# Shop Layout Guide

- Use these scale machine models to help plan your shop layout to Maximize Your Shop's Space!
- Plan the perfect layout for the tools/machines that you have in your workflow.
- See the interferences on paper rather than after you build or move things
- Print and cut or arrange digitally

## **Tips for preserving the most usable space in a shop (no matter how large or small it may be):**

1. Keep material storage close to where they will enter the shop
2. Place machines used to break down and mill close to material storage
3. Align work flows so that they are parallel (Long runs for: Milling, Table Saw, Miter Saw, Band Saw, etc should all be parallel if possible)
4. Align "dead-space", non usable parts of machines (drill press column, sides of planer/jointer, rear of miter saw, etc.) can be placed directly adjacent to other machines without causing an interference.
5. Group by function/process (Milling / Shaping) (Fine cut / Sanding)
6. Keep assembly tables/areas central. We are constantly working on pieces and storing them in between operations.
7. Mobility is key. Keep things on wheels when possible, workflow & space needs will change over time and sometimes during a project.
8. Plan for project part storage during a project (cubbies or bins for non-assembled part storage)
9. Remember to "think 3-D". Each machine has a different ideal working height, this can help you when planning your space-saving solutions and storage.

**EXAMPLES:** *A jointer and planer are best at or just below waist level, a scroll saw can be used while seated, a lumber storage rack or dust collector can be wall mounted above normal work height etc. I use this concept in my fold away planer and jointer mounts. I also use this to keep my dust collection under my workbench as opposed to wall or ceiling mounted.*

# How to Use This

## Maximize Your Shop!

- Print the Template Page that best fits your space.
- Print the Scale Machine Templates Page
- Cut out Machines similar to yours & arrange them
- Use the sample “boards” to check for interferences
- Photograph the layout or tape them in place

### OR

- Open this file in PowerPoint (THE POWERPOINT FILE IS ATTACHED TO THIS PDF) ([NEED SOME POWERPOINT TIPS?](#))
- Move, rotate, and Arrange the machine icons on your template page Print as desired

# PowerPoint Editing Tips

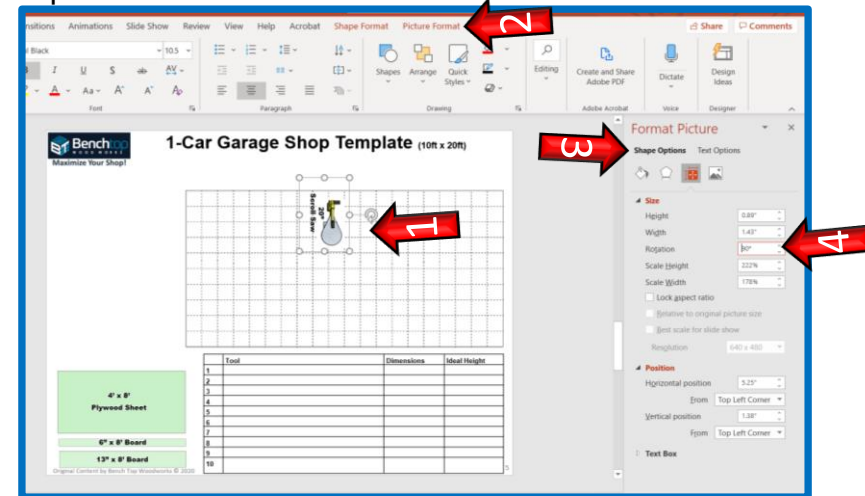

Maximize Your Shop!

## How to move & rotate:

1. Go to the machine templates page, select the machine you want.
2. Right Click & "Copy"
3. Go to the shop template page and "Paste", drag to where you want it.

4. To precisely rotate: Select the item> format picture or shape > Shape Options > Dimension icon > Size > Rotation

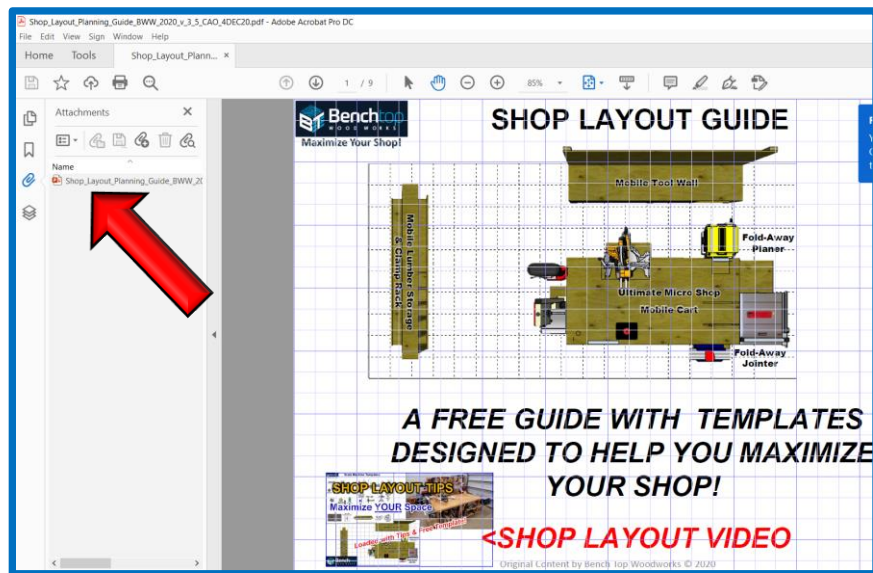

5. To remove text: select the machine area (both text and machine will select), click a 2<sup>nd</sup> time directly on the text, edit delete the text as needed.

# PowerPoint Opening Tips

## How to Located and Open the Attached .pptx File:

Note: There is an attached Microsoft PowerPoint File attached to this PDF for your use! Some folks have had difficulty locating and opening it. These instructions are for Adobe PDF viewer, if you are using a different program the steps will be similar, but specific to your PDF Viewer. The Powerpoint file must be opened on a computer with PowerPoint installed or using a program like Google Documents.

1. Look to the Left Side of your PDF Reader. If the File is not visible, follow the next steps:

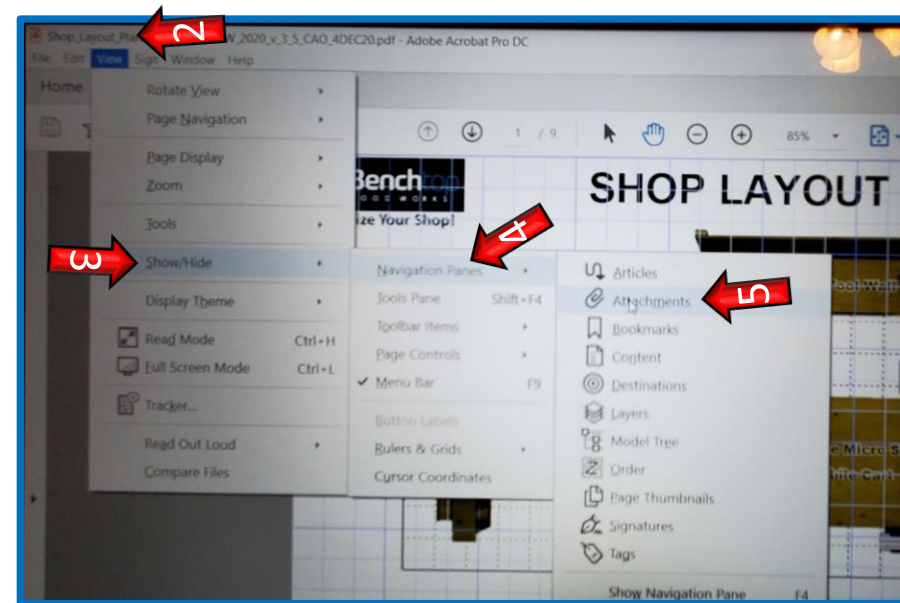

2. In the top menu select "View"

3. Select "Show/Hide"

4. Select "Navigation Panes"

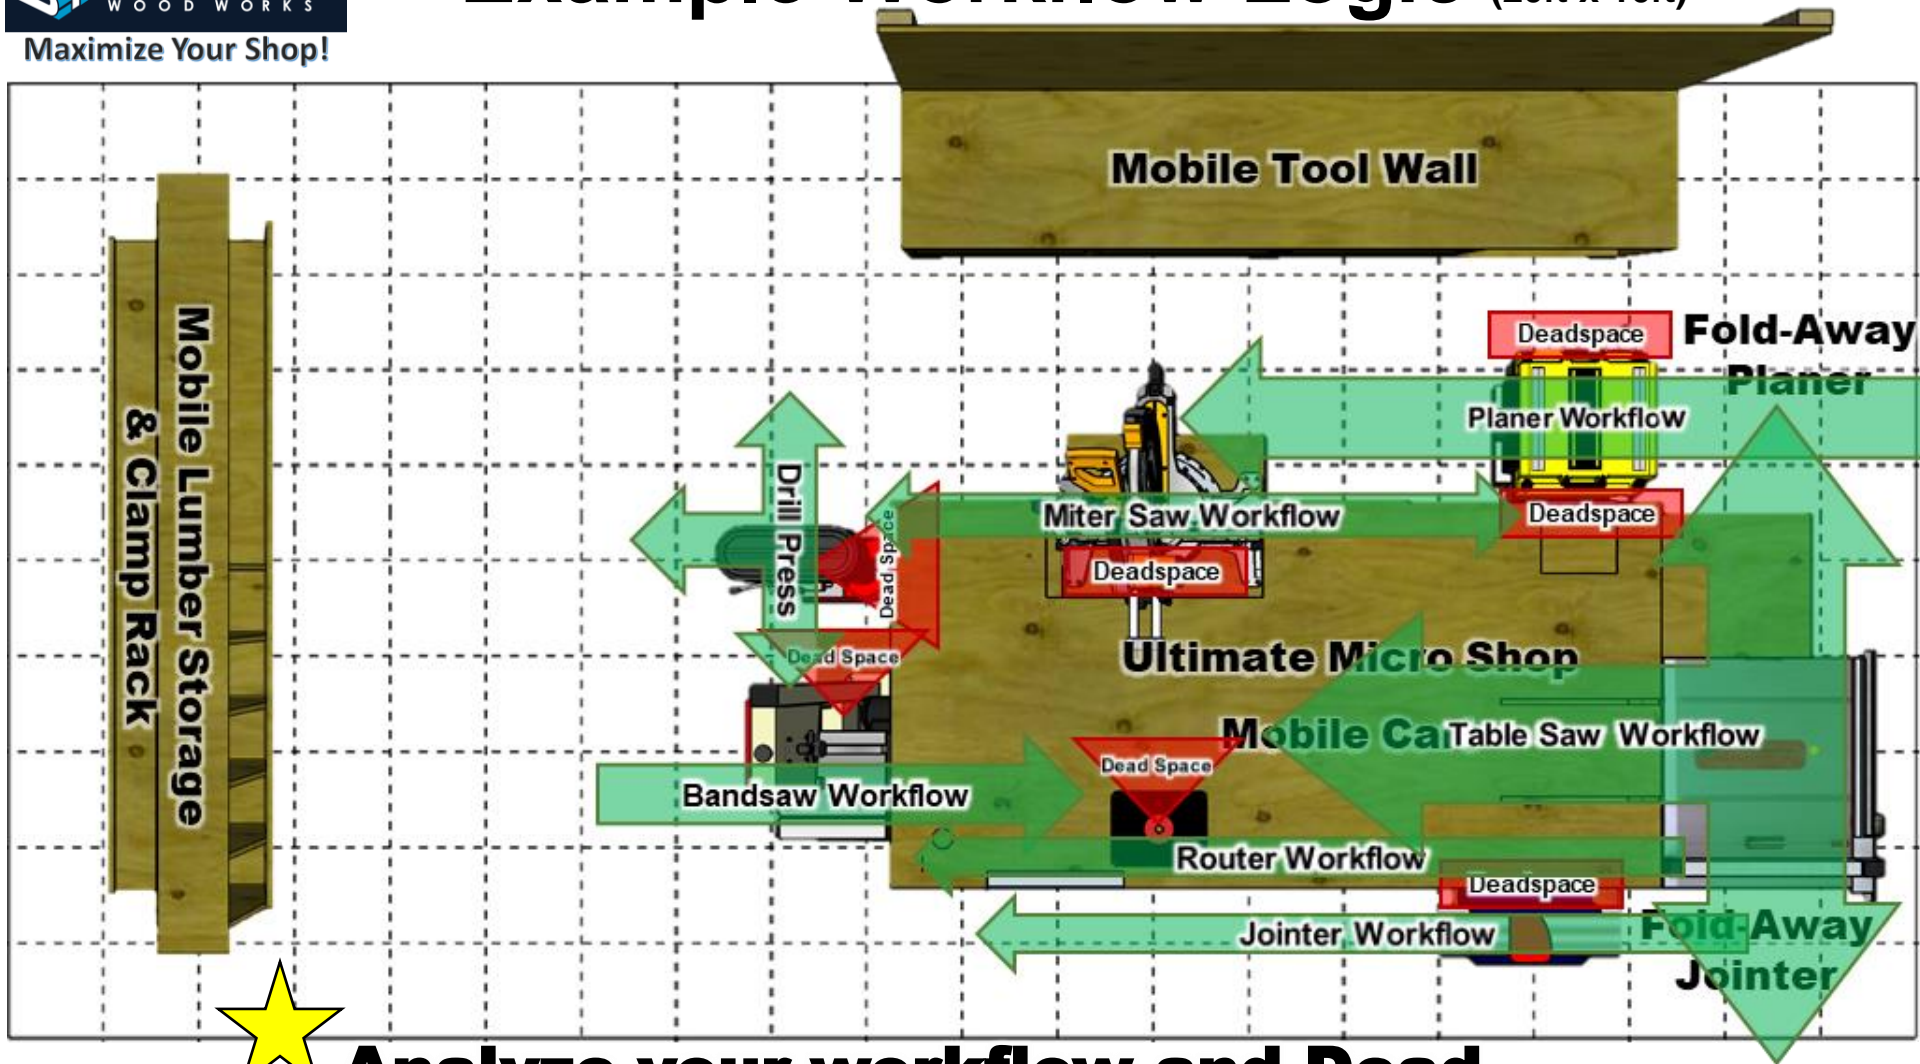

5. Select "Attachments"

6. The attachment bar will open and the .PPTX files will be visible. Select and open the file!
