

Y-Age AEON Patch

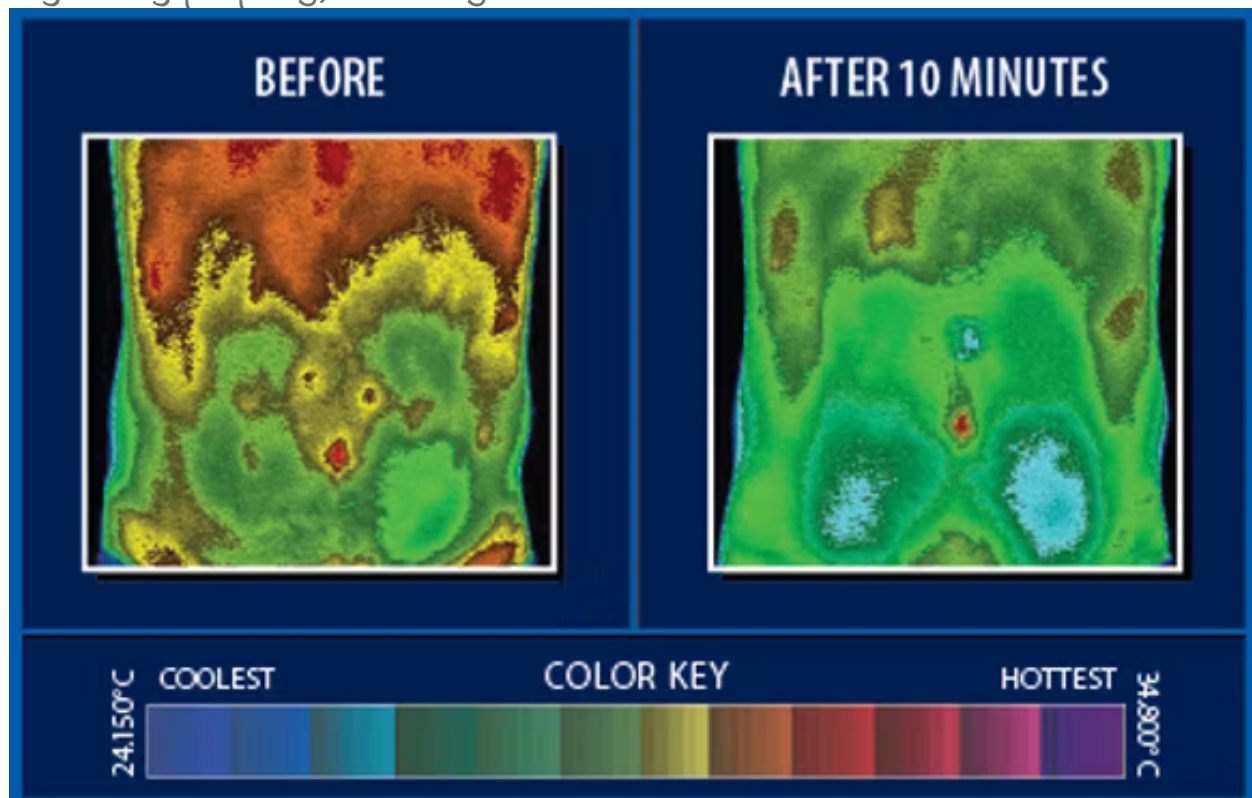

LifeWave's Y-Age AEON patch combats two of the greatest causes of aging and illness, stress and inflammation. The AEON patch calms the nervous system of the body, and also has a dual action of decreasing inflammation.

Reduce Stress and Inflammation

The stress-relaxation responses in the body are governed by what is called the Autonomic nervous system, which is the most important indicator of how our body handles stress. The autonomic nervous system consists of two parts; the sympathetic and the parasympathetic. The sympathetic nervous system is best known for stress response, or fight or flight. The parasympathetic nervous system promotes a relaxation

response. For so many people, the autonomic nervous system is no longer regulating properly, and they are stuck in "stress mode"

"After looking at results from seven separate research studies, as well as a focus group with more than 450 participants, we have proven that AEON will change lives for the better with a never before available anti-aging effect"

--David Schmidt, LifeWave CEO & founder
