

# VIRTUAL GATE GUARD

## AUTOMATED ENTRY WITH DRIVER'S LICENSE TECHNOLOGY

---

Envera's Virtual Gate Guard with driver's license technology is equipped with an easy-to-use ID scanner. Guests arriving at the community insert their driver's license into the ATM-style scanner. If their name is registered as a permitted visitor, the gate will automatically open. Visitors who are not in the system will be greeted by a licensed Virtual Guard who will allow or deny entry as necessary.

# VIRTUAL GATE GUARD WITH DRIVER'S LICENSE TECHNOLOGY

## Features:

- Verifies the driver's state-issued identification
- Expedites wait times at an entrance
- Tracks drivers entering a community
- Higher level of verification
- Helps reduce stacking
- Easy, verified entry for repeat visitors
- Capture of identification information using optical character recognition
