Philippians 4 :4-8

| <p>4 Rejoice in the Lord always: and again I say, Rejoice.</p> <p>5 Let your moderation be known unto all men. The Lord is at hand.</p> <p>6 Be careful for nothing; but in everything by prayer and supplication with thanksgiving let your request be made known unto God.</p> <p>7 And the peace of God, which passeth all understanding, shall keep your hearts and minds through Christ Jesus.</p> | <p>8 Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things.</p> |

Becoming a Christian
is as easy as...

- A** dmit you have sinned.
- B** elieve Jesus died for you.
- C** hoose to accept His gift of forgiveness.

Think on
these
Things

From the Health Ministry:

With the exception of skin cancer, breast cancer is the most common cancer in American women. Statistics have shown that 1 in 8 women will develop invasive breast cancer during their lifetime. Breast cancer is also second only to lung cancer as the leading cause of cancer deaths in women. Though these statistics are grim, the good news is that breast cancer deaths have been decreasing since 1989 and this is attributed to early detection through screening, increased awareness and better treatment options. The main factors that influence breast cancer risks are being a woman and getting older. Other factors include but are not limited to:

- 1) A family history of breast cancer (parent, sibling or child)
- 2) Changes in the breast cancer related genes (BRCA 1 or BRCA 2)
- 3) Taking hormone replacement therapy for more than 5 years
- 4) Taking birth control pills
- 5) A personal history of dense breasts (Mammograms will detect the dense breast tissue)
- 6) A history of radiation to the breast or chest
- 7) Being obese or having a history of alcohol abuse
- 8) Lack of physical activity

Screening test can help find breast cancer early which can allow a better chance for successful treatment. A yearly mammogram and breast exam by your doctor are highly recommended for early detection. Also pay close attention to changes in your body and do not ignore these symptoms:

- 1) Lump in the breast or underarm area
- 2) Thickening or swelling of the breast
- 3) Skin dimpling or irritation
- 4) Nipple retraction or discharge
- 5) Redness or an orange peel appearance of the skin

If you have any concerns that worry you, do not hesitate to talk with your doctor.

Please Note: *If you have lumpy dense breasts request a 3D Mammogram !!*

All women should be requesting a digital mammogram !!
