whole grains
- ◇ Exercise at least 30 minutes a day
- ◇ Maintain a healthy weight
- ◇ Stop smoking
- ◇ Limit your intake of processed meat

Early detection is the key to prevention. According to the National Cancer Institute, nine out of ten people whose colon cancer is found early and treated appropriately are still alive 5 years later.

Don't Put It Off !!

Talk with your doctor today about screening options

Annie Armstrong Easter Offering

Mothers Board

The Mothers are collecting new & used Bibles, Books & Magazines for three Nursing Homes.
