

# **Shop Layout Guide**

- Use these scale machine models to help plan your shop layout to Maximize Your Shop's Space!
- Plan the perfect layout for the tools/machines that you have in your workflow.
- See the interferences on paper rather than after you build or move things
- Print and cut or arrange digitally

### Tips for preserving the most usable space in a shop (no matter how large or small it may be):

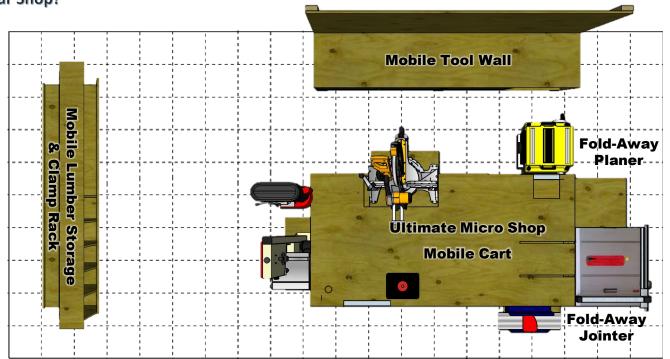

- 1. Keep material storage close to where they will enter the shop
- 2. Place machines used to break down and mill close to material storage
- 3. Align work flows so that they are parallel (Long runs for: Milling, Table Saw, Miter Saw, Band Saw, etc should all be parallel if possible)
- 4. Align "dead-space", non usable parts of machines (drill press column, sides of planer/jointer, rear of miter saw, etc.) can be placed directly adjacent to other machines without causing an interference.
- 5. Group by function/process (Milling / Shaping) (Fine cut / Sanding)
- 6. Keep assembly tables/areas central. We are constantly working on pieces and storing them in between operations.
- 7. Mobility is key. Keep things on wheels when possible, workflow & space needs will change over time and sometimes during a project.
- 8. Plan for project part storage during a project (cubbies or bins for non-assembled part storage)
- 9. Remember to "think 3-D". Each machine has a different ideal working height, this can help you when planning your space-saving solutions and storage.

**EXAMPLES:** A jointer and planer are best at or just below waist level, a scroll saw can be used while seated, a lumber storage rack or dust collector can be wall mounted above normal work height etc. I use this concept in my fold away planer and jointer mounts. I also use this to keep my dust collection under my workbench as opposed to wall or ceiling mounted. Use all possible space under workbenches and on walls.

### **OPEN THE POWERPOINT**

# My Current Shop Layout (20ft x 10ft)

13" x 8' Board

6" x 8' Board

4' x 8' Plywood Sheet

## **How to Use This**

- Print the Template Page that best fits your space.
- Print the Scale Machine Templates Page
- Cut out Machines similar to yours & arrange them
- Use the sample "boards" to check for interferences
- Photograph the layout or tape them in place

#### <u>OR</u>

- Open this file in PowerPoint (NEED SOME POWERPOINT TIPS?)
- Move, rotate, and Arrange the machine icons on your template page
- · Print as desired

## **Scale Machine Templates**

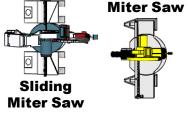

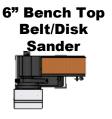

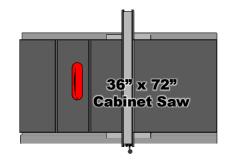

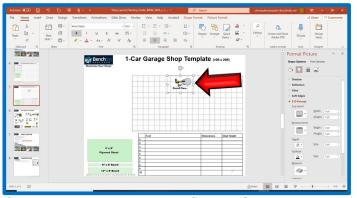

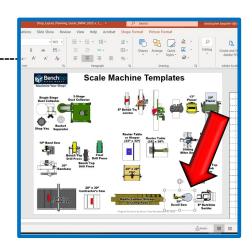

# **PowerPoint Tips**

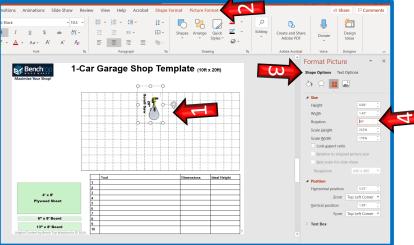

### **How to move & rotate:**

- 1. Go to the machine templates page, select the machine you want.-----
- 2. Right Click & "Copy"
- Go to the shop template page and "Paste", drag to where you want it.

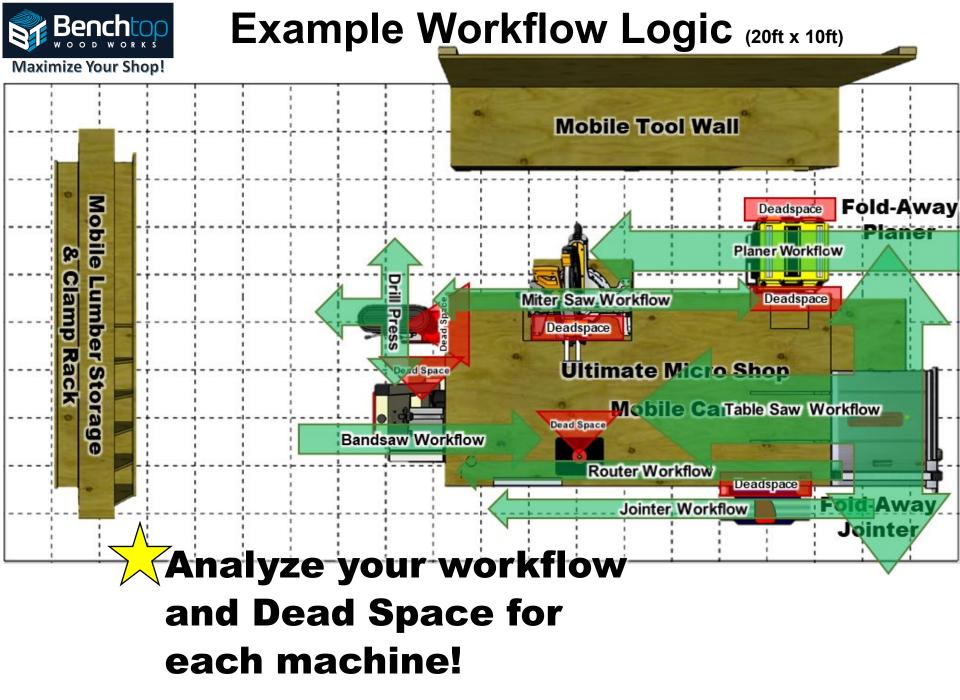

4. To precisely rotate: Select the item> format picture or shape > Shape Options > Dimension icon > Size > Rotation

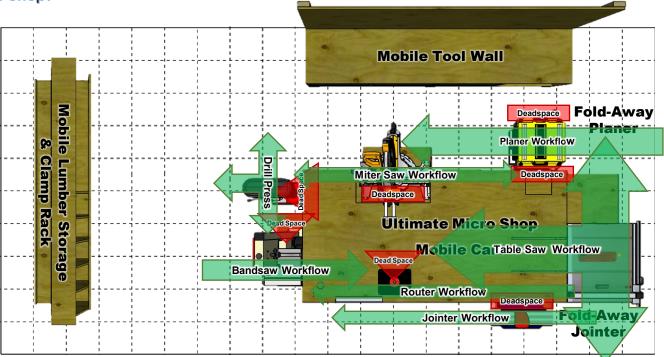

5. To remove text: select the machine area (both text and machine will select), click a 2<sup>nd</sup> time directly on the text, edit delete the text as needed.
