

Your life
is moving.
Your smile
should
keep up.

 **invisalign**® | made to move

How does Invisalign® treatment work?

Invisalign® clear aligners use the most advanced technology to give you your best smile yet. Using a series of aligners made with advances, such as proprietary SmartTrack® material, Invisalign treatment can straighten your teeth with 75% more predictability.* Plus, your smile is shaped more gently and with less pain than braces.**

The best part? Your lifestyle isn't interrupted, meaning you can still enjoy the activities you love and the foods you can't live without. All with no unexpected trips to the doctor due to broken wires or brackets.

The Treatment

Your doctor will complete a scan or impression. Together with our team of specialists, they'll craft a complete digital treatment plan, mapping out your best smile yet from beginning to end.

The Aligners

Invisalign clear aligners are designed to transform your smile up to 50% faster*** and are made with unique advances, such as SmartTrack material. Each aligner throughout your treatment gradually and predictably moves your teeth as you continue to live your life the way you want.

The Transformation

Throughout your treatment, you'll see your smile transform, gradually revealing the person you've always imagined yourself to be. With the help of Invisalign clear aligners and your experienced doctor, you'll discover how a series of small, expertly designed shifts can shape a whole new future.

*When compared with clear aligners that are made of off-the-shelf, single-layer .030-inch material.

**In a study by Miller et al., with adults measuring pain in the first week of treatment.

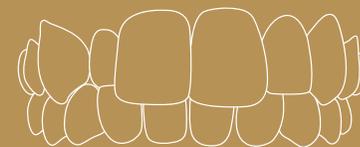

***With weekly aligner changes, compared with two-week aligner wear.

Your smile
is unique.
Shouldn't your
treatment be?

Treatments designed for you.

Invisalign® clear aligners can treat a wide range of teeth straightening conditions. Using the most advanced technology, Invisalign® treatment corrects simple to complex cases.

Move your smile and life forward with Invisalign® clear aligners:

- With advances such as SmartTrack® material your smile will be shaped with 75% more predictability.¹
- Aligners are trimmed along your gum line for optimal comfort and aesthetics.
- Your lifestyle isn't interrupted as you continue to enjoy the foods and activities you love.
- Easier to brush and floss as normal, for better oral health.
- More affordable than you may think: insurance may cover up to 50% of treatment.²

➤ Ask your doctor why Invisalign® treatment is right for you.

1. When compared with clear aligners that are made of off-the-shelf, single-layer .030-inch material.
2. Many dental insurance plans cover Invisalign treatment just as they would other orthodontic treatments. Ask your doctor about how to use your orthodontic insurance coverage to pay for Invisalign treatment.
3. With weekly aligner changes, compared with two-week aligner wear.
