Pharmacy

## TOPICAL SINUS THERAPY

Topical Sinus Therapy involves application of medications directly to the infected sinuses and inflamed membranes.

Professional Arts Pharmacy provides advanced medical devices that make this process quick and easy – and we also offer personal assistance every step of the way.

**We can help your patients breathe easier...and help your office staff catch its breath.**

Professional Arts Pharmacy not only provides topical medications to treat your patients' respiratory infections – we also offer many benefits that save physicians and staff valuable time while reducing insurance issues and lowering costs.

## Your Patients – Our Priority

Our topical sinus therapy model provides treatment options for patients who are suffering from upper respiratory tract issues including chronic sinusitis, chronic rhinitis, nasal polyps, allergies, gram negative/pseudomonas infections, gram positive/staph or strep infections – as well as patients who may simply need maintenance therapy.

All of the medications that we utilize are applied topically, so the patient may not experience many of the same side effects that would be caused by taking the same medications by mouth.

We also offer complimentary culture/DNA review and recommendations for anti-infective topical therapy.

## Delivery Devices

### **NasoNeb® System**

This nasal nebulizer delivers a deep, penetrating aerosol to the nasal and paranasal sinus cavities that is comfortable to use and offers fast delivery times. NasoNeb® features a unique combination of particle size, airflow and fluid volume that results in a controlled therapy delivery.

### **Irrigation System**

Irrigations feature an easy squeeze bottle system that allows patients to deliver saline solution with positive pressure to clean the nasal passages thoroughly, while maintaining the head in an upright position. Patients have complete control of the pressure and volume of solution to help ensure comfort.
