Safe Passage Virtual Attendant Services

Safe Passage offers concierge services in addition to our Virtual Attendant services. Our team members will take direct phone calls from your residents and process their visitor management needs.

- **Live Attendants**. Our attendants will be waiting for a approaching visitor. Once the button is pressed, we will *immediately* respond (**same as a live guard**).
- **Next Gen Kiosk.** Our attendants will be able to see visitors up to 130 degrees around the kiosk and will be able to hold a 2-way conversation with visitors.
- **Flexible services.** Our Virtual attendants will be dedicated to servicing your community and the unique needs of your community through our concierge services.
- **Visitor Lane LPR.** Our LPR cameras will automatically process visitors that have been preregistered. We will perform a log entry (save time, destination, tag information etc. to the cloud), and send a text message notification of guest arrival to the resident and finally open the gates all in just a few seconds time using Safe Passage technology.

- **No visitor down time**. We will have multiple virtual attendants processing visitor activities. Unlike a live guard who will need to step away for lunch and other important activities like restroom time etc. our attendants are always there **(advantage over live guards)**
- **Remote Control Gate Open.** We offer the ultimate level of flexibility by allowing your residents the ability to open the gate from the comfort of their homes for their visitors. This activity is also tracked and logged by the Safe Passage system.
- **Mobile Apps for Residents are at no additional cost.** Your residents will be able to use our mobile app (available on droid and apple) to perform visitor management. At no additional cost. We also have a browser version available to residents.
