

How to make a palm cross

1 Take a palm that is about 2 feet long and 1/2" wide (if it tapers at the top, this is good). Hold the palm upright, so the tapered end points toward the ceiling.

2 Then bend the top end down and toward you

3 About a third of the way from the bend you just made, bend and crease palm diagonally

4 About an inch away from the stem of the cross, bend the palm back behind the stem so that it is now facing to your left. Make the bend at a good length to form the right arm of the cross.

5 Fold that same section at a point that equals the length on the right side, bend it on the left side and bring the end forward.

6 From the center of the cross, fold to the upper right so that it can wrap around where the "stem" and the right arm intersect.

7 Fold down and to the left behind the cross

8 and then fold it toward the right so that it is parallel and under the arms of the cross

9 Bring it up behind the cross again, this time folding it up toward the northwest direction

10 Tuck in the end to finish

11 Turn over!
