# Presentation

**Tutipila Coin**  is a differentiated cryptocurrency proposal. It is the **first Brazilian project** running on the **Fantom Opera network**, which has an incredible technology with an algorithm based on consensus, with **high transaction speed and very low fees**, being an **ecologically correct currency** (low energy consumption algorithm that doesn't need mining) and with high scalability for **everyday use**.

# Origins

We founders - **Piratoshi Namakonha** 🐼 - and the **Pilinha** team are primarily focused on helping popularize the **Fantom Opera network** in **Brazil**, so we developed a **revolutionary** tokenomics in partnership with experts and investors from **Tio Patinhas Crypto Club**.

After building a real team scaling the most varied cryptos, and testing them all, we ended up knowing and marveling at **Fantom's** performance and its scalability for **instant transactions**, and with **extremely low fees** that no other crypto can beat.

We already had a different tokenomics in mind, and knowing the development tools available on the **Fantom Opera** network encouraged us to put this tokenomics **into practice**.

The dream of the **Brazilian Pilinha** for **everyday use** can **finally come true**.

Yes, **Pila** is **faster** than **PIX**. Yes, you can use it to do **cent transactions**. No, you don't need a **bank account**.

# Tokenomics

With a total supply of **13,000,000 Pila**, with a low initial liquidity of just **1,000,000 Pila**, and a constant **airdrop** campaign, which will ensure that no one can buy all the tokens or rugpull.

Decimals: **6**

Total supply: **13,000,000**

Slippage on the pool: **3%**

Reserve to airdrops scheduled on roadmap:	<b>1,000,000</b>
Liquidity Pools for WFTM pair:	<b>1,000,000</b>
Liquidity Pools for FIAT pair (USD, BRL, etc.):	<b>1,000,000</b>
LP for Dex's coins pairs (Zoo, Boo, Spirit, etc.):	<b>1,000,000</b>
Farms:	<b>3,000,000</b>
Deployer/Developer:	<b>1,000,000</b>
For donations:	<b>2,000,000</b>
Timelock december/2022:	<b>1,000,000</b>
Timelock december/2023:	<b>1,000,000</b>
Timelock december/2024:	<b>1,000,000</b>

The low liquidity added to constant **airdrops** aims to make **Tutipila Coin** attractive for those looking to **day trade**, while **benefiting long-term holders**.

**So just hodl some Pilas!**

We will also make **donations to animal activism institutions** whenever the token is valued. We already have a list of institutions that we're going to allocate some **Pilas** to, but we want to expand this list. Therefore, **we are open** for you to **contact our team** to talk more about your project and for us to study a **partnership**.

The objective is to assist in the economic interaction between people and institutions willing to help and rescue animals in vulnerable conditions. The list ranges from caregivers, to people who work in **rescue, castration, and voluntary medical care, to animal sanctuaries**.

Offering a financial platform for reliable and instant transactions thanks to the **Fantom Opera** network, **Tutipila** enables members of the animal cause community to benefit from the adoption of cryptocurrencies on a large scale in **Brazil**.
