

Sophomore Year Final Portfolio

Maxwell Gudeman
-2023-

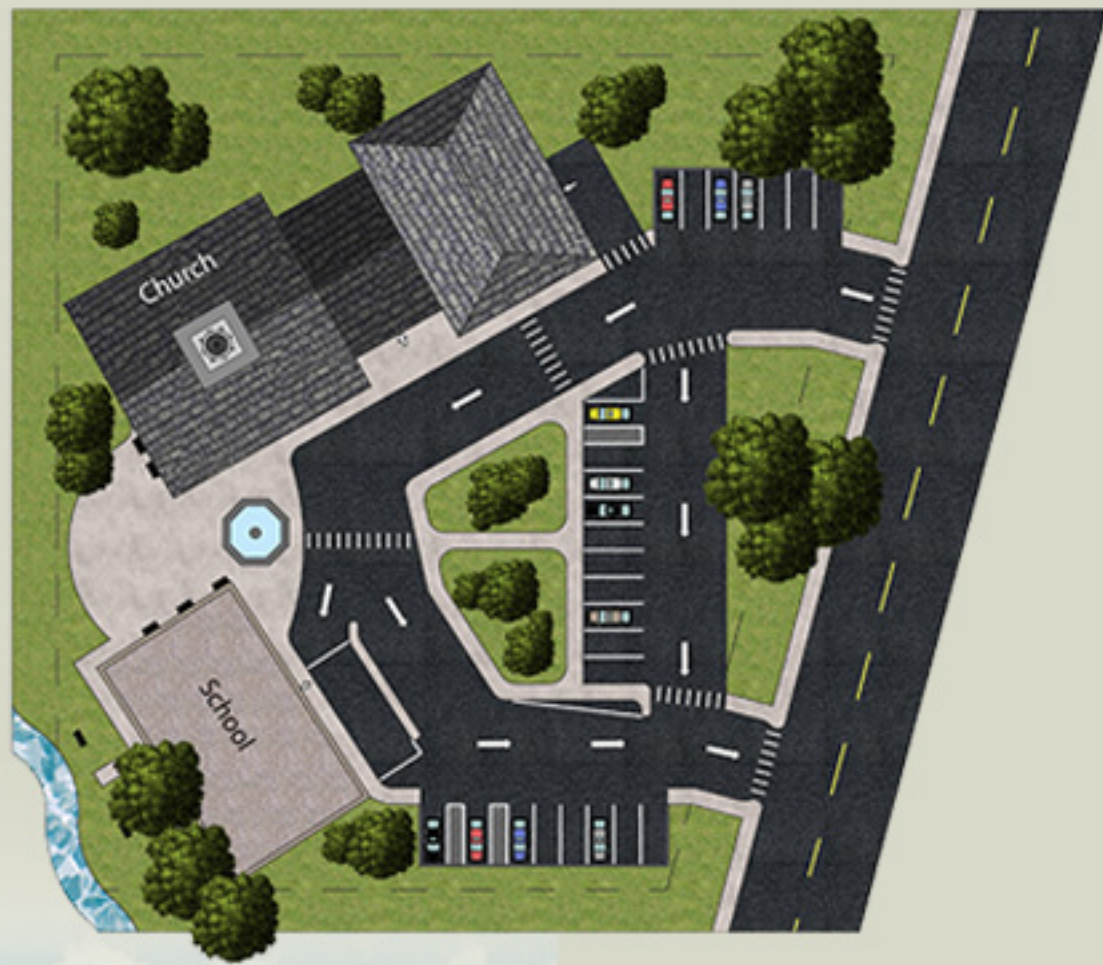

Site 1- Community Recreation Center

For this project we were told to place each of the given objects to place on the site in any order we want. We needed to provide 4 handicap accessible parking spots. Locate the Pool, Tennis court, Dog park, Beachers, Service building, and the Club house, as well as provide a bike rack for 20 bikes.

Site 2- Church and School complex

For this project we were given a site with the main road being on the Eastern side of the site. We had to provide a minimum of 25 parking spots. 3 had to be handicap accessible. 2 curb cuts, The school near the stream and the court yard has to be protected from Western winds.

For site 2, I had to do the entire project with my non dominant hand because I had a cast on my right arm.

Site 3- Woodland Court

For this project we were assigned to place a predesigned house onto the site given to us while providing a driveway turnaround, A Grand Cayman Pool, Pool House, And a Garden. There is a stone wall at the back of the property with a mountain view and a city skyline view to the North

For site 3, I had to do the entire project with my non dominant hand because I had a cast on my right arm. So i was unable to make a model. I created a 3D render on revit instead.

Site 4- The Farmers Market Final Project

For the final project we were assigned to create a Farmers market in a group up to 3 people. Tyler, Ambriel, and I Created this site incorporating a Farmers market with 5 outdoor greenhouses, Outdoor storage, Outdoor plant display, and a loading zone for trucks.

About Me

My name is Max Gudeman and I am a Hereford High School graduate of 2020. I enjoy creating new things and exploring new areas. I like to stay active and go outside. I enjoy snowboarding, Long boarding, and Riding bikes. I graduated during the Covid-19 outbreak which means i missed out on a lot of things. I never had a prom and we didnt get a graduation. I had to be flexible during this time and learned quite a bit about patience. I decided to pursue Outdoor Recreation Mgmt and business at a small college in the mountains of West Virgina. After my first year i realized that the Recreation program wasnt for me, and i switched to a Business major because it felt like "The right thing to do." After about a year and a half i was still discontent and uncertain about what I was called to do. I decided it would be best to withdraw for a semester to work and think about my future and what would make me happy. I had an opprotunity to tour a Women & Children's Rehabilitation Center that my grandfather built, We talked a lot about the design side of the construction and it sparked my interest. My father encouraged me to take an AutoCAD class at a local community college and i quickly became hooked. I started to research my options, and became interseted in architecture. Penn College offered a hands-on approach that i never heard oof before and knew it was the place for me. So far, I really enjoy every part of the program. I am currently in a dual major (associates in Architecture/Bachelor of Architecture.) Architecture has revived my creativity in ways i never imagined. Watching something you design and create from beginningto end is so fulfilling. Its like seeing your creations come to life. Thank you for checking out my portfolio!

Philosphy:

We all are made diffrent which means we create diffrent things in diffrent ways. If you enjoy what you are doing, keep doing it.
