

Bang & Olufsen

Beomaster 1400

This seem to be working - both channels ok.

Selecting Tape gives a lot of noise

All other controls working but noisy pots - need a bit of Servisol

FM working

Tape needs service

Some indicator lights out

Some marks to casing

Beomaster 2400-2

Right Channel is half the volume of the Left Channel.

But doesn't sound distorted.

FM seems to be working

Otherwise seem ok

Some marks to casing

Also remote but not tried so assume not working

Beogram 1203

Belt replaced with quality item from Denmark

Seems to be working ok. (I thought it didn't!)

Playe an LP and sounds good arm auto working to start LP and pick up return at end. Sizing also works

Beogram 6000

Bit suspect. Does turn on.

Buttons not very responsive. Managed to get it turning at 33rpm and

stop but don't know how as difficult to repeat. Cartidge MMC20S is there but stylus tip missing from cantilever

Possibly good for re tip?
