

Dear Families,

We are thrilled to share some exciting updates and insights with you this month at Minerva Private Academy! Our doors are open, and the journey has begun. Thank you for being part of this growing community where every child's potential is celebrated, nurtured, and unlocked. Here's what's happening at Minerva:

The Power of Enrichment: Why Screen-Free, Engaging Afternoons Matter

In today's fast-paced digital world, children are spending more and more time glued to screens, often unsupervised, after school hours. While technology has its place, too much unsupervised screen time can lead to social isolation, reduced creativity, and even negative impacts on mental health. At Minerva Private Academy, we have created a powerful alternative. Our programs are designed to minimise screen time and maximise real-world engagement, helping children connect, create, and grow. Through art, music, languages, sports, and structured social interaction, students are given the tools to develop vital life skills such as communication, critical thinking, empathy, and resilience. Creative activities like visual arts and music nurture emotional intelligence and self-expression, while group activities foster collaboration and friendship, critical ingredients for thriving in life and learning. By offering a carefully crafted, screen-free environment every afternoon, Minerva is helping families build a stronger, healthier foundation for their children's future, one filled with creativity, confidence, and joy.

Supporting Academic Growth at Every Stage: Tailored for Ages 6–14

At Minerva Private Academy, we are proud to cater for students aged 6 to 14. We understand that children at different stages require different approaches to learning and enrichment. That's why we've carefully designed age-appropriate classes, tutoring, study support, and homework help to ensure each student is academically challenged and personally supported at the right level. It's important to highlight: Minerva is not an after-school care service. We are a true Academic and Enrichment Academy where students don't just pass time, they advance, thrive, and shine. While traditional after-school care offers supervision, Minerva provides a dynamic and sophisticated environment that combines academic excellence with creative exploration. Behind the scenes, an enormous amount of thought, passion, and expertise goes into curating our programs to ensure every moment spent with us adds value to your child's journey. We are honoured to contribute to the lives of families and children who deserve opportunities to learn, grow, and dream bigger without the burden of juggling multiple extracurricular schedules or the worry of high fees.

A Helping Hand for Families: Safe, Supportive, and Convenient

We know that modern family life is a balancing act, work, home, school, and everything in between. That's why Minerva Private Academy is committed to making life easier for parents while enriching the lives of children. Our campus is open until 6:00 PM, giving families the breathing space they need after a busy day. Imagine having a few uninterrupted hours to prepare dinner, go to the gym, or simply unwind, all while knowing your child is safe, thriving academically, making friends, and completing their homework in an elegant, supportive environment. No more rushed evenings filled with homework battles. No more worrying if your child is glued to a screen, bored or alone. Instead, your child will be immersed in a world of learning, creativity, and connection, surrounded by passionate teachers who genuinely care. All of this, delivered in a sophisticated, thoughtfully designed luxury environment, at an affordable flat weekly rate of only \$75.00, because we believe every child and family deserves access to excellence.

This is the Minerva difference, and this is just the beginning!
