

Activity Book

Name:

Space Adventure

Colour me in

The stars twinkle and shine in the night sky, like dancers.
Can you give them some colour?

Whats your favourite colour?

Learn about me

Earth is the fourth planet from the sun. It's where we live.

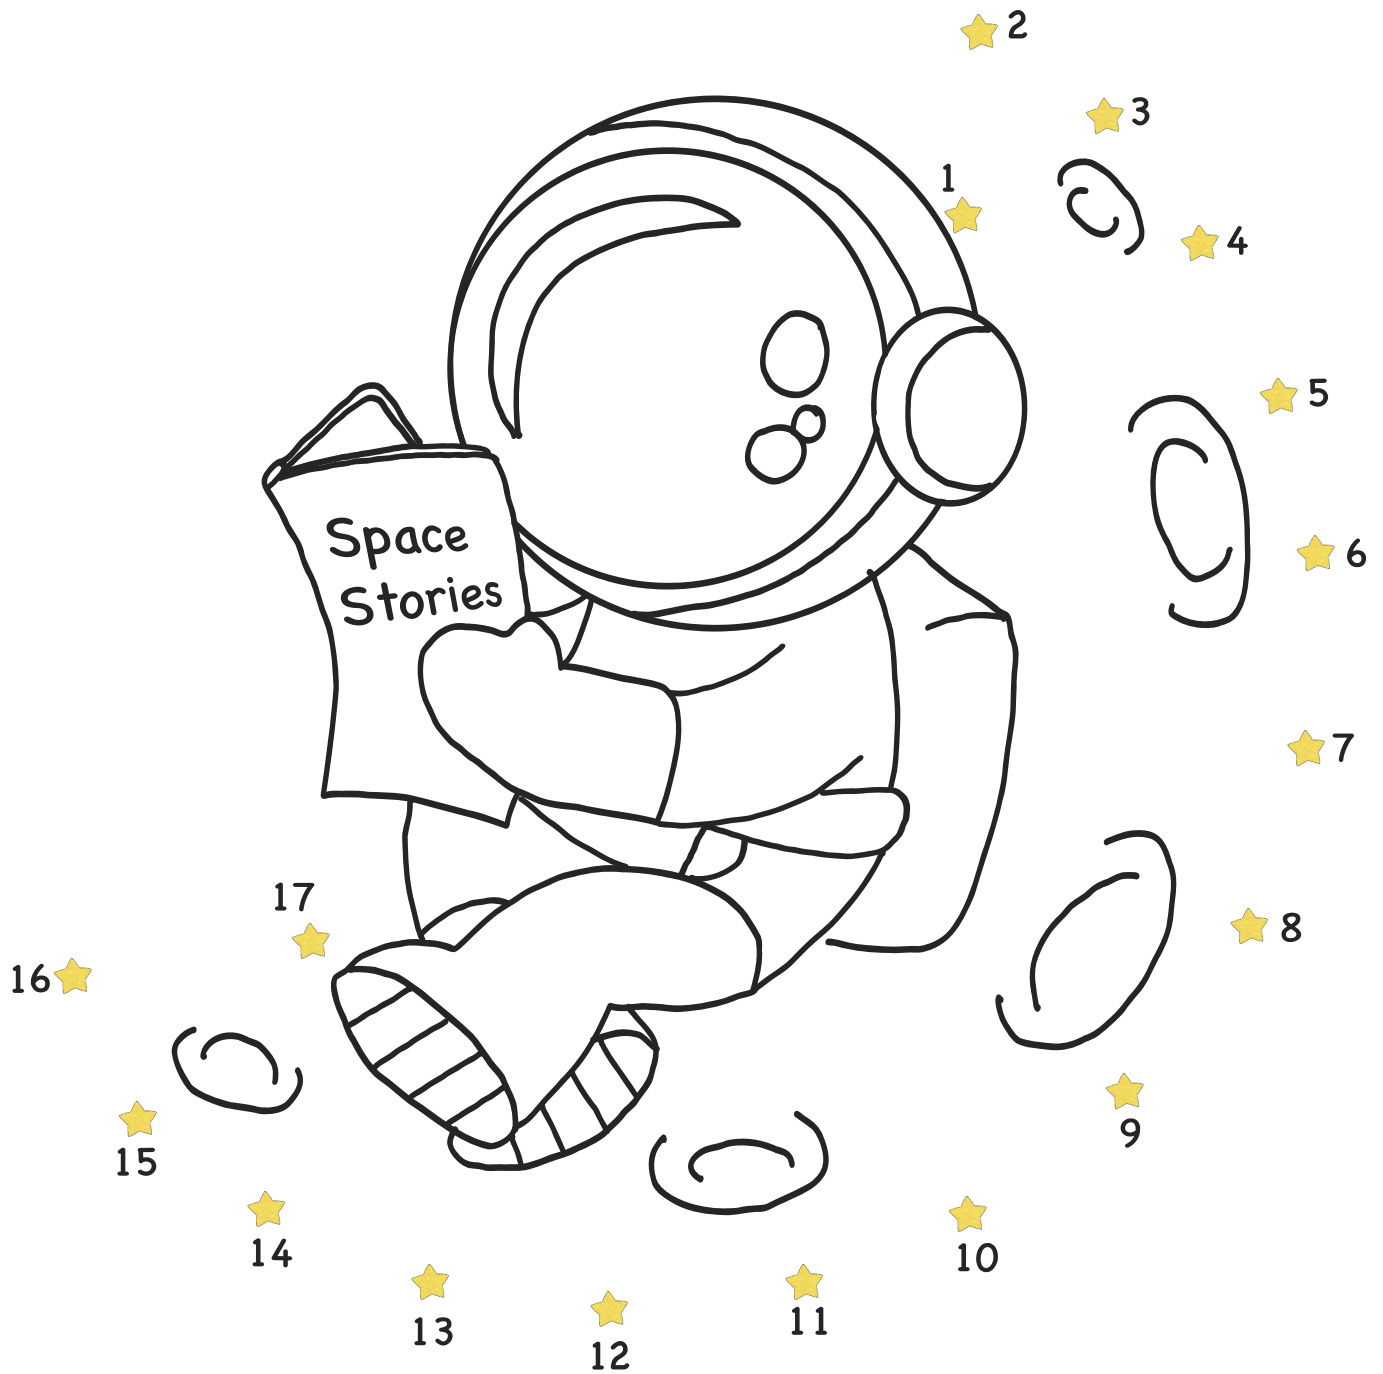

Earth is a very important planet in our galaxy because, it is the only one with plants, animals and people. It is the perfect temperature for life. Any closer to the sun we would be too hot and any further from the sun we would be too cold.

It has water and an atmosphere with gases that we need to breath. Earth has gravity that keeps us on the ground which is handy when drawing a picture or riding a bicycle.

Star to Star

Complete the picture by connecting the stars.

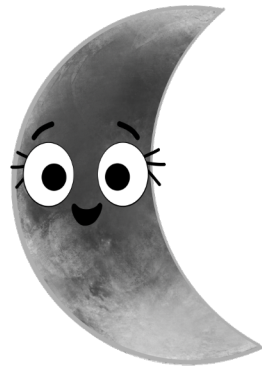

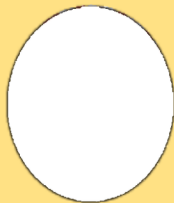

Missing End Sounds

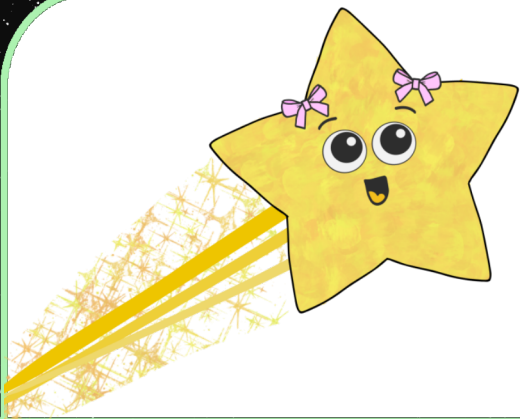

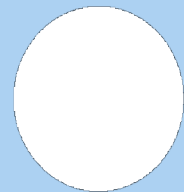

Can you fill in the missing end sounds?

Space Maths

Lets do some adding with our favourite space objects.

$$3 \text{ Earths} + 2 \text{ Earths} = \bigcirc$$

$$1 \text{ Girl} + 4 \text{ Girls} = \bigcirc$$

$$6 \text{ Stars} + 3 \text{ Stars} = \bigcirc$$

$$8 \text{ Rockets} + 2 \text{ Rockets} = \bigcirc$$

$$5 \text{ Aliens} + 1 \text{ Alien} = \bigcirc$$

Spot Me In Space

Can you find all the objects on the list?

10 bubbles

9 stars

8 rockets

7 space ships

3 instruments

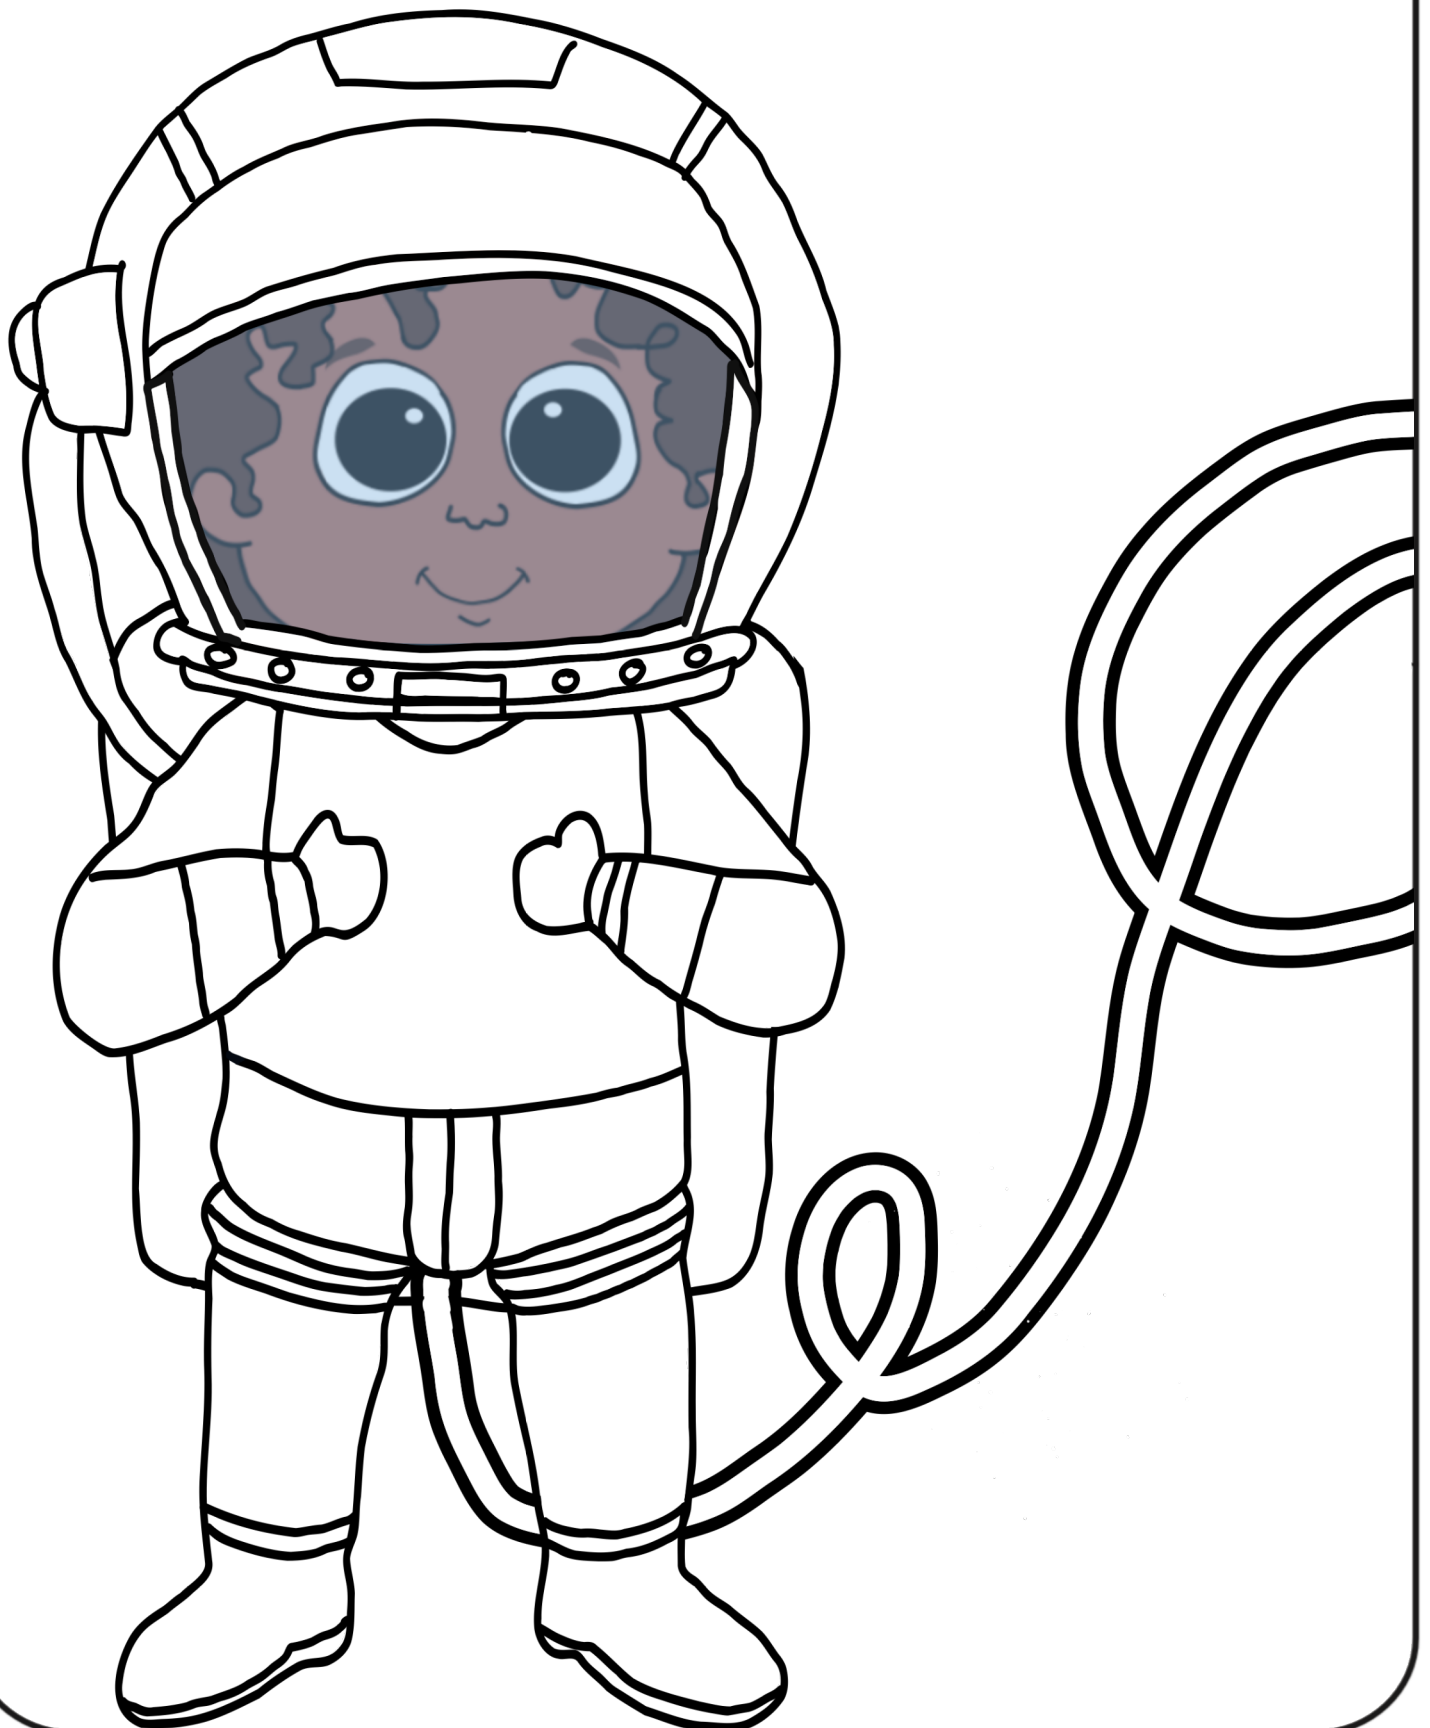

2 comets

1 planet

Space Designer

Decorate Yara's space suit any way you like.

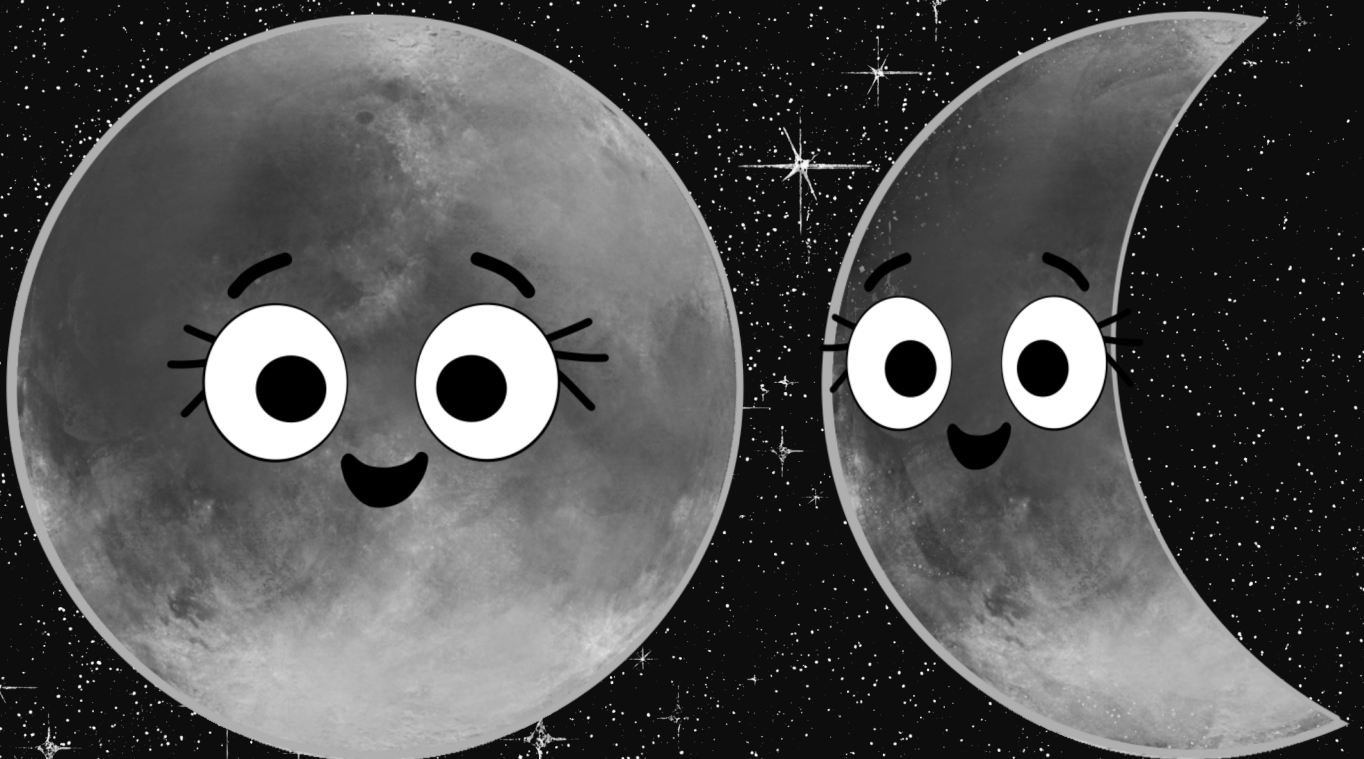

Learn about me

The moon is a piece of rock about a quarter the size of Earth. It has mountains, volcanoes, and craters. The moon is often hit by meteors and space debris.

The moon rotates at a similar speed to us, so we only ever see one side of the moon.

The moon does not make its own light. We can see it in the night sky because, it's reflecting the light of the sun.

The moon has 8 phases, that look different throughout the month.

A Space Story

1 Hina was a girl with a very important job, to collect water for her mum and pop.

She walked to the local stream when she saw something so beautiful, she thought she was in a dream.

2 It was a rainbow coming from the moon with colours green, purple, blue, orange and maroon. There was only one thing Hina could do ...

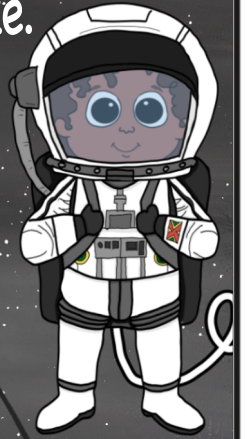

3 She crossed the rainbow bridge to get a better view. She's still there if you look carefully, for she couldn't leave a view this lovely.

Space Maze

Help Yara find her way back home through the maze.
